

independent data are used in stock assessments, including how different data elements are used and interact in an age-based analytic assessment; Summarize the theoretical utility and limitations of using catch per unit effort (CPUE) and landings per unit effort (LPUE) as indexes of abundance for Northeast multispecies (groundfish) stocks, including recent efforts to create a CPUE for any of these stocks and the results of those efforts; Identify the fishery factors and fishery dependent data needed to create a CPUE that would be a reliable index of abundance for Northeast multispecies stocks—without regard to existing fishing practices, regulations, or monitoring systems; Compare the desired factors identified with existing conditions and data for the fishery through a gap analysis of factors and data needed, as well as the analytical approaches necessary, to create a CPUE that would be a reliable index of abundance for Northeast multispecies stocks. Other business will be discussed as needed.

Although non-emergency issues not contained on the agenda may come before this Council for discussion, those issues may not be the subject of formal action during this meeting. Council action will be restricted to those issues specifically listed in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Act, provided the public has been notified of the Council's intent to take final action to address the emergency. The public also should be aware that the meeting will be recorded. Consistent with 16 U.S.C. 1852, a copy of the recording is available upon request.
