## II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB’s approval for the information collection summarized below.

1. *The title of the information collection:* Cooperation With States at Commercial Nuclear Power Plants and Other Nuclear Production and Utilization Facilities, Policy Statement.
2. *OMB approval number:* 3150–0163.
3. *Type of submission:* Revision.
4. *The form number, if applicable:* Not applicable.
5. *How often the collection is required or requested:* On occasion, when a State or federally recognized Indian Tribe wishes to observe NRC inspections or perform inspections for the NRC or when a State or federally recognized Indian Tribe wishes to negotiate an agreement to observe or perform inspections. States with an instrument of cooperation or a State Resident Engineer have both regular reporting and occasion-specific reporting.
6. *Who will be required or asked to respond:* States and federally recognized Tribes interested in observing or performing inspections.
7. *The estimated number of annual responses:* 209.
8. *The estimated number of annual respondents:* 33.
9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 1,309 hours.
10. *Abstract:* States and federally recognized Indian Tribes are involved and interested in monitoring the safety status of nuclear power plants and other nuclear production and utilization facilities. This involvement is, in part, in response to the States’ and Tribes’ public health and safety responsibilities and, in part, in response to their citizens’ desire to become more knowledgeable about the safety of nuclear power plants and other nuclear production and utilization facilities. States and Tribes have identified NRC inspections as one possible source of knowledge for their personnel regarding NRC licensee activities, and the NRC, through the policy statement, “Cooperation with States at Commercial Nuclear Power Plants and Other Nuclear Production or Utilization Facilities” (57

FR 6462; February 25, 1992), has been amenable to accommodating States' and Tribes' needs in this regard. The NRC uses the information collected under this information collection requirement to allow States and federally recognized Indian Tribes to participate in or observe inspections at NRC-licensed facilities. The types of information collected include written requests identifying specific inspections States and Tribes wish to observe; identification-related information required for site access to NRC-licensed facilities; training and qualifications of State and Tribal personnel participating in inspections; information required to define inspection roles for States and Tribes; and information to coordinate NRC and State and Tribal inspections.

### III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility?
2. Is the estimate of the burden of the information collection accurate?
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated at Rockville, Maryland, this 21th day of September, 2018.

For the Nuclear Regulatory Commission.

### SUPPLEMENTARY INFORMATION:

#### I. Discussion

The NRC is issuing a revision to an existing guide in the NRC's "Regulatory Guide" series. This series was

developed to describe and make available to the public information regarding methods that are acceptable to the NRC staff for implementing specific parts of the agency's regulations, techniques that the NRC staff uses in evaluating specific issues or postulated events, and data that the NRC staff needs in its review of applications for permits and licenses.

Revision 4 of RG 1.160 was issued with a temporary identification of Draft Regulatory Guide, DG-1336. This revision of the guide addresses new issues identified since the guide was previously issued and updates the guidance by endorsing Revision 4F of NUMARC 93-01, "Industry Guideline for Monitoring the Effectiveness of Maintenance at Nuclear Power Plants." NUMARC 93-01, Revision 4F addresses the application of the Maintenance Rule (title 10 of the *Code of Federal Regulations* (CFR) section 50.65) to address the use of diverse and flexible coping strategies.

#### II. Additional Information

The NRC published a notice of the availability of DG-1336 in the **Federal Register** on June 28, 2018 (83 FR 30469) for a 30-day public comment period. The public comment period closed on July 30, 2018. Public comments on DG-1336 and the staff responses to the public comments are available under ADAMS under Accession No. ML18220B279.

#### III. Congressional Review Act

This RG is a rule as defined in the Congressional Review Act (5 U.S.C. 801-808). However, the Office of Management and Budget has not found it to be a major rule as defined in the Congressional Review Act.

#### IV. Backfitting and Issue Finality

This RG describes methods acceptable to the staff of the NRC for demonstrating compliance with the provisions of 10 CFR 50.65, "Requirements for Monitoring the Effectiveness of Maintenance at Nuclear Power Plants," of 10 CFR part 50, "Domestic Licensing of Production and Utilization Facilities." Issuance of this RG does not constitute backfitting as defined in 10 CFR 50.109 (the Backfit Rule) and is not otherwise inconsistent with the issue finality provisions in 10 CFR part 52. As discussed in the "Implementation" section of this RG, the NRC has no current intention to impose this guidance on holders of current operating licenses or combined licenses.

This RG may be applied to applications for amendments to operating licenses or combined licenses
