B. What action is EPA taking?

With this action, the EPA is providing notice of a proposed program revision to the State of North Dakota’s approved NPDES program to transfer authority to administer the NDPDES program from the NDDOH to the NDDEQ. This action is not changing the current scope of North Dakota’s NDPDES program and is transferring authority to another agency to implement the state’s current NPDES program as part of the larger effort to move all federally authorized or delegated environmental programs from the NDDOH to the NDDEQ. If the proposed program revision is approved, EPA will retain the authority to issue permits for facilities located in Indian country¹ and/or discharging to waters in Indian country.

C. What is EPA’s authority for taking this action?

This action is taken under the authority of section 402 of the Clean Water Act as amended, 33 U.S.C. 1342. Under 40 CFR 123.62(b)(2), the EPA is

required to determine whether proposed program revisions are substantial and, if so, issue public notice and provide an opportunity to comment for a period of at least 30 days. The EPA considers this transfer of state authority to be substantial.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Chemical Recovery Combustion Sources at Kraft, Soda, Sulfite, and Stand-Alone Semichemical Pulp Mills apply to new and existing chemical recovery combustion sources at kraft, soda, sulfite, and stand-alone semichemical pulp mills, for which the chemical recovery combustion sources emit greater than or equal to 10 tons per year (tpy) of any one hazardous air pollutant (HAP) or greater than or equal to 25 tpy of any combination of HAPs. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of any failures to meet applicable standards, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to 40 CFR part 63, subpart MM.

Form Numbers: None.

Respondents/affected entities: Chemical recovery combustion sources at kraft, soda, sulfite, and stand-alone semichemical pulp mills.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart MM).

Estimated number of respondents: 107 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 122,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$14,700,000 (per year), which includes \$831,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is decrease in the total estimated respondent burden compared with the ICR currently approved by OMB. This ICR includes a more accurate estimate of the number of new respondents based on EPA's recent consultations with industry trade groups, which indicated that one new facility will start up in the third year of this information collection, in addition to the one new respondent per year that is an existing facility constructing new process units. This ICR also updates the burden associated with the October 11, 2017 RTR amendments, including removing first-year costs associated with the amendments, and accounting for the remaining one-time burden for facilities that applies through October 2020.

Director, Regulatory Support Division.
