

sections 303, 311/312 or 313 of the Emergency Planning and Community Right-to-Know Act (EPCRA).

Respondent's obligation to respond: Mandatory if a respondent decides to make a trace secret claim for the chemical identity for any of the chemicals in any of the reports the respondent is required to submit under EPCRA sections 303, 311/312 or 313.

Estimated number of respondents: 272 trade secret claims.

Frequency of response: Annual, with reports submitted under Sections 312 and 313.

Total estimated burden: 2,584 hours (per year). Burden is defined at 5 CFR 1320.03(b).

Total estimated cost: \$151,047 (per year). There are no capital or operation and maintenance costs associated with this ICR.

Changes in the estimates: This ICR renewal estimates a total respondent burden of 2,584 hours, which is reduced from the previous ICR. The previous approved burden was 3,154 hours. The burden decreased because the actual number of claims submitted is lower than what EPA estimated in the previous ICR.

Courtney Kerwin,

Director, Regulatory Support Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NESHAP for Inorganic Arsenic Emissions From Glass Manufacturing Plants (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency has submitted an information collection request (ICR), "NESHAP for Inorganic Arsenic Emissions from Glass Manufacturing Plants (40 CFR part 61, subpart N) (Renewal)" (EPA ICR No. 1081.12, OMB Control No. 2060-0043), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*). This is a proposed extension of the ICR, which is currently approved through November 30, 2018. Public comments were previously requested, via the **Federal Register** (82 FR 29552), on June

29, 2017 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An Agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before November 30, 2018.

ADDRESSES: Submit your comments, referencing Docket ID Number EPA-HQ-OECA-2014-0038, to: (1) EPA online using www.regulations.gov (our preferred method), or by email to docket.oeca@epa.gov, or by mail to: EPA Docket Center, Environmental Protection Agency, Mail Code 28221T, 1200 Pennsylvania Ave. NW, Washington, DC 20460; and (2) OMB via email to oira_submission@omb.eop.gov. Address comments to OMB Desk Officer for EPA.

EPA's policy is that all comments received will be included in the public docket without change including any personal information provided, unless the comment includes profanity, threats, information claimed to be Confidential Business Information (CBI), or other information whose disclosure is restricted by statute.

FOR FURTHER INFORMATION CONTACT:

Patrick Yellin, Monitoring, Assistance, and Media Programs Division, Office of Compliance, Mail Code 2227A, Environmental Protection Agency, 1200 Pennsylvania Ave. NW, Washington, DC 20460; telephone number: (202) 564-2970; fax number: (202) 564-0050; email address: yellin.patrick@epa.gov.

SUPPLEMENTARY INFORMATION:

Supporting documents, which explain in detail the information that the EPA will be collecting, are available in the public docket for this ICR. The docket can be viewed online at www.regulations.gov or in person at the EPA Docket Center, WJC West, Room 3334, 1301 Constitution Ave. NW, Washington, DC. The telephone number for the Docket Center is 202-566-1744. For additional information about EPA's public docket, visit: <http://www.epa.gov/dockets>.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Inorganic Arsenic Emissions from Glass Manufacturing Plants (40 CFR part 61, subpart N) apply to each existing and new glass melting furnace that uses commercial arsenic as a raw material located at a glass manufacturing plant. These standards

do not apply to pot furnaces; in addition, the standards do not consider re-bricking as construction or modification for the purposes of 40 CFR Section 61.05(a). New facilities include those that commenced construction or reconstruction after the date of proposal. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance with 40 CFR part 61, subpart N.

Form Numbers: None.

Respondents/affected entities: Glass manufacturing plants.

Respondent's obligation to respond: Mandatory (40 CFR part 61, subpart N).

Estimated number of respondents: 16 (total).

Frequency of response: Initially, occasionally and semiannually.

Total estimated burden: 3,100 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$382,000 (per year), which includes \$56,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in labor hours or costs in this ICR compared to the previous ICR. This is due to two considerations: (1) The regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for the industry is very low or non-existent, so there is no significant change in the overall burden.

Courtney Kerwin,

Director, Regulatory Support Division.

Information Collection Request Submitted to OMB for Review and Approval; Comment Request; NSPS for Primary and Secondary Emissions From Basic Oxygen Furnaces (Renewal)

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) has submitted an information collection request (ICR), NSPS for Primary and Secondary Emissions from Basic Oxygen Furnaces (EPA ICR Number 1069.12, OMB Control Number 2060-0029), to the Office of Management and Budget (OMB) for review and approval in accordance with the Paperwork Reduction Act. This is a proposed extension of the ICR, which is currently approved through November 30, 2018. Public comments were previously requested, via the **Federal Register**, on June 29, 2017 during a 60-day comment period. This notice allows for an additional 30 days for public comments. A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before November 30, 2018.

Abstract: The New Source Performance Standards (NSPS) for Primary Emissions from Basic Oxygen Process Furnaces (Subpart N) apply to each basic oxygen process furnace (BOPF) in an iron and steel plant that commenced construction, modification, or reconstruction after the date of proposal. These standards were merged with Standards of Performance for Secondary Emissions from Basic Oxygen Process Steelmaking Facilities (Subpart Na). Subpart Na is applicable to any top-blown BOPF, and hot metal transfer station or skimming stations used with bottom-blown or top-blown BOPF's for which construction, reconstruction, or modification commenced after January 20, 1983. In general, all NSPS standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These

notifications, reports, and records are essential in determining compliance with 40 CFR part 60, subparts N and Na.
Form Numbers: None.

Respondents/affected entities: Owners and operators of basic oxygen process furnaces at iron and steel plants.

Respondent's obligation to respond: Mandatory (40 CFR part 60, subpart N and Na).

Estimated number of respondents: 18 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 6,280 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$690,000 (per year), which includes \$29,700 in annualized capital and/or operation & maintenance costs.

Changes in the Estimates: The increase in burden from the most recently approved ICR is due to an adjustment. Hours were added to approximate the time spent by each source each year to familiarize with the rule requirements, and the total hours were rounded to three significant digits, which resulted in a small increase in labor hours since the last renewal.

Courtney Kerwin,

Director, Regulatory Support Division.
