Abstract: The New Source Performance Standards (NSPS) for Sulfuric Acid Plants (40 CFR part 60 Subpart H) apply to both existing facilities and new facilities. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. A sulfuric acid plant is any facility producing sulfuric acid (H₂SO₄) by the contact process by burning elemental sulfur, alkylation acid, hydrogen sulfide, organic sulfides and mercaptans, or acid sludge. A sulfuric acid plant does not include facilities where conversion to sulfuric acid is used primarily as a means of preventing emissions to the atmosphere of sulfur dioxide (SO₂) or other sulfur compounds.

In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NSPS.

Form Numbers: None.

Respondents/affected entities:

Owners or operators of sulfuric acid plants.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart H).

Estimated number of respondents: 53 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 13,500 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$1,660,000 (per year), which includes \$239,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: The increase in burden from the most recently-approved ICR is due to an adjustment. Hours were added to approximate the time spent by each source to familiarize with the rule requirements, and the total hours were rounded to three significant digits, which resulted in a small increase in labor hours and O&M costs since the last renewal.

Director, Regulatory Support Division.
