SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for extension of a currently approved information collection.

Amendment 80 to the Fishery Management Plan for Groundfish of the Bering Sea and Aleutian Islands Management Area allocates several Bering Sea and Aleutian Islands Management Area non-pollock trawl groundfish fisheries among trawl fishery sectors, established a limited access privilege program, and facilitated the formation of harvesting cooperatives in the non-American Fisheries Act (non-AFA) trawl catcher/processor sector.

The Amendment 80 Program encourages the formation of cooperatives and cooperative fishing practices among all persons holding Amendment 80 quota share (QS)

permits. The cooperatives that receive allocations of cooperative quota (CQ) allow vessel operators to make operational choices to improve fishery returns, reduce prohibited species catch usage, and reduce fish discards.

This information collection is necessary to manage participation in the Amendment 80 Program. This collection contains applications used by persons to apply for QS, to apply for an Amendment 80 limited access fishery permit, and to transfer QS; by cooperatives to apply for CQ and transfer CQ; by cooperatives or CDQ groups to exchange CQ for one eligible flatfish species with CQ of a different eligible flatfish species; and by Amendment 80 vessel owners to replace their vessels. Additionally, this collection includes the process used to appeal an application that is denied.

II. Method of Collection

The applications are available as fillable PDFs on the NMFS Alaska Region website at <https://alaskafisheries.noaa.gov/fisheries-applications> that may be downloaded, printed, and faxed or mailed to NMFS. The Flatfish Exchange Application must be submitted online through eFISH on the NMFS Alaska Region website at <https://alaskafisheries.noaa.gov/webapps/efish/login>. The Application for Inter-cooperative Transfer of Amendment 80 CQ is submitted to NMFS through eFISH with the option to mail, fax, or deliver the application. The appeals letter must be submitted by mail or delivery. All other elements of this collection may be submitted to NMFS by mail, fax, or delivery.

SUPPLEMENTARY INFORMATION: The subject permit is requested under the authority of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*) and the regulations governing the taking, importing, and exporting of endangered and threatened species (50 CFR parts 222-226).

The applicant requests a 10-year permit to conduct research on sea turtles in the Northwest Atlantic Ocean in its coastal and estuarine environments from North Carolina to Maine and international waters. The objectives of the research are to (1) identify sea turtle stocks and breeding population origins for juvenile through adult life stages, (2) improve knowledge of sea turtle life history, vital rates, and sex ratios, (3) identify important marine habitats, (4) estimate sea turtle distribution and abundance, (5) assess anthropogenic impacts to sea turtles, and (6) provide data to assist in agency mitigation and monitoring efforts. Researchers request 100 takes of each species and 75 unidentified sea turtles annually for harassment during aerial (manned and unmanned) and vessel surveys for sighting, counting, and monitoring animals and methods that do not result in capture—remote scanning for PIT tags, remote suction cup tagging, observation, photography, photogrammetry, and tracking. Researchers request to capture (by hand, dip net, cast net, encirclement net, hoop net or seine) or obtain from other legal

sources up to 74 green, 90 Kemp's ridley, 72 leatherback, one unidentified, and 115 loggerhead sea turtles annually for study; each animal may be recaptured two times a year for monitoring and removing gear. These animals may be observed via manned and unmanned aircraft prior to capture, and examined, measured, marked, biologically sampled, and have up to two transmitters attached prior to release. Animals may be temporarily observed via a remotely operated vehicle underwater after release. Sea turtle parts, tissues and carcasses from 500 animals annually may be received, imported or exported for study.
