Consultation

A detailed assessment of the human remains was made by the Riverside Metropolitan Museum professional staff in consultation with representatives of Inupiat Community of the Arctic Slope.

History and Description of the Remains

At an unknown date, human remains representing, at minimum, one individual were removed from an unknown location in Alaska and entered the possession of a Captain Hammond. Captain Hammond is known to have sailed between San Francisco, CA, and Alaska in the late 19th and early 20th centuries. During this period, he acquired a collection of Inupiat objects. Upon Captain Hammond's death, the human remains and other Inupiat ethnographic materials were acquired by a collector, who donated them in 1982 to the Riverside Metropolitan Museum. No known individuals were identified. No associated funerary objects are present.

Historical records suggest Captain Hammond worked for Alaskan salmon fishing companies and his travels along the coast provided him with opportunities to interact with Alaskan coastal Inupiat peoples. This geographic evidence, and the association of these human remains within the Hammond Collection of Inupiat materials, suggests that these human remains are Inupiat. According to oral history, archaeological evidence, and ethnographic records, the Inupiat Community of the Arctic Slope are directly descended from the earlier Inupiat peoples who lived in this region.
