#### SUPPLEMENTARY INFORMATION:

##### I. Background

The Consumer Product Safety Improvement Act of 2008 (CPSIA; Pub. L. 110-314, 122 Stat. 3016) requires the Commission to establish and maintain a database on the safety of consumer products, and other products or substances the Commission regulates, that is publicly available, searchable, and accessible through CPSC's website. 15 U.S.C. 2055a(a)(1). The CPSIA includes specific content, procedural, and search requirements for the database. *Id.* 2055a(b), (c). In 2010, the Commission issued regulations regarding the database in 16 CFR part 1102, and in 2011, Congress added additional requirements to the database provisions. 75 FR 76832 (Dec. 9, 2010) (adopting 16 CFR part 1102); Sec. 7, Public Law 112-28, 125 Stat. 273 (amending 15 U.S.C. 2055a(c)).

To comply with these requirements, CPSC created the website [www.SaferProducts.gov](http://www.SaferProducts.gov). The website allows consumers and others to submit

reports of harm relating to the use of consumer products, and other products or substances the Commission regulates; allows businesses to comment on such reports; and allows users to search the database for product recalls and reports of harm that are published on [www.SaferProducts.gov](http://www.SaferProducts.gov).

##### II. Request for Information

CPSC is considering improvements to [www.SaferProducts.gov](http://www.SaferProducts.gov) to make the website easier to understand, navigate, and interact with, as well as more useful for submitting and obtaining desired information. CPSC seeks stakeholders' recommendations and intends to use the information it receives to determine how to update and upgrade the website. CPSC is particularly interested in information about how the website could be more user-friendly, and possible modifications to make the searching, reporting, and commenting tools more useful. CPSC requests comments and suggestions to improve the usability of the website. In particular, CPSC seeks comments on the following topics:

1. How can the overall design of [SaferProducts.gov](http://www.SaferProducts.gov) be improved?
2. Have you attempted to visit [SaferProducts.gov](http://www.SaferProducts.gov) using a mobile device? What suggestions would you have to make that experience better?
3. Please describe any problems you encountered when using [SaferProducts.gov](http://www.SaferProducts.gov). Please be as specific as possible.
4. How can the process of reporting on [SaferProducts.gov](http://www.SaferProducts.gov) be improved?
5. How can the instructions for submitting a report be improved?
6. Business users: How can the processes of registering, accessing, and responding to reports of products or other substances the Commission regulates on [SaferProducts.gov](http://www.SaferProducts.gov) be improved?
7. How can searching for recalls and reports on the website be improved?
8. What other information would be useful to publish or provide with the recall and incident report data?
9. Have you encountered any difficulty attempting to upload photos or videos with a report you may have submitted? Please describe what happened.
10. If CPSC were to create a data visualization tool (a tool to help people understand data by placing it in a visual context) to help consumers and businesses better understand the data captured through [SaferProducts.gov](http://www.SaferProducts.gov), would that kind of tool be useful to you?
11. Currently, submitters of information to the website must check a box to consent to CPSC publishing

their report on the website. CPSC is exploring whether this extra step in the submission process may decrease the number of published reports. CPSC is considering whether to move to a pre-checked box where permission to publish is granted by the submitter automatically unless the submitter explicitly opts out by checking a box. CPSC staff believes this could increase the number of published reports and increase awareness of potentially unsafe products. The reports that CPSC publishes on *Saferproducts.gov* are prohibited by law from including personal information, such as name, address, and contact information. Do you have suggestions or concerns about making this change?

12. Given the growth of online retail sales since the launch of *SaferProducts.gov* and that online retail sales platforms usually include an ability for consumers to provide a product rating or other feedback, how might CPSC motivate the provision of safety-related feedback to *SaferProducts.gov* as a primary, or at least additional, mechanism for capturing information on consumer product-related incidents?

13. How can the agency encourage the use of *SaferProducts.gov* among eligible reporters other than consumers, such as physicians, medical examiners, and first responders?

### III. Options for Providing Input

Interested parties may provide the requested information through written comments or through oral presentations at a public hearing, or through both methods. Written comments and oral presentations will become part of the public record. To submit written comments, see the information under the **DATES** and **ADDRESSES** sections of this document.

At the public hearing, interested parties will have an opportunity to discuss their comments. To request the opportunity to make an oral presentation at the public hearing, see the information under the **DATES** and **ADDRESSES** sections of this document. Participants should limit their presentations to approximately 10 minutes, excluding time for questioning by the Commissioners. To avoid duplicate presentations, groups should designate a spokesperson, and the Commission reserves the right to limit presentation times, or impose further restrictions, as necessary.

Interested parties who do not attend the public hearing in person will be able

to view the public hearing through a webcast, but they will not be able to interact with the panels and presenters.
