*Needs and Uses:* The Commission is submitting this information collection to the Office of Management and Budget (OMB) after this 60 day comment period in order to obtain the full three year clearance.

On July 13, 2017, the Commission adopted an Order on Reconsideration in ET Docket Nos. 14–165 and 14–166, FCC 17–95, that addressed wireless microphone issues (2017 Wireless Microphone Order). Because the date

the Commission specified in the 2015 White Spaces R&O for ending registration of unlicensed wireless microphones in the white space database had passed with the release of the Channel Reassignment Public Notice on April 13, 2017, the Order removed and reserved Section 15.713(j)(9) that had previously allowed such registrations.

The white space rules as amended by the 2015 White Spaces R&O require that each white space database administrator shall:

(a) Maintain a database that contains the information described in § 15.713 of the rules. The database must include information on protected entities and services, including TV stations, Broadcast Auxiliary Services, Private Land Mobile and Commercial Radio Service operations, part 74 Low Power Auxiliary Stations such as wireless microphones, the locations where part 27 600 MHz service licensees have commenced operation, and the locations of health care facilities that use WMTS equipment operating on channel 37. (Section 15.715(a));

(b) Establish a process for acquiring and storing in the database necessary and appropriate information from the Commission's databases and synchronizing the database with the current Commission databases at least once a week to include newly licensed facilities or any changes to licensed facilities (Section 15.715(b));

(c) Establish a process for registering fixed white space devices and registering and including in the database those facilities entitled to protection but not contained in a Commission database, including Multi-channel Video Programming Distributor (MVPD) receive sites. The database administrators must establish procedures to allow part 27 600 MHz service licensees to upload, modify and replace registration information for areas where they have commenced operations; allow health care facilities to register the locations of facilities where they operate WMTS networks on channel 37; and to allow unlicensed wireless microphone users in the 600 MHz band to register with the database and to provide lists of channels available for wireless microphones at a given location (Sections 15.715(n), (p) and (q)). Database administrators must remove from the database the registrations of fixed white space devices that have not checked the database for at least three months to update their channel lists (Section 15.715(o));

(d) Establish a process for registering facilities where part 74 low power

auxiliary devices are used on a regular basis (Sections 15.713(j)(8) and 15.715(d));

(e) Provide accurate automated information regarding available channels to fixed and personal/portable white space devices that submit to the database the information required under § 15.713(e), (g) and (h) based on the geographic location of the device; and provide accurate automated information regarding available channels to fixed and Mode II devices requesting information regarding available channels for Mode I devices. Database administrators may allow prospective operators of white space devices to query the database and determine if there are vacant channels at a particular location (Section 15.715(e));

(f) Establish protocols and procedures to ensure that all automated communications and interactions between the database and white space devices are accurate and secure and that unauthorized parties cannot access or alter the database or the information regarding available channels sent to a white space device consistent with the provisions of Section 15.713(l) (Section 15.715(f));

(g) Make database services available to all unlicensed white space device users on a non-discriminatory basis (Section 15.715(g));

(h) Provide service for a five-year term. This term can be renewed at the Commission's discretion (Section 15.715(h));

(i) Respond in a timely manner to verify, correct and/or remove, as appropriate, data in the event that the Commission or a party brings a claim of inaccuracies in the database to the attention of the administrator. This requirement applies only to information that the Commission requires to be stored in the database (Section 15.715(i));

(j) Transfer the database, along with the IP addresses and URLs used to access the database and data for registered fixed and personal/portable white space devices, to another designated entity in the event it does not continue as the database administrator at the end of its term (Section 15.715(j));

(k) The database must have functionality such that upon request from the Commission it can indicate that no channels are available when queried by a specific white space devices or model of white space device (Section 15.715(k));

(l) If more than one database is developed, the database administrators must cooperate to develop a standardized process for providing on a

daily basis or more often, as appropriate the data collected for the facilities listed in § 15.713(b)(2) to all other white space databases to ensure consistency in the records of protected facilities (Section 15.715(l));

(m) The database administrator may charge a fee for provision of lists of available channels to fixed and personal/portable devices and for registering fixed devices. This provision applies to devices that operate in the TV bands, 600 MHz service band, and the 600 MHz guard bands and duplex gap. A white space database administrator may also charge a fee for provision of lists of available channels to wireless microphone users. (Section 15.714).

To receive interference protection, 600 MHz licensees must notify one of the white space database administrators of the areas where they have commenced operation pursuant to §§ 15.713(j)(10) and 15.715(n) of this chapter (Section 27.1320).
