

8, 2018 as Supplement 58 to NUREG–1437, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants Regarding River Bend Station, Unit 1, Final Report” dated November 8, 2018” (ADAMS Accession No. ML18310A072). As part of its environmental review, the NRC considered a range of reasonable alternatives to RBS license renewal. These alternatives included generating replacement energy from a new nuclear reactor, from supercritical pulverized coal (SCPC) power, from natural gas combined-cycle (NGCC) power, or from a combination alternative (natural gas combined-cycle, biomass, and demand-side management). The NRC also considered the no-action alternative (simply not issuing the renewed license for RBS). Ultimately, the NRC determined that the adverse environmental impacts of license renewal for RBS are not so great that preserving the option of license renewal for energy planning decisionmakers would be unreasonable.

RBS is a boiling-water reactor located approximately 38.6 km (24 miles) northwest of Baton Rouge, LA. Entergy’s application for RBS license renewal, dated May 25, 2017 (ADAMS Package Accession No. ML17153A282), as supplemented by letters dated through October 9, 2018, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the NRC’s regulations. As required by the Act and the NRC’s regulations in Chapter 1, “Nuclear Regulatory Commission,” of Title 10 of the *Code of Federal Regulations* (10 CFR), “Energy,” the NRC has made appropriate findings, which are set forth in the license. The NRC published a public notice in the **Federal Register** on May 31, 2016, announcing its proposed issuance of the renewed license and an opportunity for a hearing (81 FR 34379). No adjudicatory matters are pending before the Commission or the Atomic Safety and Licensing Board Panel regarding the RBS license renewal application.

For more information on the issuance of the renewed license for RBS, see: (1) Entergy’s license renewal application for RBS dated May 25, 2017 (ADAMS Package Accession No. ML17153A282), as supplemented by letters through October 9, 2018, (2) the NRC’s safety evaluation report, which documents the staff’s safety review of the license renewal application (published on August 16, 2018, ADAMS Accession No. ML18212A151, as revised on October 18, 2018 (ADAMS Accession No. ML18291B147)), (3) the NRC’s final supplemental environmental impact

statement (NUREG–1437, Supplement 58) for RBS, which documents the staff’s environmental review of the RBS license renewal (published on November 8, 2018 ADAMS Accession No. ML18310A072), and (4) the NRC’s record of decision for this action (ADAMS Accession No. ML18284A374).

II. Conclusion

As discussed in Chapter 5 of the final supplemental environmental impact statement for the RBS license renewal (Supplement 58 to NUREG–1437), the NRC determined that the adverse environmental impacts of license renewal for River Bend Station, Unit 1 are not so great that preserving the option of license renewal for energy-planning decisionmakers would be unreasonable. The NRC based its recommendation on: (1) The analysis and findings in NUREG–1437, “Generic Environmental Impact Statement for License Renewal of Nuclear Plants,” (2) Entergy’s license renewal application, including its environmental report and other documents submitted by Entergy, (3) consultation with Federal, State, local, and Tribal agencies, (4) the NRC staff’s independent environmental review, and (5) consideration of public comments received during the scoping process and on the draft supplemental environmental impact statement.

Dated at Rockville, MD, this 20th day of December 2018.

I. Introduction

The Commission gives notice that the Postal Service filed request(s) for the Commission to consider matters related to negotiated service agreement(s). The request(s) may propose the addition or removal of a negotiated service agreement from the market dominant or the competitive product list, or the modification of an existing product currently appearing on the market dominant or the competitive product list.

Section II identifies the docket number(s) associated with each Postal Service request, the title of each Postal Service request, the request’s acceptance date, and the authority cited by the Postal Service for each request. For each request, the Commission appoints an officer of the Commission to represent the interests of the general public in the proceeding, pursuant to 39 U.S.C. 505 (Public Representative). Section II also establishes comment deadline(s) pertaining to each request.

The public portions of the Postal Service’s request(s) can be accessed via the Commission’s website (<http://www.prc.gov>). Non-public portions of the Postal Service’s request(s), if any, can be accessed through compliance with the requirements of 39 CFR 3007.301.¹

The Commission invites comments on whether the Postal Service’s request(s)
