**SUPPLEMENTARY INFORMATION:** The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. The product of the SEDAR webinar series will be a report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses, and describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants include: data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion in the Assessment Webinar I are as follows:

1. Participants will review data and discuss remaining data issues, as necessary.
2. Participants will begin discussions to develop population models to evaluate stock status, estimate population benchmarks, and project future conditions, as specified in the Terms of Reference.
3. Participants will recommend the most appropriate methods and configurations for determining stock status and estimating population parameters.
4. Participants will prepare a workshop report and determine whether the assessment(s) are adequate for submission for review.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under

section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### National Estuarine Research Reserve System

**AGENCY:** Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce

**ACTION:** Notice of Public Comment Period for the Hudson River National Estuarine Research Reserve Management Plan revision.

**SUMMARY:** Notice is hereby given that the Office for Coastal Management, National Ocean Service, National Oceanic and Atmospheric Administration, U.S. Department of Commerce is announcing a thirty-day public comment period for the Hudson River National Estuarine Research Reserve Management Plan revision. The revision of the existing management plan is necessitated by the applicable requirements of the National Estuarine Research Reserve System. The Hudson River Reserve revised plan will replace the plan approved in 2009.

**SUPPLEMENTARY INFORMATION:** Pursuant to 15 CFR 921.33(c), a state must periodically update its management plan for a National Estuarine Research Reserve. The Hudson River National Estuarine Research Reserve revised plan will replace the plan previously approved in 2009. NOAA issues this notice of a public comment period for the revised plan under 15 CFR 921.33(a).

The revised management plan outlines the administrative structure;

the research/monitoring, stewardship, education, and training programs and priorities of the reserve; plans for including inholdings within the existing boundary into state ownership; and facility development priorities to support reserve operations.

The Hudson River Reserve takes an integrated approach to management, linking research and education, coastal training, and stewardship functions. The New York Department of Environmental Conservation has outlined how it will administer the reserve and its core programs by providing detailed actions that will enable it to accomplish specific goals and objectives. Since the last management plan, the reserve has: Provided technical expertise to coastal communities to reduce risks to natural hazards; expanded monitoring programs; installed a sentinel site for monitoring marsh ecosystem response to sea level rise; conducted training workshops; implemented K-12 and public education programs; installed a water level observation station that is compliant with NOAA's National Water Level Observation Network; restored hydrologic flows at Gay's Point in the Stockport Flats component; and established itself as a regional leader in the design and implementation of living shorelines. The total number of acres within the reserve boundary is 5,000 acres. The revised management plan will serve as the guiding document for the Hudson River Reserve for the next five years.

NOAA's Office Coastal Management will be conducting an environmental analysis in accordance with the National Environmental Policy Act on the proposed approval of the Reserve's revised management plan. The public is invited to provide comment or information about any potential environmental impacts of the proposed action, and these comments will be used to inform the decision making process.

The Hudson River Reserve Management Plan revision may be viewed at: <https://www.dec.ny.gov/lands/4915.html>. Comments on the revision may be submitted to the Reserve's Manager, Heather Gierloff ([heather.gierloff@dec.ny.gov](mailto:heather.gierloff@dec.ny.gov)) by April 5, 2019.
