Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

In compliance with Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995 concerning opportunity for public comment on proposed collections of information, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish periodic summaries of proposed projects. To request more information on the proposed project or to obtain a copy of the information collection plans, call the SAMHSA Reports Clearance Officer on (240) 276-1243.

Comments are invited on: (a) Whether the proposed collections of information are necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Proposed Project: State Opioid Response (SOR) and Tribal Opioid Response (TOR) Program Data Collection and Performance Measurement—NEW

The Substance Abuse and Mental Health Services Administration's (SAMHSA) Center for Substance Abuse Treatment (CSAT) is requesting approval from the Office of Management and Budget (OMB) for data collection activities associated with the State Opioid Response (SOR) and Tribal Opioid Response (TOR) discretionary grant programs. Approval of this information collection will allow SAMHSA to continue to meet the Government Performance and Results Modernization Act of 2010 (GPRMA) reporting requirements that quantify the effects and accomplishments of its discretionary grant programs which are consistent with OMB guidance. Information collected through this request will be used to monitor performance throughout the grant period.

There will be up to 359 award recipients (states, territories, and tribal entities) in these grant programs. Grantee-level data will include information related to naloxone purchases and distribution. This grantee-level information will be collected quarterly.

All funded states/territories and tribal entities will also be required to collect and report client-level data on individuals who are receiving opioid treatment services to ensure program goals and objectives are being met. Client-level data will include information such as: Demographic information, services planned/received, mental health/substance use disorder diagnoses, medical status, employment status, substance use, legal status, and psychiatric status/symptoms. Client-level data will be collected at intake/baseline, three months post intake, six months post intake, and at discharge.

CSAT anticipates that the time required to collect and report the grantee-level data is approximately 10 minutes per response, and the time required to collect and report the client-level data is approximately 47 minutes per response. CSAT's estimate of the burden associated with the client-level instrument includes an adjustment for data elements that are currently being collected by entities that are likely to be funded by the SOR/TOR grant programs.
