## SUPPLEMENTARY INFORMATION:

### Background

The Project is proposed in order to improve structural safety for the public traveling underneath the building and for the tenants occupying the building above the Front Street underpass, located at 8800 Front Street in San Diego, California. The portion of Front Street that extends below the Schwartz FOB is referred to as the Front Street underpass. The existing building has five stories of federal office building space spanning above the roadway and two levels of parking structure beneath the roadway.

The EA will consider one Action Alternative and one No Action Alternative. The Action Alternative would consist of structural enhancement improvements to the portion of the existing Edward J. Schwartz Federal Building over Front Street between E and F streets. Existing columns and beams supporting the building at the Front Street underpass would be reinforced with new steel beams and column support structures and pre-cast concrete paneling. Construction would require full and partial closure of Front Street between Broadway and F Street. Street closure options during construction of the Action Alternative are being considered and a comprehensive Traffic Control Plan will be prepared to address the street closure.

The No Action Alternative assumes that structural enhancements to the existing building would not occur.

### Public Meeting

The public meeting will be conducted in open house format, where project information will be presented and distributed. Comments must be received by December 17, 2018, and emailed to [osmahn.kadri@gsa.gov](mailto:osmahn.kadri@gsa.gov), or sent to the address listed above.
