SUPPLEMENTARY INFORMATION:

I. Background

Section 103(h) of the Federal Mine Safety and Health Act of 1977 (Mine Act), 30 U.S.C. 813(h), authorizes MSHA to collect information necessary to carry out its duty in protecting the safety and health of miners. Further, Section 101(a) of the Mine Act, 30 U.S.C. 811, authorizes the Secretary to develop, promulgate, and revise as may be appropriate, improved mandatory safety and health standards for the protection of life and prevention of injuries in coal or other mines.

Training informs miners of safety and health hazards inherent in the workplace and enables them to identify and avoid such hazards. Training becomes even more important in light of certain conditions that can exist when production demands increase, such as an influx of new and less experienced miners and mine operators; longer work hours to meet production demands; and increased demand for contractors who may be less familiar with the dangers on mine property.

MSHA’s safety and health training requirements ensure that all miners

receive the required training, which would result in a decrease in accidents, injuries, and fatalities. The information obtained from mine operators is used by MSHA during inspections to determine compliance with the requirements concerning the training and retraining of miners engaged in shell dredging, or employed at sand, gravel, surface stone, surface clay, colloidal phosphate, and surface limestone mines.

MSHA is soliciting comments concerning the proposed information collection related to Training Plans, New Miner Training, Newly-hired Experienced Miner Training. MSHA is particularly interested in comments that:

- Evaluate the accuracy of MSHA’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

- Suggest methods to enhance the quality, utility, and clarity of the information to be collected; and

- Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

The information collection request will be available on <http://www.regulations.gov>. MSHA cautions the commenter against providing any information in the submission that should not be publicly disclosed. Full comments, including personal information provided, will be made available on www.regulations.gov and www.reginfo.gov.
