

the Board believes this obviates the need for notarization. The second recommendation was to use a website for submissions to minimize burden. The Board currently allows submission of the FR Y-12 and FR Y-12A by mail or electronically via the Federal Reserve System's Reporting Central application, so the Board does not believe an additional electronic submission mechanism is necessary. The third recommendation was to ensure that respondents are aware of exactly which information must be reported, and the reasons that this information is required. Board staff has strived to draft instructions for the FR Y-12 and FR Y-12A reports that are as clear as possible and will continue to explore ways to increase the clarity of those instructions. The Board's public OMB supporting statements and **Federal Register** notices regarding the FR Y-12 and FR Y-12A reports explain that the information collected by the reports is necessary for the Board to carry out its responsibilities of supervising holding companies and maintaining U.S. financial stability.

The revisions to the FR Y-12 and FR Y-12A will be implemented as proposed.

Board of Governors of the Federal Reserve System, February 26, 2019.

Michele Taylor Fennell,

Assistant Secretary of the Board.

SUPPLEMENTARY INFORMATION:

Proposed Project

Online Application Order Form for Products From the Healthcare Cost and Utilization Project (HCUP)

In accordance with the Paperwork Reduction Act, 44 U.S.C. 3501–3521, AHRQ invites the public to comment on this proposed information collection. The Healthcare Cost and Utilization Project (HCUP, pronounced “H-Cup”) is a vital resource helping the Agency achieve its research agenda, thereby furthering its goal of improving the delivery of health care in the United States. HCUP is a family of health care databases and related software tools and products developed through a Federal-State-Industry partnership and sponsored by AHRQ. HCUP includes the largest collection of longitudinal hospital care data in the United States, with all-payer, encounter-level information beginning in 1988. The HCUP databases are annual files that contain anonymous information from hospital discharge records for inpatient

care and certain components of outpatient care, such as emergency care and ambulatory surgeries. The project currently releases seven types of databases created for research use on a broad range of health issues, including cost and quality of health services, medical practice patterns, access to health care programs, and outcomes of treatments at the national, State, and local market levels. HCUP also produces a large number of software tools to enhance the use of administrative health care data for research and public health use. Software tools use information available from a variety of sources to create new data elements, often through sophisticated algorithms, for use with the HCUP databases.

HCUP’s objectives are to:

- Create and enhance a powerful source of national, state, and all-payer health care data.
- Produce a broad set of software tools and products to facilitate the use of HCUP and other administrative data.
- Enrich a collaborative partnership with statewide data organizations (that voluntarily participate in the project) aimed at increasing the quality and use of health care data.
- Conduct and translate research to inform decision making and improve health care delivery.

This project is being conducted by AHRQ through its primary contractor and subcontractor, IBM Watson Health and Social & Scientific Systems, Inc., pursuant to AHRQ’s statutory authority to conduct and support research on health care and on systems for the delivery of such care, including activities with respect to the outcomes, cost, cost-effectiveness, and use of health care services and access to such services. 42 U.S.C. 299a(a)(3).

Method of Collection

The HCUP releases seven types of databases for public research use:
