

developing and revising State Implementation Plans (SIPs) in accordance with 40 CFR 51, evaluating air pollutant control strategies, developing or revising national control policies, providing data for air quality model development and validation, supporting enforcement actions, documenting episodes and initiating episode controls, air quality trends assessment, and air pollution research.

The state and local agencies and tribal entities with responsibility for reporting ambient air quality data and information as requested in this ICR submit these data electronically to the EPA's Air Quality System (AQS) database. Quality assurance/quality control records and monitoring network documentation are also maintained by each state and local agency, in AQS electronic format where possible.

Although the state and local air pollution control agencies and tribal entities are responsible for the operation of the air monitoring networks, the EPA funds a portion of the total costs through federal grants. These grants generally require an appropriate level of contribution, or "match," from the state/local agencies or tribal entities. The costs shown in this renewal are the total costs incurred for the monitoring program regardless of the source of the funding. This practice of using the total cost is consistent with prior ICR submittals and renewals.

Form numbers: None.

Respondents/affected entities: State, local and Tribal Air Pollution Control Agencies.

Respondent's obligation to respond: Mandatory per 40 CFR 58.

Estimated number of respondents: 168 (total).

Frequency of response: Quarterly.

Total estimated burden: 1,756,355 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$212,581,038 (per year), includes \$15,066,248 annualized capital or operation & maintenance costs.

Changes in estimates: There is a decrease of 33,666 hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This decrease is due to a change in program requirements as well as adjustments to the estimates (e.g., to account for inflation, network growth/shrinkage, etc.).

Dated: August 23, 2018.

Richard A. Wayland,

Director, Air Quality Assessment Division.

ENVIRONMENTAL PROTECTION AGENCY

[EPA-HQ-OW-2018-0618; FRL-9983-27-OW]

Public Meeting on EPA's Study of Oil and Gas Extraction Wastewater Management

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of public meeting.

SUMMARY: The Environmental Protection Agency (EPA) will host a public meeting to obtain input on its Study of Oil and Gas Extraction Wastewater Management. In May 2018, EPA initiated a study to evaluate approaches to managing both conventional and unconventional oil and gas extraction wastewaters generated at onshore facilities. EPA's study will address questions such as how existing federal approaches to produced water management under the Clean Water Act can interact more effectively with state and tribal regulations, what requirements or policy updates are needed, and whether support exists for potential federal regulations that may allow for broader discharge of treated produced water to surface waters. A key component of the study is to engage with stakeholders to solicit information from their individual perspectives on topics surrounding produced water management. This spring and summer, EPA met with various stakeholders across the country. This public meeting is the next step in EPA's outreach. During this meeting, EPA will report on what it has learned to date and provide stakeholders the opportunity to provide additional input. For more information on the meeting and the study, see the **SUPPLEMENTARY INFORMATION** section of this notice.

DATES: The public meeting will be held on October 9, 2018, from 10:30 a.m. to 4 p.m., Eastern Time. The meeting will begin with EPA's status report on the study. This will be followed by a panel discussion on the work happening across the federal family to coordinate federal resources and reduce duplication on cross-cutting water issues. The public input session will begin at 12:30 p.m.

ADDRESSES: The meeting will be held at William J. Clinton Building—East, Room 1153, 1201 Constitution Avenue NW, Washington, DC.

FOR FURTHER INFORMATION CONTACT: Jan Matuszko, Engineering and Analysis Division, Office of Water, email matuszko.jan@epa.gov.

SUPPLEMENTARY INFORMATION: For more information about the study, see EPA's website at <https://www.epa.gov/eg/study-oil-and-gas-extraction-wastewater-management>.

Participating in the meeting: The public is invited to speak during the October 9 public meeting. Those wishing to attend and/or speak can register at oil-and-gas-study@epa.gov. Please provide your name, organization, email address and indicate whether you plan to speak. Each speaker will be limited to three minutes. Registration is recommended but not required for this meeting. For security reasons, we request that you bring photo identification with you to the meeting. Seating will be provided on a first-come, first-served basis. Please note that parking is very limited in downtown Washington, and use of public transit is recommended. The EPA Headquarters complex is located near the Federal Triangle Metro station. Upon exiting the Metro station, walk east to 12th Street. On 12th Street, walk south to Constitution Avenue. At the corner, turn right onto Constitution Avenue and proceed to the EPA East Building entrance.

If you are unable to attend, you can submit a written statement at: <http://www.regulations.gov>. Enter Docket ID No. EPA-HQ-OW-2018-0618. Follow the online instructions for submitting a written statement. Once submitted, written statements cannot be edited or withdrawn. EPA may publish any written statement received to its public docket.

Do not submit electronically any information you consider to be Confidential Business Information (CBI). For additional submission methods, information about CBI, and general guidance on effective written submissions, please visit <https://www.epa.gov/dockets/commenting-epa-dockets>.

Dated: August 27, 2018.

Deborah G. Nagle,

Acting Director, Office of Science and Technology, Office of Water.
