

History and Description of the Cultural Items

Sometime before 1904, 13 cultural items were removed from a cremation knoll on Mameluke Hill in El Dorado County, CA. A schoolteacher and her son removed the cultural items from the cremation knoll and gave them to Mr. C. Hart Merriam in 1904. In 1962, C. Hart Merriam's daughter sold the collections accumulated by her father to the University of California, Davis. The 13 unassociated funerary objects are 11 sets of trade beads, one set of barita beads, and one stone amulet.

C. Hart Merriam noted that the cultural items show evidence of burning, and were collected from a cremation knoll. Cremation is the historically documented burial practice of Nisenan peoples. Merriam affiliated the cultural items with the Nisenan. Mameluke Hill is located in the historically documented aboriginal territory of the Nisenan, who are today represented by the Ione Band of Miwok Indians of California; Jackson Band of Miwok Indians (previously listed as the Jackson Rancheria of Me-Wuk Indians of California); Shingle Springs Band of Miwok Indians, Shingle Springs Rancheria (Verona Tract), California; United Auburn Indian Community of the Auburn Rancheria of California; and the Wilton Rancheria, California, hereafter referred to as "The Tribes." The glass trade beads date to the historic period.

Determinations Made by the University of California, Davis

Officials of the University of California, Davis have determined that:

- Pursuant to 25 U.S.C. 3001(3)(B), the 13 cultural items described above are reasonably believed to have been placed with or near individual human remains at the time of death or later as part of the death rite or ceremony and are believed, by a preponderance of the evidence, to have been removed from a specific burial site of a Native American individual.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the unassociated funerary objects and The Tribes.

Additional Requestors and Disposition

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to claim these cultural items should submit a written request with information in support of the claim to Megon Noble, NAGPRA Project Manager, University of California,

Davis, 433 Mrak Hall, One Shields Avenue, Davis, CA 95616, telephone (530) 752-8501, email mnoble@ucdavis.edu, by December 13, 2018.

Consultation

A detailed assessment of the human remains was made by the Historic Westville, Inc. professional staff in consultation with representatives of the Absentee-Shawnee Tribe of Indians of Oklahoma; Alabama-Coushatta Tribe of Texas (previously listed as the Alabama-Coushatta Tribes of Texas); Cherokee Nation; Eastern Band of Cherokee Indians; Poarch Band of Creek Indians (previously listed as the Poarch Band of Creek Indians of Alabama); Seminole Tribe of Florida (previously listed as the Seminole Tribe of Florida (Dania, Big Cypress, Brighton, Hollywood & Tampa Reservations)); The Choctaw Nation of Oklahoma; The Muscogee (Creek) Nation; The Seminole Nation of Oklahoma; and the United Keetoowah Band of Cherokee Indians in Oklahoma, hereafter referred to as "The Consulted Tribes."

History and Description of the Remains

In 1985, human remains representing, at minimum, four individuals were donated to Historic Westville, Inc. along with approximately 13,000 other Native American artifacts and reproductions. The collection was donated by Dr. Austin Flint. All attempts by the staff of Historic Westville to reach Dr. Flint or his descendants have been unsuccessful. Documentation of the donation consists of a handwritten inventory done by an appraiser preceding the donation and a signed deed of gift. The collection was re-discovered by current staff in 2016. The four individuals include one subadult of indeterminate sex based on the mandible fragment with unerupted teeth and three individuals of indeterminate

age and sex. The 150 associated funerary objects are: 37 beads, 27 gorgets and possible gorgets, 34 celts and possible celts, 18 turtle and mollusk shells, 21 clay pots that may be reproductions, five flutes that are possible reproductions, five large decorated sherds, one pipe, one mask that is a possible reproduction, and one unknown ceramic.

Consulting archeologists identified a percentage of the collection to aid in determining point of origin for the collection. A 5% random sampling of over 1,000 project points revealed that over 80% originated from Georgia and Tennessee. A 20% sampling of pottery sherds also verified that over 80% of the sherds were from Georgia and Tennessee.
