

in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit <http://www.epa.gov/dockets>.

Pursuant to section 3506(c)(2)(A) of the PRA, EPA is soliciting comments and information to enable it to: (i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility; (ii) evaluate the accuracy of the Agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (iii) enhance the quality, utility, and clarity of the information to be collected; and (iv) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses. Burden is defined at 5 CFR 1320.03(b). EPA will consider the comments received and amend the ICR as appropriate. The final ICR package will then be submitted to OMB for review and approval. At that time, EPA will issue another **Federal Register** notice to announce the submission of the ICR to OMB and the opportunity to submit additional comments to OMB.

Abstract: The NESHAP for Industrial, Commercial, and Institutional Boilers Area Sources (40 CFR part 63, subpart JJJJJ) affects new and existing industrial, commercial, and institutional boilers that are located at or part of area sources of hazardous air pollutants (HAP). The standard contains six subcategories: existing boilers designed to burn biomass, coal, or liquid fuels and new boilers designed to burn biomass, coal, or liquid fuels. The information collection activities include initial and annual stack tests, fuel analyses, operating parameter monitoring, biennial tune-ups, one-time energy audits, one-time and periodic reports, and maintenance of records. Varying levels of requirements apply to each subcategory. The information collection activities will enable EPA to determine initial and continuous compliance with emission standards for regulated pollutants, and ensure that

facilities conduct proper planning, operation, and unit maintenance. The provisions of Section 114(a)(1) of the Clean Air Act, 42 U.S.C. Section 7414(a)(1) provide the broad authority for the reporting of compliance monitoring and enforcement information, along with Subpart Q-Reports in 40 CFR 51: Sections 51.324(a) and (b), and 51.327.

Respondents: Owners and operators of industrial, commercial, or institutional boilers.

Respondent's obligation to respond: Mandatory (40 CFR 63, Subpart JJJJJ).

Estimated number of respondents: 96,985 (total).

Frequency of response: Initially, biennially, semiannually and annually.

Annual estimated burden: 1,656,984 hours.

Annual estimated cost: \$280.4 million, includes \$125.5 million annualized capital or operation and maintenance (O&M) costs.

Changes in Estimates: There is a projected increase in burden due to continued growth rates for certain subcategories of equipment subject to the standard.

Director, Regulatory Support Division.
