

potential risk presented by this product, collect financial resources in proportion to such risk, and liquidate this product in the event of a CP default, all of which should help ensure ICC's ability to maintain the financial resources it needs to provide its critical services and function as a central counter party, thereby promoting the prompt and accurate settlement of EM Contracts and other credit default swap transactions. For the same reasons, the Commission believes that the rule change would help assure the safeguarding of securities or funds in the custody or control of ICC, and would be consistent with the protection of investors and the public interest.

Therefore, the Commission finds that acceptance of the additional EM Contract, on the terms and conditions set out in ICC's Rules, is consistent with the prompt and accurate clearance and settlement of securities transactions and derivative agreements, contracts, and transactions cleared by ICC, the safeguarding of securities and funds in the custody or control of ICC, and the protection of investors and the public interest, within the meaning of Section 17A(b)(3)(F) of the Act.¹²

IV. Conclusion

On the basis of the foregoing, the Commission finds that the proposed rule change is consistent with the requirements of the Act and in particular with the requirements of Section 17A of the Act,¹³ and the rules and regulations thereunder.

It is therefore ordered pursuant to Section 19(b)(2) of the Act¹⁴ that the proposed rule change (SR-ICC-2018-007) be, and hereby is, approved.¹⁵

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.¹⁶

Eduardo A. Aleman,
Assistant Secretary.

[FR Doc. 2018-20434 Filed 9-19-18; 8:45 am]

BILLING CODE 8011-01-P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34-84127; File No. SR-FINRA-2018-034]

Self-Regulatory Organizations; Financial Industry Regulatory Authority, Inc.; Notice of Filing and Immediate Effectiveness of a Proposed Rule Change To Amend Rule 2360 (Options) To Increase Position Limits on Options on Certain Exchange-Traded Funds

September 14, 2018.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")¹ and Rule 19b-4 thereunder,² notice is hereby given that on August 31, 2018, Financial Industry Regulatory Authority, Inc. ("FINRA") filed with the Securities and Exchange Commission ("SEC" or "Commission") the proposed rule change as described in Items I and II below, which Items have been prepared by FINRA. FINRA has designated the proposed rule change as constituting a "non-controversial" rule change under paragraph (f)(6) of Rule 19b-4 under the Act,³ which renders the proposal effective upon receipt of this filing by the Commission. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of the Substance of the Proposed Rule Change

FINRA is proposing to amend FINRA Rule 2360 (Options) to increase the

position limit for conventional options on the following exchange-traded funds ("ETF"): The Standard and Poor's Depository Receipts Trust ("SPY"), iShares Russell 2000 ETF ("IWM"), PowerShares QQQ Trust ("QQQ"), iShares MSCI Emerging Markets ETF ("EEM"), iShares China Large-Cap ETF ("FXI"), iShares MSCI EAFE ETF ("EFA"), iShares MSCI Brazil Capped ETF ("EWZ"), iShares 20+ Year Treasury Bond Fund ETF ("TLT"), and iShares MSCI Japan ETF ("EWJ").

Below is the text of the proposed rule change. Proposed new language is in italics; proposed deletions are in brackets.

* * * * *

2360. Options

(a) No Change.

(b) Requirements

(1) through (2) No Change.

(3) Position Limits

(A) Stock Options—

(i) through (ii) No Change.

(iii) Conventional Equity Options

a. For purposes of this paragraph (b), standardized equity option contracts of the put class and call class on the same side of the market overlying the same security shall not be aggregated with conventional equity option contracts or FLEX Equity Option contracts overlying the same security on the same side of the market. Conventional equity option contracts of the put class and call class on the same side of the market overlying the same security shall be subject to a position limit of:

1. through 5. No Change.

6. for selected conventional options on exchange-traded funds ("ETF"), the position limits are listed in the chart below:

Security underlying option	Position limit
The DIAMONDS Trust (DIA)	300,000 contracts.
The Standard and Poor's Depository Receipts Trust (SPY)	[900,000] 1,800,000 contracts.
The iShares Russell 2000 [Index Fund]ETF (IWM)	[500,000] 1,000,000 contracts.
The PowerShares QQQ Trust (QQQ[Q])	[900,000] 1,800,000 contracts.
The iShares MSCI Emerging Markets [Index Fund]ETF (EEM)	[500,000] 1,000,000 contracts.
iShares China Large-Cap ETF (FXI)	500,000 contracts.
iShares MSCI EAFE ETF (EFA)	500,000 contracts.
iShares MSCI Brazil Capped ETF (EWZ)	500,000 contracts.
iShares 20+ Year Treasury Bond Fund ETF (TLT)	500,000 contracts.
iShares MSCI Japan ETF (EWJ)	500,000 contracts.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, FINRA included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. FINRA has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

FINRA Rule 2360(b)(3)(A) imposes a position limit on the number of equity options contracts in each class on the same side of the market that can be held or written by a member, a person associated with a member, or a customer or a group of customers acting in concert. Position limits are intended to prevent the establishment of options positions that can be used to manipulate or disrupt the underlying market or might create incentives to manipulate or disrupt the underlying market so as to benefit the options position. In addition, position limits serve to reduce the potential for disruption of the options market itself, especially in illiquid options classes.⁴ This consideration has been balanced by the concern that the limits “not be established at levels that are so low as to discourage participation in the options market by institutions and other investors with substantial hedging needs or to prevent specialists and market makers from adequately meeting their obligations to maintain a fair and orderly market.”⁵

Rule 2360(b)(3)(A)(i) does not independently establish a position limit for standardized equity options. Rather, the position limit established by the rules of an options exchange for a

particular equity option is the applicable position limit for purposes of Rule 2360.⁶ Rule 2360(b)(3)(A)(iii) provides that conventional equity options are subject to a basic position limit of 25,000 contracts or a higher tier for conventional option contracts on securities that underlie exchange-traded options qualifying for such higher tier as determined by the rules of the options exchanges. In addition, FINRA lists position limits for options on securities that have higher position limits—currently, only the ETFs listed in Rule 2360(b)(3)(A)(iii)a.6.—that also generally mirror the options exchange position limits.⁷ At this time, FINRA proposes to conform to the options exchanges' recent amendments that increased (or in the case of SPY decreased from the pilot program) the position limit options on the following ETFs: SPY, IWM, QQQ, EEM, FXI, EFA, EWZ, TLT and EWJ.⁸

⁶ See e.g., CBOE Rule 4.11; ISE Rule 412; NASDAQ PHLX Rule 1001; NYSE American Rule 904; NYSE Arca Rule 6.8; MIAX Rule 307; BOX Rule 3120 and IM-3120-2; Nasdaq Chapter III, Section 7; BX Chapter III, Section 7; and BZX Rule 18.7.

⁷ The options exchanges have recently revised the position limit on SPY options to 1,800,000 contracts after expiration of a pilot program on July 12, 2018 that eliminated position limits on SPY options. FINRA retained its position for conventional options on SPY at 900,000 contracts. The proposed rule change proposes to increase the position limit on SPY to 1,800,000 consistent with the options exchanges updating the position limit on SPY to 1,800,000 contracts. See Securities Exchange Act Release No. 83349 (May 30, 2018), 83 FR 26123 (June 5, 2018) (Notice of Filing and Immediate Effectiveness of File No. SR-MIAX-2018-11). See also Securities Exchange Act Release No. 83412 (June 12, 2018), 83 FR 28298 (June 18, 2018) (Notice of Filing and Immediate Effectiveness of File No. SR-PHLX-2018-44); Securities Exchange Act Release No. 83414 (June 12, 2018), 83 FR 28296 (June 18, 2018) (Notice of Filing and Immediate Effectiveness of File No. SR-BOX-2018-22); Securities Exchange Act Release No. 83415 (June 12, 2018), 83 FR 28274 (June 18, 2018) (Notice of Filing and Immediate Effectiveness of File No. SR-CBOE-2018-042); Securities Exchange Act Release No. 83413 (June 12, 2018), 83 FR 28277 (June 18, 2018) (Notice of Filing and Immediate Effectiveness of File No. SR-NYSEArca-2018-44); and Securities Exchange Act Release No. 83417 (June 12, 2018), 83 FR 28279 (June 18, 2018) (Notice of Filing and Immediate Effectiveness of File No. SR-NYSEAMER-2018-26).

⁸ See note 7 for discussion regarding position limits for options on SPY. See also Securities Exchange Act Release No. 82770 (February 23, 2018), 83 FR 8907 (March 1, 2018) (Order Granting Accelerated Approval of File No. SR-CBOE-2017-057). See also Securities Exchange Act Release No. 82931 (March 22, 2018), 83 FR 13323 (March 28, 2018) (Notice of Filing and Immediate Effectiveness of File No. SR-MIAX-2018-10); Securities Exchange Act Release No. 82930 (March 22, 2018), 83 FR 13330 (March 28, 2018) (Notice of Filing and Immediate Effectiveness of File No. SR-BOX-2018-10); Securities Exchange Act Release No. 82932 (March 22, 2018), 83 FR 13316 (March 28, 2018) (Notice of Filing and Immediate Effectiveness of File No. SR-PHLX-2018-24); Securities Exchange Act Release No. 83066 (April 19, 2018), 83 FR

The proposed rule change would amend the table provided in Rule 2360(b)(3)(A)(iii)a.6. as follows:

- The position limits for options on SPY would be increased from 900,000 contracts to 1,800,000 contracts;
- The position limit for options on IWM would be increased from 500,000 contracts to 1,000,000 contracts;
- The position limit for options on QQQ would be increased from 900,000 contracts to 1,800,000 contracts; and
- The position limit for options on EEM would be increased from 500,000 contracts to 1,000,000 contracts.

In addition, the proposed rule change would add to the table provided in Rule 2360(b)(3)(A)(iii)a.6. as follows, with the effect of each ETF being increased from the current position limit of 250,000 contracts:

- The position limit for options on FXI would be increased to 500,000 contracts;
- The position limit for options on EFA would be increased to 500,000 contracts;
- The position limit for options on EWZ would be increased to 500,000 contracts;
- The position limit for options on TLT would be increased to 500,000 contracts; and
- The position limit for options on EWJ would be increased to 500,000 contracts.⁹

In support of the proposed rule change, as noted by Cboe, position limits are determined by the option exchange's requirements according to the number of outstanding shares and the trading volume of the underlying ETF over the past six months.¹⁰ The ETFs that underlie options subject to the proposed rule change are highly liquid, and are based on a broad set of highly liquid securities and other reference assets. The above listed ETFs are listed on various national securities exchanges and meet their listing standards.

FXI tracks the performance of the FTSE China 50 Index, which is composed of the 50 largest Chinese stocks.¹¹ EEM tracks the performance of

18099 (April 25, 2018) (Notice of Filing and Immediate Effectiveness of File No. SR-NYSEArca-2018-23) and Securities Exchange Act Release No. 83065 (April 19, 2018), 83 FR 18093 (April 25, 2018) (Notice of Filing and Immediate Effectiveness of File No. SR-NYSEAMER-2018-14).

⁹ The proposed rule filing would also make certain wording changes to the listing of the names of the ETFs and change in two places “Index Fund” to “ETF”. The proposed rule filing would also revise the symbol of The PowerShares QQQ Trust to “QQQ.”

¹⁰ See for example, Cboe Rule 4.11 Interpretations and Policies: .02.

⁴ See Securities Exchange Act Release No. 40969 (January 22, 1999), 64 FR 4911, 4912-4913 (February 1, 1999) (Order Approving File No. SR-CBOE-98-23) (citing H.R. No. IFC-3, 96th Cong., 1st Sess. at 189-91 (Comm. Print 1978)).

⁵ *Id.* at 4913.

the MSCI Emerging Markets Index, which is composed of approximately 800 component securities from emerging market countries from all over the world.¹² IWM tracks the performance of the Russell 2000 Index, which is composed of 2,000 small-cap domestic stocks.¹³ EFA tracks the performance of MSCI EAFE Index, which has over 900 component securities.¹⁴ The MSCI EAFE Index is designed to represent the performance of large and mid-cap securities across 21 developed markets, including countries

in Europe, Australia and the Far East, excluding the U.S. and Canada.¹⁵ EWZ tracks the performance of the MSCI Brazil 25/50 Index, which is composed of shares of large and mid-size companies in Brazil.¹⁶ TLT tracks the performance of ICE U.S. Treasury 20+ Year Bond Index, which is composed of long-term U.S. Treasury bonds.¹⁷ QQQ tracks the performance of the Nasdaq-100 Index, which is composed of 100 of the largest domestic and international non-financial companies listed on the Nasdaq Stock Market LLC (“Nasdaq”).¹⁸

EWJ tracks the MSCI Japan Index, which tracks the performance of large and mid-sized companies in Japan.¹⁹ SPY tracks the performance of the S&P 500® Index, which is an index of diversified large cap U.S. companies.²⁰

In support of this proposal, all trading and other statistics, except SPY which were compiled by FINRA, have been compiled by Cboe as of the dates provided by Cboe and provided in its proposed rule change to increase the applicable positions limits:²¹

ETF	2017 ADV (mil. shares)	2017 ADV (option contracts)	Shares outstanding (mil.)	Fund market cap. (\$mil.)
FXI	15.08	71,944	78.6	\$3,343.6
EEM	52.12	287,357	797.4	34,926.1
IWM	27.46	490,070	253.1	35,809.1
EFA	19.42	98,844	1178.4	78,870.3
EWZ	17.08	95,152	159.4	6,023.4
TLT	8.53	80,476	60.0	7,442.4
QQQ	26.25	579,404	351.6	50,359.7
EWJ	6.06	4,715	303.6	16,625.1
SPY	64.63	2,575,153	976.23	240,540.0

FINRA agrees as proposed by Cboe that the liquidity in the underlying ETFs, and the liquidity in the ETF options support its request to increase the position limits for the options subject to the proposed rule change. As to the underlying ETF shares, the average daily trading volume across all exchanges for the period of January 1 to July 31, 2017 was: (i) FXI—15.08 million shares; (ii) EEM—52.12 million shares; (iii) IWM—27.46 million shares; (iv) EFA—19.42 million shares; (v) EWZ—17.08 million shares; (vi) TLT—8.53 million shares; (vii) QQQ— 26.25 million shares; (viii) EWJ—6.06 million shares; and (ix) SPY—64.63 million shares.

In proposing the increased position limits, FINRA considered the availability of economically equivalent products and their respective position limits. For instance, some of the ETFs underlying options subject to this proposal are based on broad-based indices that underlie cash-settled options that are economically equivalent to the ETF options that are the subject of this proposal and have no position limits (NDX and SPX). Other ETFs are based on broad-based indexes that underlie cash-settled options with

position limits reflecting notional values that are larger than the current position limits for ETF analogues (EEM and EFA). Where there was no approved index analogue, FINRA believes, based on the liquidity, breadth and depth of the underlying market, that the index referenced by the ETF would be considered a broad-based index (example FXI and EWJ).²² FINRA believes that if certain position limits are appropriate for the options overlying the same index, or an analogue to the basket of securities that the ETF tracks, then those same economically equivalent position limits should be appropriate for the option overlying the ETF. In addition, the market capitalization of the underlying index or reference asset is large enough to absorb any price movements that may be caused by an oversized trade. Also, the issuer may look to the stocks comprising the analogous underlying index or reference asset when seeking to create additional ETF shares which are part of the creation/redemption process to address supply and demand or to mitigate the price movement of the price of the ETF.

For example, the PowerShares QQQ Trust or QQQ is an ETF that tracks the Nasdaq 100 Index or NDX, which is an index composed of 100 of the largest non-financial securities listed on the Nasdaq Stock Market LLC (“Nasdaq”). Options on NDX are currently subject to no position limits but share similar trading characteristics as QQQ. Based on QQQ’s share price of \$154.5422 and NDX’s index level of 6,339.14, approximately 40 contracts of QQQ equals one contract of NDX. Assume that options on NDX are subject to the standard position limit of 25,000 contracts for broad-based index options under options exchange rules. Based on the above comparison of notional values, this would result in a position limit equivalent to 1,000,000 contracts for QQQ as NDX’s analogue. However, options on NDX are not subject to position limits and has an average daily trading volume of 15,300 contracts. Options on QQQ are currently subject to a position limit of 900,000 contracts but has a much higher average daily trading volume of 579,404 contracts. Furthermore, NDX currently has a market capitalization of \$17.2 trillion and QQQ has a market capitalization of

¹² See <https://www.ishares.com/us/products/239637/ishares-msci-emerging-markets-etf>.

¹⁴ See <https://www.ishares.com/us/products/239623/>.

¹⁵ See <https://www.msci.com/eafe>.

¹⁶ See <https://www.ishares.com/us/products/239612/ishares-msci-brazil-capped-etf>.

¹⁷ See <https://www.ishares.com/us/products/239454/>.

¹⁸ See <https://indexes.nasdaqomx.com/Index/Overview/NDX>.

¹⁹ See <https://www.ishares.com/us/products/239665/EWJ>.

²⁰ See <https://us.spdrs.com/en/etf/spdr-sp-500-etf-SPY>.

²¹ See note 8.

²² FINRA Rule 2360(b)(3)(B) establishes position limits for index options by incorporating by reference the position limit established by the options exchange on which the option trades. Options exchanges establish rules for index options based on the characteristic of the underlying index. See, e.g., Cboe Rule 24.4 and MIAX Rule 1804.

\$50,359.7 million, and the component securities of NDX, in aggregate, have traded an average of 440 million shares per day in 2017, both market capitalizations being large enough to absorb any price movement caused by a large trade in the QQQ. The Commission has also approved no position limit for options on NDX, although it has a much lower daily trading volume than its analogue, the QQQ. Therefore, FINRA believes it is reasonable to increase the position limit for options on QQQ from 900,000 to 1,800,000 contracts.

The SPDR® S&P 500® ETF Trust or SPY seeks to provide investment results that, before expenses, correspond generally to the price and yield performance of the S&P 500® Index or SPX, which is an index composed of 500 large-cap U.S. companies. Options on the SPX have no position limits and share similar trading characteristics as SPY. Based on SPY's price of \$263.15 and SPX's index level of 2640.87, approximately 10 contracts of SPY equals one contract of SPX.²³ Assume that options on SPX are subject to the standard position limit of 25,000 contracts for broad-based index options under options exchange rules. Based on the above comparison of notional values, this would result in a position limit equivalent to 250,000 contracts for options on SPY as SPX's analogue. However, options on SPX are not subject to position limits and has an average daily trading volume of 1,101,185 contracts.²⁴ Options on SPY were recently changed to a position limit of 1,800,000 contracts for standardized options, but is currently subject to a conventional option position limit of 900,000 contracts but has a much higher average daily trading volume of 2,575,153 contracts.²⁵ Furthermore, as of December 29, 2017, SPX had a market capitalization of \$23.9 trillion and SPY has a market capitalization of \$277.54 billion, large enough to absorb any price movement caused by a large trade in the SPY. The Commission has also approved no position limit for options on SPX, although it has a much lower daily trading volume than its analogue, the SPY, for which the exchanges recently changed the position limit to 1,800,000 contracts. Therefore, FINRA believes it is reasonable to increase the position limits for options on SPY from 900,000 to 1,800,000 contracts.

The iShares Russell 2000 ETF or IWM, is an ETF that also tracks the

Russell 2000 index or RUT, which is an index composed of 2,000 small-cap domestic companies in the Russell 2000 index. Options on RUT are currently subject to no position limits but share similar trading characteristics as IWM. Based on IWM's share price of \$144.77 and RUT's index level of 1,486.88, approximately 10 contracts of IWM equals one contract of RUT. Assume that options on RUT are subject to the standard position limit of 25,000 contracts for broad-based index options under options exchange rules. Based on the above comparison of notional values, this would result in a position limit equivalent to 250,000 contracts for options on IWM as RUT's analogue. However, options on RUT are not subject to position limits and has an average daily trading volume of 66,200 contracts. Options on IWM are currently subject to a position limit of 500,000 contracts but has a much higher average daily trading volume of 490,070 contracts. The Commission has approved no position limit for options on RUT, although it has a much lower average daily trading volume than its analogue, the IWM. Furthermore, RUT currently has a market capitalization of \$2.4 trillion and IWM has a market capitalization of \$35,809.1 million, and the component securities of RUT, in aggregate, have traded an average of 270 million shares per day in 2017, both large enough to absorb any price movement caused by a large trade in the IWM. Therefore, FINRA believes it is reasonable to increase the position limit for options on IWM from 500,000 to 1,000,000 contracts.

EEM tracks the performance of the MSCI Emerging Markets Index or MXEF, which is composed of approximately 800 component securities from emerging market countries from all over the world. Below makes the same notional value comparisons as made above. Based on EEM's share price of \$47.06 and MXEF's index level of 1,136.45, approximately 24 contracts of EEM equals one contract of MXEF. Assume that options on MXEF are subject to the standard position limit of 25,000 contracts for broad-based index options under options exchange rules. Based on the above comparison of notional values, this would result in a position limit economically equivalent to 604,000 contracts for options on EEM as MXEF's analogue. However, MXEF has an average daily trading volume of 180 contracts. Options on EEM is currently subject to a position limit of 500,000 contracts but has a much higher average daily trading volume of 287,357 contracts. Furthermore, MXEF currently

has a market capitalization of \$5.18 trillion and EEM has a market capitalization of \$34,926.1 million, and the component securities of MXEF, in aggregate, have traded an average of 33.6 billion shares per day in 2017, both large enough to absorb any price movement caused by a large trade in the EEM. Therefore, based on the comparison of average daily trading volume, FINRA believes it is reasonable to increase the position limit for options on EEM from 500,000 to 1,000,000 contracts.

EFA tracks the performance of the MSCI EAFE Index or MXEA, which has over 900 component securities designed to represent the performance of large and mid-cap securities across 21 developed markets, including countries in Europe, Australia and the Far East, excluding the U.S. and Canada. Below makes the same notional value comparison as made above. Based on EFA's share price of \$69.16 and MXEA's index level of 1,986.15, approximately 29 contracts of EFA equals one contract of MXEA. Assume options on MXEA are subject to the standard position limit of 25,000 contracts for broad-based index options under options exchange rules. Based on the above comparison of notional values, this would result in a position limit economically equivalent to 721,000 contracts for EFA as MXEA's analogue. Furthermore, MXEA currently has a market capitalization of \$18.7 trillion and EFA has a market capitalization of \$78,870.3 million, and the component securities of MXEA, in aggregate, have traded an average of 4.6 billion shares per day in 2017, both large enough to absorb any price movement caused by a large trade in EFA. However, MXEA has an average daily trading volume of 270 contracts. Options on EFA is currently subject to a position limit of 250,000 contracts but has a much higher average daily trading volume of 98,844 contracts. Based on the above comparisons, FINRA believes it is reasonable to increase the position limit for options on EFA from 250,000 to 500,000 contracts.

FXI tracks the performance of the FTSE China 50 Index, which is composed of the 50 largest Chinese stocks. There is currently no index analogue for FXI approved for options trading. Options on FXI are currently subject to a position limit of 250,000 contracts but has a much higher average daily trading volume of 15.08 million shares. However, the FTSE China 50 Index currently has a market capitalization of \$1.7 trillion and FXI has a market capitalization of \$2,623.18 million, both large enough to absorb any price movement caused by a large trade

²³ As of March 29, 2018.

²⁴ As of July 31, 2017.

²⁵ See note 7.

in FXI. The components of the FTSE China 50 Index, in aggregate, have an average daily trading volume of 2.3 billion shares. Based on the above comparisons, FINRA believes it is reasonable to increase the position limit for options on FXI from 250,000 to 500,000 contracts.

EWZ tracks the performance of the MSCI Brazil 25/50 Index, which is composed of shares of large and mid-size companies in Brazil. There is currently no index analogue for EWZ approved for options trading. Options on EWZ are currently subject to a position limit of 250,000 contracts but the ETF has a much higher average daily trading volume of 17.08 million shares. However, the MSCI Brazil 25/50 Index currently has a market capitalization of \$700 billion and EWZ has a market capitalization of \$6,023.4 million, both large enough to absorb any price movement caused by a large trade in EWZ. The components of the MSCI Brazil 25/50 Index, in aggregate, have an average daily trading volume of 285 million shares. Based on the above comparisons, FINRA believes it is reasonable to increase the position limit for options on EWZ from 250,000 to 500,000 contracts.

TLT tracks the performance of the ICE U.S. Treasury 20+ Year Bond Index, which is composed of long-term U.S. Treasury bonds. There is currently no index analogue for TLT approved for options trading. However, the U.S. Treasury market is one of the largest and most liquid markets in the world, with over \$14 trillion outstanding and turnover of approximately \$500 billion per day. TLT currently has a market capitalization of \$7,442.4 million, both large enough to absorb any price movement caused by a large trade in TLT. Therefore, any potential for manipulation will not increase solely due to the increase in position limits as set forth in this proposal. Based on the above comparisons, FINRA believes it is reasonable to increase the position limit for options on TLT from 250,000 to 500,000 contracts.

EWJ tracks the MSCI Japan Index, which tracks the performance of large and mid-sized companies in Japan. There is currently no index analogue for EWJ approved for options trading. However, the MSCI Japan Index has a market capitalization of \$3.5 trillion and EWJ has a market capitalization of \$16,625.1 million, and the component securities of the MSCI Japan Index, in aggregate, have traded an average of 1.1 billion shares per day in 2017, both large enough to absorb any price movement caused by a large trade in EWJ. Options on EWJ is currently

subject to a position limit of 250,000 contracts and has an average daily trading volume of 6.6 million shares. Based on the above comparisons, FINRA believes it is reasonable to increase the position limit for options on EWJ from 250,000 to 500,000 contracts.

FINRA believes that increasing the position limits for the conventional options subject to the proposed rule change would lead to a more liquid and competitive market environment for these options, which will benefit customers interested in these products.

Surveillance and Reporting

Further, FINRA believes that the increased position limits provisions are appropriate in light of the existing surveillance procedures and reporting requirements at FINRA,²⁶ the options exchanges, and at the several clearing firms, which are capable of properly identifying unusual or illegal trading activity. These procedures use daily monitoring of market movements by automated surveillance techniques to identify unusual activity in both options and underlying stocks.²⁷

In addition, large stock holdings must be disclosed to the Commission by way of Schedules 13D or 13G.²⁸ Options positions are part of any reportable positions and cannot legally be hidden. Moreover, the previously noted Rule 2360(b)(5) requirement that members must file reports with FINRA for any customer that held aggregate large long or short positions of any single class for the previous day will continue to serve as an important part of FINRA's surveillance efforts.

Finally, FINRA believes that the current financial requirements imposed by FINRA and by the Commission adequately address financial responsibility concerns that a member or its customer will maintain an inordinately large unhedged position in any option with a higher position limit. Current margin and risk-based haircut methodologies serve to limit the size of positions maintained by any one account by increasing the margin or capital that a member must maintain for a large position. Under Rule 4210(f)(8)(A), FINRA also may impose a higher margin requirement upon a member when FINRA determines a higher requirement is warranted. In addition, the Commission's net capital rule²⁹ imposes a capital charge on

members to the extent of any margin deficiency resulting from the higher margin requirement.

FINRA has filed the proposed rule change for immediate effectiveness and has requested that the SEC waive the requirement that the proposed rule change not become operative for 30 days after the date of the filing, so FINRA can implement the proposed rule change immediately.

2. Statutory Basis

FINRA believes that the proposed rule change is consistent with the provisions of Section 15A(b)(6) of the Act,³⁰ which requires, among other things, that FINRA rules must be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, and, in general, to protect investors and the public interest. FINRA believes that the proposed rule change promotes consistent regulation by harmonizing position limits with those of the other self-regulatory organizations. FINRA further believes that increasing the position limit on conventional options promotes consistent regulation by harmonizing the position limit with its standardized counterpart. In addition, FINRA believes the proposed rule change will be beneficial to large market makers and institutions (which generally have the greatest ability to provide liquidity and depth in products that may be subject to higher position limits as has been the case with recently approved increased position limits),³¹ as well as retail traders and public customers, by providing them with a more effective trading and hedging vehicle. In addition, FINRA believes that the structure of the options subject to the proposed rule change and the considerable liquidity of the market for those options diminishes the opportunity to manipulate these products and disrupt the underlying market that a lower position limit may protect against.

Increased position limits for select actively traded options, such as those proposed herein, is not novel and has been previously approved by the Commission. For example, the Commission has previously approved a position limit of 1,800,000 contracts on options on SPY.³² Additionally, the Commission has approved similar proposed rule changes by the options exchanges to increase position and exercise limits for options on highly

²⁶ See Rule 2360(b)(5) for the options reporting requirements.

²⁷ These procedures have been effective for the surveillance of options trading and will continue to be employed.

³¹ See note 8.

³² See note 7.

liquid, actively-traded ETFs,³³ including a proposal to permanently eliminate the position and exercise limits for options overlaying the S&P 500 Index, S&P 100 Index, Dow Jones Industrial Average, and Nasdaq 100 Index.³⁴ In approving the permanent elimination of position and exercise limits, the Commission relied heavily upon surveillance capabilities, and the Commission expressed trust in the enhanced surveillance and reporting safeguards in order to detect and deter possible manipulative behavior, which might arise from eliminating position and exercise limits.³⁵ Furthermore, as described more fully above, options on other ETFs have the position limits proposed herein, but their trading volumes are significantly lower than the ETFs subject to the proposed rule change.

Furthermore, the proposed position limits would continue to address potential manipulative activity while allowing for potential hedging activity for appropriate economic purposes. The creation and redemption process for these ETFs also lessens the potential for manipulative activity. When an ETF company wants to create more ETF shares, it looks to an Authorized Participant, which is a market maker or other large financial institution, to acquire the securities the ETF is to hold. For instance, IWM is designed to track the performance of the Russell 2000 Index. The Authorized Participant will purchase all the Russell 2000 constituent securities in the exact same weight as the index, then deliver those

shares to the ETF provider. In exchange, the ETF provider gives the Authorized Participant a block of equally valued ETF shares, on a one-for-one fair value basis. The price is based on the net asset value, not the market value at which the ETF is trading. The creation of new ETF units can be conducted all trading day and is not subject to position limits. This process can also work in reverse where the ETF company seeks to decrease the number of shares that are available to trade. The creation and redemption process, therefore, creates a direct link to the underlying components of the ETF, and serves to mitigate potential price impact of the ETF shares that might otherwise result from increased position limits.

The ETF creation and redemption process keeps ETF share prices trading in line with the ETF's underlying net asset value. Because an ETF trades like a stock, its price will fluctuate during the trading day, due to simple supply and demand. If demand to buy an ETF is high, for instance, the ETF's share price might rise above the value of its underlying securities. When this happens, an Authorized Participant can arbitrage this difference by buying the underlying shares that compose the ETF and then selling the ETF shares on the open market. This drives the ETF's share price back toward fair value. Likewise, if the ETF starts trading at a discount to the securities it holds, the Authorized Participant can buy shares of the ETF and redeem them for the underlying securities. Buying undervalued ETF shares drives the price of the ETF back toward fair value. This arbitrage process helps to keep an ETF's price in line with the value of its underlying portfolio.

Lastly, the Commission expressed the belief that removing position and exercise limits may bring additional depth and liquidity without increasing concerns regarding intermarket manipulation or disruption of the options or the underlying securities.³⁶ FINRA's existing surveillance and reporting safeguards are designed to deter and detect possible manipulative behavior, which might arise from eliminating position and exercise limits.

B. Self-Regulatory Organization's Statement on Burden on Competition

FINRA does not believe that the proposed rule change will result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

Economic Impact Analysis

FINRA has undertaken an economic impact assessment, as set forth below, to analyze the potential economic impacts, including anticipated costs, benefits, and distributional and competitive effects transfers of wealth, relative to the current baseline, and the alternatives FINRA considered in assessing how to best meet its regulatory objectives.

Regulatory Objective

FINRA is proposing to amend Rule 2360 to harmonize FINRA's position limits for conventional options with the position limit for standardized options.³⁷

Economic Baseline

Per FINRA Rule 2360(b)(30)(A)(iii) conventional equity options are subject to a basic position limit of 25,000 contracts or higher for conventional option contracts on securities that underlie exchange-traded options qualifying for a higher tier as determined by option exchange rules. The existing position limits for conventional options on ETFs are: 900,000 contracts for SPY or QQQ, 500,000 contracts for IWM or EEM, and 250,000 contracts for FXI, EFA, EWZ, TLT, or EWJ. Option exchanges have recently increased (or in the case of SPY decreased from the pilot program) position limit options on several ETFs such as SPY, IWM, QQQ, EEM, FXI, EFA, EWZ, TLT, and EWJ.

Economic Impact

Benefits

As noted above, the proposed rule change would amend Rule 2360 to harmonize FINRA's position limits for conventional options with the position limit for standardized options.³⁸ For investors that short conventional equity options or buy them long, there is likely to be a natural size for an executed order that minimizes fixed and variable transaction costs, including but not limited to the bid-ask spread, price impact, and transaction fees. If the existing position limits for conventional equity options on select ETFs constrains the order size such that fixed and variable transaction costs are higher than optimal, then investors may benefit if the new position limit is no less than the natural size. In such an event, the cost to hedge an ETF would decline, thereby making it less costly to manage downside risk.

In addition, if the existing position limits serve as a constraint, then an

³³ See Securities Exchange Act Release No. 68086 (October 23, 2012), 77 FR 65600 (October 29, 2012) (Order Approving File No. SR-CBOE-2012-66); Securities Exchange Act Release No. 68478 (December 19, 2012), 77 FR 76132 (December 26, 2012) (Notice of Filing and Immediate Effectiveness of File No. SR-BOX-2012-23); Securities Exchange Act Release No. 68398 (December 11, 2012), 77 FR 74700 (December 17, 2012) (Notice of Filing and Immediate Effectiveness of File No. SR-ISE-2012-93); Securities Exchange Act Release No. 68293 (November 27, 2012), 77 FR 71644 (December 3, 2012) (Notice of Filing and Immediate Effectiveness of File No. SR-Phlx-2012-132); Securities Exchange Act Release No. 68358 (December 5, 2012), 77 FR 73708 (December 11, 2012) (Notice of Filing and Immediate Effectiveness of File No. SR-NYSE MKT-2012-71); Securities Exchange Act Release No. 68359 (December 5, 2012), 77 FR 73716 (December 11, 2012) (Notice of Filing and Immediate Effectiveness of File No. SR-NYSE Arca-2012-132) and Securities Exchange Act Release No. 69457 (April 25, 2013), 78 FR 25502 (May 1, 2013) (Notice of Filing and Immediate Effectiveness of File No. SR-MAX-2013-17).

³⁴ See Securities Exchange Act Release No. 44994 (October 26, 2001), 66 FR 55722 (November 2, 2001) (Order Approving File No. SR-CBOE-2001-22) and Securities Exchange Act Release No. 52650 (October 21, 2005), 70 FR 62147 (October 28, 2005) (Order Approving File No. SR-CBOE-2005-41) ("NDX Approval").

³⁵ See NDX Approval at 62149.

³⁶ See NDX Approval at 62149.

³⁷ See note 8.

³⁸ See note 8.

increase in the position limit for conventional options on select ETFs would permit investors to more easily find a counterparty. If the number of counterparties increases, then the cost of hedging should decline as the half-spread narrows, thereby making it less expensive to manage downside risk.

The extent of the constraint imposed by the current limit on conventional options is related to the ability of an investor to achieve similar economic exposure through other means. If there are other securities, such as an option on a closely related index, that exist and provide similar economic exposure less expensively, then the value of lessening the position limit on conventional options on ETFs is lower. Members may rely on information and data feeds from the Options Clearing Corporation to assist in their monitoring position limits. Because position limits on the standardized and conventional side have traditionally been consistent, members have relied on this feed for both standardized and conventional options. If the position limits between standardized and conventional options are conformed, then the cost from monitoring position limits should decline for member firms.

Cost

The proposed rule change may impose limited operational cost on member firms that trade conventional options on ETFs, as these same firms would need to revise position limits that are used in trading systems. However, the proposed rule change should not impose additional costs, because it is difficult to disrupt or manipulate the underlying market, create an incentive to disrupt or manipulate the underlying market for the purpose of profiting from the options position, or disrupt or manipulate the options market for conventional options on ETFs affected by this proposed rule. ETFs that underlie options subject to the proposed rule change are highly liquid, and are based on a broad set of highly liquid securities, which makes the market difficult to manipulate or disrupt. In fact, options on certain broad-based security indexes have no position limits. Furthermore, the creation and redemption process for these ETFs reduces the potential for disruptive or manipulative activity. New ETF units may be created at any time during the trading day and are not subject to position limits. Consequently, there is a direct link between the underlying components of the ETF and the ETF, which keeps ETF share prices trading in line with the ETF's underlying net asset value.

Alternatives

No further alternatives are under consideration.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Written comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Because the foregoing proposed rule change does not: (i) Significantly affect the protection of investors or the public interest; (ii) impose any significant burden on competition; and (iii) become operative for 30 days after the date of the filing, or such shorter time as the Commission may designate if consistent with the protection of investors and the public interest, it has become effective pursuant to Section 19(b)(3)(A) of the Act³⁹ and Rule 19b-4(f)(6)⁴⁰ thereunder.

FINRA has asked the Commission to waive the 30-day operative delay so that FINRA may immediately harmonize position limits with those of other self-regulatory organizations to ensure consistent regulation. For this reason, the Commission believes that waiving the 30-day operative delay is consistent with the protection of investors and the public interest. Therefore, the Commission hereby waives the operative delay and designates the proposal operative upon filing.⁴¹

At any time within 60 days of the filing of the proposed rule change, the Commission summarily may temporarily suspend such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act. If the Commission takes such action, the Commission shall institute proceedings to determine whether the proposed rule should be approved or disapproved.

³⁹ 15 U.S.C. 78s(b)(3)(A).

⁴⁰ 17 CFR 240.19b-4(f)(6). In addition, Rule 19b-4(f)(6)(iii) requires a self-regulatory organization to give the Commission written notice of its intent to file the proposed rule change, along with a brief description and the text of the proposed rule change, at least five business days prior to the date of filing of the proposed rule change, or such shorter time as designated by the Commission. FINRA has satisfied this requirement.

⁴¹ For purposes only of waiving the 30-day operative delay, the Commission has also considered the proposed rule's impact on efficiency, competition, and capital formation. See 15 U.S.C. 78c(f).

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing, including whether the proposed rule change is consistent with the Act. Comments may be submitted by any of the following methods:

Electronic Comments

- Use the Commission's internet comment form (<http://www.sec.gov/rules/sro.shtml>); or
- Send an email to rule-comments@sec.gov. Please include File Number SR-FINRA-2018-034 on the subject line.

Paper Comments

- Send paper comments in triplicate to Secretary, Securities and Exchange Commission, 100 F Street NE, Washington, DC 20549-1090.

All submissions should refer to File Number SR-FINRA-2018-034. This file number should be included on the subject line if email is used. To help the Commission process and review your comments more efficiently, please use only one method. The Commission will post all comments on the Commission's internet website (<http://www.sec.gov/rules/sro.shtml>). Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for website viewing and printing in the Commission's Public Reference Room, 100 F Street NE, Washington, DC 20549 on official business days between the hours of 10:00 a.m. and 3:00 p.m. Copies of such filing also will be available for inspection and copying at the principal office of FINRA. All comments received will be posted without change. Persons submitting comments are cautioned that we do not redact or edit personal identifying information from comment submissions. You should submit only information that you wish to make available publicly. All submissions should refer to File Number SR-FINRA-2018-034, and should be submitted on or before October 11, 2018.

⁴² 17 CFR 200.30-3(a)(12).

For the Commission, by the Division of Trading and Markets, pursuant to delegated authority.⁴²

Eduardo A. Aleman,
Assistant Secretary.

SMALL BUSINESS ADMINISTRATION

[Disaster Declaration #15690 and #15691; ALASKA Disaster Number AK–00039]

Presidential Declaration of a Major Disaster for Public Assistance Only for the State of ALASKA

AGENCY: U.S. Small Business Administration.

ACTION: Notice.

SUMMARY: This is a Notice of the Presidential declaration of a major disaster for Public Assistance Only for the State of ALASKA (FEMA–4391–DR), dated 09/05/2018.

Incident: Flooding.

Incident Period: 05/11/2018 through 05/13/2018.

DATES: Issued on 09/05/2018.

Physical Loan Application Deadline Date: 11/05/2018.

Economic Injury (EIDL) Loan Application Deadline Date: 06/05/2019.

ADDRESSES: Submit completed loan applications to: U.S. Small Business Administration, Processing and Disbursement Center, 14925 Kingsport Road, Fort Worth, TX 76155.

FOR FURTHER INFORMATION CONTACT: A. Escobar, Office of Disaster Assistance, U.S. Small Business Administration, 409 3rd Street SW, Suite 6050, Washington, DC 20416, (202) 205–6734.

SUPPLEMENTARY INFORMATION: Notice is hereby given that as a result of the President’s major disaster declaration on 09/05/2018, Private Non-Profit organizations that provide essential services of a governmental nature may file disaster loan applications at the address listed above or other locally announced locations.

The following areas have been determined to be adversely affected by the disaster:

Primary Counties: Matanuska-Susitna Borough.

The Interest Rates are:

	Percent
<i>For Physical Damage:</i>	
Non-Profit Organizations with Credit Available Elsewhere ...	2.500
Non-Profit Organizations without Credit Available Elsewhere	2.500

	Percent
<i>For Economic Injury:</i>	
Non-Profit Organizations without Credit Available Elsewhere	2.500

The number assigned to this disaster for physical damage is 156906 and for economic injury is 156910.

(Catalog of Federal Domestic Assistance Number 59008)

James Rivera,
Associate Administrator for Disaster Assistance.

BILLING CODE 8025–01–P

SMALL BUSINESS ADMINISTRATION

Audit and Financial Management Advisory Committee (AFMAC)

AGENCY: U.S. Small Business Administration.

ACTION: Notice of open Federal Advisory committee meeting.

SUMMARY: The SBA is issuing this notice to announce the location, date, time and agenda for the next meeting of the Audit and Financial Management Advisory Committee (AFMAC). The meeting will be open to the public.

DATES: The meeting will be held on Wednesday, October 31, 2018, starting at 2:00 p.m. until approximately 4:00 p.m. Eastern time.

ADDRESSES: The meeting will be held at the U.S. Small Business Administration, 409 3rd Street SW, Office of Performance Management and Chief Financial Officer Conference Room, 6th Floor, Washington, DC 20416.

FOR FURTHER INFORMATION CONTACT: The meeting is open to the public; however advance notice of attendance is requested. Anyone wishing to attend and/or make a presentation to the AFMAC must contact Tim Gribben by fax or email, in order to be placed on the agenda. Tim Gribben, Chief Financial Officer, 409 3rd Street SW, 6th Floor, Washington, DC 20416, phone (202) 205–6449; fax: (202) 481–0546; email: timothy.gribben@sba.gov.

Additionally, if you need accommodations because of a disability or require additional information, please contact Donna Wood at (202) 619–1608; email Donna.Wood@sba.gov; SBA Office of Performance Management & Chief Financial Officer, 409 3rd Street SW, Washington, DC 20416. For more information, please visit www.sba.gov/about-sba/sba-performance.

SUPPLEMENTARY INFORMATION: Pursuant to section 10(a)(2) of the Federal

Advisory Committee Act (5 U.S.C., Appendix 2), SBA announces the meeting of the AFMAC. The AFMAC is tasked with providing recommendation and advice regarding the Agency’s financial management, including the financial reporting process, systems of internal controls, and audit process and process for monitoring compliance with relevant law and regulations.

The purpose of the meeting is to discuss the SBA’s Financial Reporting, Audit Findings Remediation, Ongoing OIG Audits including the Information Technology Audit, FMFIA Assurance/A–123 Internal Control Program, Credit Modeling, Performance Management, Acquisition Division Update, Improper Payments and current initiatives.

Timothy Gribben,
Chief Financial Officer and Associate Administrator, Office of Performance Management and Chief Financial Officer.
