Abstract: Using its Clean Air Act authority in sections 231 and 114, 42 U.S.C. 7571 and 7414, the EPA is proposing to renew the existing data collection requirement for new aircraft engines to report emissions information, production volumes, and technical parameters. Also, at this time, the EPA is proposing to amend this existing requirement to collect data on non-volatile particulate matter (nvPM) emissions from some classes of aircraft engines.

Form numbers: EPA Form Number: 5900-223.

Respondents/affected entities:

Respondents affected by this action are the manufacturers of aircraft gas turbine engines. Manufacturers producing aircraft gas turbine engines with a sea level static thrust greater than 26.7 kN will be subject to the new requirement for nvPM reporting.

Respondent's obligation to respond: Mandatory (pursuant to section 114 of the Clean Air Act).

Estimated number of respondents: 7 (total).

Frequency of response: Annual.

Total estimated burden: 502 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$43,199 (per year).

Changes in the estimates: There is an increase of 1,326 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This increase is due to the proposed amendment to the existing

ICR for the collection of nvPM data from some classes of aircraft engines.

Abstract: The New Source Performance Standards (NSPS) for Sulfuric Acid Plants (40 CFR part 60 Subpart H) apply to both existing facilities and new facilities. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. A sulfuric acid plant is any facility producing sulfuric acid (H₂SO₄) by the contact process by burning elemental sulfur, alkylation acid, hydrogen sulfide, organic sulfides and mercaptans, or acid sludge. A sulfuric acid plant does not include facilities where conversion to sulfuric acid is used primarily as a means of preventing emissions to the atmosphere of sulfur dioxide (SO₂) or other sulfur compounds.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of sulfuric acid plants.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart H).

Estimated number of respondents: 53 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 13,500 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1,660,000 (per year), which includes \$239,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: The increase in burden from the most recently-approved ICR is due to an adjustment. Hours were added to approximate the time spent by each source to familiarize with the rule requirements, and the total hours were rounded to three significant digits, which resulted in a small increase in labor hours and O&M costs since the last renewal.

Director, Regulatory Support Division.
