Title: Hazardous Materials Public Sector Training and Planning Grants.
OMB Control Number: 2137–0586.
Summary: Part 110 of 49 CFR sets forth the procedures for reimbursable grants for public sector planning and training in support of the emergency planning and training efforts of States, Indian tribes, and local communities to manage hazardous materials

emergencies, particularly those involving transportation. Sections in this part address information collection and recordkeeping with regard to applying for grants, monitoring expenditures, and reporting and requesting modifications. The following information collection and burden is associated with this OMB Control Number:

Information collection	Respondents	Total annual responses	Hours per response	Total annual burden hours
Hazardous Materials Grants Applications	62	62	83.23	5,160

Affected Public: State and local governments, Indian tribes.
Annual Reporting and Recordkeeping Burden:

Annual Respondents: 62.
Annual Responses: 62.
Annual Burden Hours: 5,160.
Frequency of Collection: On occasion.
Title: Subsidiary Hazard Class and Number/Type of Packagings.

OMB Control Number: 2137–0613.
Summary: The HMR require that shipping papers and emergency response information accompany each shipment of hazardous materials in commerce. In addition to the basic shipping description information, we also require the subsidiary hazard class or subsidiary division number(s) to be entered in parentheses following the primary hazard class or division number on shipping papers. This requirement was originally required only by transportation by vessel. However, the

lack of such a requirement posed problems for motor carriers with regard to complying with segregation, separation, and placarding requirements, as well as posing a safety hazard. For example, in the event the motor vehicle becomes involved in an accident, when the hazardous materials being transported include a subsidiary hazard such as “dangerous when wet” or a subsidiary hazard requiring more stringent requirements than the primary hazard, there is no indication of the subsidiary hazards on the shipping papers and no indication of the subsidiary risks on placards. Under circumstances such as motor vehicles being loaded at a dock, labels are not enough to alert hazardous materials employees loading the vehicles, nor are they enough to alert emergency responders of the subsidiary risks contained on the vehicles. Therefore, we require the subsidiary hazard class or

subsidiary division number(s) to be entered on the shipping paper, for purposes of enhancing safety and international harmonization.
 Shipping papers serve as a principal means of identifying hazardous materials during transportation emergencies. Firefighters, police, and other emergency response personnel are trained to obtain the DOT shipping papers and emergency response information when responding to hazardous materials transportation emergencies. The availability of accurate information concerning hazardous materials being transported significantly improves response efforts in these types of emergencies. The additional information would aid emergency responders by more clearly identifying the hazard.
 The following information collection and burden is associated with this OMB Control Number:

Information collection	Respondents	Total annual responses	Seconds per response	Total annual burden hours
Subsidiary Hazard Class on Shipping Papers	260,000	43,810,000	2	24,339

Affected Public: Shippers and carriers of hazardous materials in commerce.
Annual Reporting and Recordkeeping Burden:

Number of Respondents: 260,000.
Total Annual Responses: 43,810,000.
Total Annual Burden Hours: 24,339.
Frequency of Collection: On occasion.

Issued in Washington, DC, on February 19, 2019.

William S. Schoonover,

Associate Administrator of Hazard Materials Safety, Pipeline and Hazardous Materials Safety Administration.
