at [http://www.reginfo.gov/public/do/  
PRAMain](http://www.reginfo.gov/public/do/PRAMain).

**SUPPLEMENTARY INFORMATION:** In  
accordance with the Paperwork  
Reduction Act of 1995, we provide the  
general public and other Federal  
agencies with an opportunity to  
comment on new, proposed, revised,  
and continuing collections of  
information. This helps us assess the  
impact of our information collection  
requirements and minimize the public's  
reporting burden. It also helps the  
public understand our information  
collection requirements and provide the  
requested data in the desired format.

A **Federal Register** notice with a 60-  
day public comment period soliciting  
comments on this collection of  
information was published on February  
28, 2018 (83 FR 8698). The following  
comments were received:

*Comment 1:* Letter dated April 30,  
2018, from Myles P. Culhane, Assistant  
General Counsel, Occidental Petroleum  
Corporation. Received via email on  
April 30, 2018.

Occidental Petroleum Corporation  
provided comments on whether PECE is  
necessary to the proper functions of the  
Service, whether we will use the  
information in a timely manner, and  
how to enhance the information being  
collected. They stated that PECE is very  
important to encourage voluntary  
conservation efforts prior to listing  
decisions such that listing may not be  
necessary. They offered three  
suggestions to improve information  
collection in the context of specific  
listing decisions:

(1) Ensure that we are collecting the  
right types of information by  
considering what will be useful in  
predicting future conservation actions  
and results, and articulating the factors  
we think will inform such predictions,  
(2) Ensure that we have the ability to  
update our listing decisions up until the  
last minute regarding current  
information about conservation efforts, and

(3) Ensure that PECE analyses are  
cumulative and include all qualifying  
conservation efforts together rather than  
in isolation.

*FWS Response to Comment 1:* The  
Service appreciates this comment and  
does consider the best available

scientific and commercial information  
received through the public comment  
period, information solicitation, or other  
means related to conservation efforts  
when making listing determinations.  
The Service maintains that in every  
proposed or final listing decision, we  
articulate the species' needs, the threats  
to the species and its response to those  
threats, and any actions that may  
ameliorate or exacerbate those threats.  
Each particular situation is unique, but  
in the Service's final PECE, we  
articulated the non-exhaustive list of  
criteria that we would use to evaluate  
each conservation effort that did not  
have a track record of implementation  
or effectiveness. The Service is required  
to consider best available scientific and  
commercial information in making  
listing decisions, including information  
on conservation efforts that do not have  
a track record of implementation or  
effectiveness. The Service evaluates the  
certainty of implementation and  
effectiveness by considering the criteria  
in the PECE, and those efforts that meet  
the PECE standard of sufficiently certain  
to be implemented and effective are  
then evaluated in the status assessment  
for the species. The Service understands  
that stakeholders want a transparent and  
flexible process, and the Service is open  
to communication and collaboration  
with these stakeholders which will  
encourage conservation of species.

*Comment 2:* Letter dated April 27,  
2018, from Steve Wright, General  
Manager, Public Utility District No. 1 of  
Chelan County, WA. Received via email  
on May, 7, 2018.

Chelan Public Utility District No. 1  
commented that it finds PECE useful  
because it encourages aggregation of  
information about conservation efforts,  
which can provide notice to permit  
applicants and other entities possibly  
affected by a listing, both of the listing  
and the efforts. It can also encourage  
entities to participate in conservation  
efforts, which can be meaningful for  
species. It finds that encouraging  
conservation efforts is consistent with  
the ESA and benefits species.

*FWS Response to Comment 2:* The  
Service appreciates the District's  
comments about the utility and benefits  
of PECE.

We are again soliciting comments on  
the proposed ICR that is described  
below. We are especially interested in  
public comment addressing the  
following issues: (1) Is the collection  
necessary to the proper functions of the  
Service; (2) will this information be  
processed and used in a timely manner;  
(3) is the estimate of burden accurate;  
(4) how might the Service enhance the  
quality, utility, and clarity of the

information to be collected; and (5) how might the Service minimize the burden of this collection on the respondents, including through the use of information technology.

Comments that you submit in response to this notice are a matter of public record. Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

*Abstract:* Section 4 of the Endangered Species Act (ESA; 16 U.S.C. 1531 *et seq.*) outlines the process by which we can list a species as a threatened species or an endangered species. When we consider whether to list a species, the ESA requires us to take into account the efforts made by any State or any political subdivision of a State to protect such species. We also take into account the efforts made by other entities. States or other entities often formalize conservation efforts in conservation agreements, conservation plans, management plans, or similar documents. The conservation efforts recommended or described in such documents could prevent some species from becoming so imperiled that they meet the definition of a threatened

species or an endangered species under the ESA.

The Policy for Evaluation of Conservation Efforts When Making Listing Decisions (PECE) (68 FR 15100, March 28, 2003) encourages the development of conservation agreements or plans and provides certainty about the standard that an individual conservation effort must meet in order for us to consider whether it is likely to make a difference in a species' status. PECE applies to "formalized conservation efforts" that have not been implemented or have been implemented but have not yet demonstrated if they are effective at the time of a listing decision.

Under PECE, formalized conservation efforts are defined as conservation efforts (specific actions, activities, or programs designed to eliminate or reduce threats or otherwise improve the status of a species) identified in a conservation agreement, conservation plan, management plan, or similar document. To assist us in evaluating a formalized conservation effort under PECE, we collect information such as conservation plans, monitoring results, and progress reports. The development of any agreement or plan is voluntary. There is no requirement that the individual conservation efforts included in such documents be designed to meet the standard in PECE. The PECE policy is posted on our Candidate Conservation website at <http://www.fws.gov/endangered/esa-library/pdf/PECE-final.pdf>.

We are not reporting an increase in burden with this renewal, although we revised the collection to include burden for individuals, businesses, and not-for-profit organizations who may develop agreements/plans or may agree to implement certain conservation efforts identified in a State agreement or plan. Previously, we reported all burden estimates as government, although it was possible to receive submissions from individuals and private sector respondents. This submission breaks their burden out separately, with a placeholder of one submission for each category, to account for the rare occasion that we may receive a submission from these additional respondent categories.

*Title of Collection:* Policy for Evaluation of Conservation Efforts When Making Listing Decisions (PECE).

*OMB Control Number:* 1018-0119.

*Form Number:* None.

*Type of Review:* Revision of a currently approved collection.

*Respondents/Affected Public:* Primarily State, local, or Tribal governments. However, individuals, businesses, and not-for-profit organizations could develop agreements/plans or may agree to implement certain conservation efforts identified in a State agreement or plan.

*Respondent's Obligation:* Required to Obtain or Retain a Benefit.

*Frequency of Collection:* On occasion.

*Total Estimated Annual Nonhour Burden Cost:* None.
