Abstract: The EPA promulgated the Air Emissions Reporting Requirements (AERR) (40 CFR part 51, subpart A) to coordinate emissions inventory reporting requirements with existing requirements of the Clean Air Act and 1990 Amendments. Under this reporting, 55 state and territorial air quality agencies, including the District of Columbia, as well as an estimated 20 local air quality agencies, must submit emissions data every 3 years for all point, non-point, on-road mobile, and non-road mobile sources of volatile organic compounds, oxides of nitrogen, carbon monoxide, sulfur dioxide, particulate matter less than or equal to 10 micrometers in diameter, particulate matter less than or equal to 2.5 micrometers in diameter, ammonia, and lead. In addition, the air quality agencies must submit annually emission data for point sources with the potential to emit at greater than specified levels of those pollutants.

The data supplied to the emission reporting requirement is needed so that the EPA can compile and make available a national inventory of air pollutant emissions. A comprehensive inventory updated at regular intervals is essential to allow the EPA to fulfill its mandate to monitor and plan for the attainment and maintenance of the national ambient air quality standards established for criteria pollutants.

Form Numbers: None.

Respondents/affected entities: State, territorial and local government air quality managements programs. Tribal governments are not affected unless they have sought and obtained treatment as state status under the Tribal Authority Rule and on that basis, are authorized to implement and enforce the AERR rule.

Respondent's obligation to respond: Mandatory under 23 U.S.C. 101; 42 U.S.C 7401-7671q, and the authority of the AERR.

Estimated number of respondents: 75 (total).

Frequency of response: Annual.

Total estimated burden: 47,248 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$4,513,390 (per year), includes \$225,000 annualized capital or operation & maintenance costs.

Changes in the Estimates: Change in hours/cost is due to the reduction of the total estimated respondents from the ICR currently approved by OMB.

Abstract: All contractors who have completed an EPA cost-reimbursement type contract will be required to submit EPA Form 1900-10. EPA Form 1900-10 summarizes all costs incurred in performance of the contract and sets forth the final indirect rates. This form is reviewed by the contracting officer to determine the final costs reimbursable to the contractor. The Federal Acquisition Regulation (FAR) 52.216-7 states that the Government will pay only the costs determined to be allowable by the contracting officer in accordance with FAR Subpart 31.2. Furthermore, FAR 52.216-7 states that indirect cost rates shall be established for each fiscal year at the close of a contractor's fiscal year. EPA Form 1900-10 summarizes this information for the entire contract period and provides a basis for cost review by contracting, finance, and audit personnel. In addition, FAR 4.804-5 mandates that the office administering the contract shall ensure that the costs and indirect cost rates are settled.

Form Numbers: EPA Form 1900-10.

Respondents/affected entities: All contractors who have completed an EPA cost-reimbursement type contract.

Respondent's obligation to respond: Mandatory (FAR 52.216-7).

Estimated number of respondents: 5 (total).

Frequency of response: Once, at the end of the contract.

Total estimated burden: 32 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$4,602 (per year), includes \$0 annualized capital or operation & maintenance costs.

Changes in the Estimates: There is no change in the hours in the total estimated respondent burden compared with the ICR currently approved by OMB.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Inorganic Arsenic Emissions from Primary Copper Smelters (40 CFR part 61, subpart O) apply to existing facilities and new facilities where the total arsenic charging rate for the copper converter department averaged over a 1-year period is greater than 75 kg/hr (165 lb/hr), as determined under 40 CFR 61.174(f). New facilities include those that commenced construction or reconstruction after the date of proposal. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during

which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 61, subpart O.

Form Numbers: None.

Respondents/affected entities:

Owners and operators of primary copper smelter facilities.

Respondent's obligation to respond: Mandatory.

Estimated number of respondents: 3 (total).

Frequency of response: Initially, quarterly, and annually.

Total estimated burden: 2,380 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$263,000 (per year), which includes \$1,500 in annualized capital/setup and/or operation & maintenance costs.

Changes in the Estimates: This is a reinstatement of a previously approved collection. There is an adjustment decrease in the total estimated burden and cost previously identified in the OMB Inventory of Approved Burdens. This decrease is due to a decrease in the number of sources.
