Consultation Under Section 106 of the National Historic Preservation Act

In accordance with the Advisory Council on Historic Preservation's implementing regulations for section 106 of the National Historic Preservation Act, the Commission is using this notice to initiate consultation with the applicable State Historic Preservation Office (SHPO), and to solicit their views and those of other government agencies, interested Indian tribes, and the public on the project's potential effects on historic properties.⁴ The EA for this project will document findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes, or who own homes within certain distances of aboveground facilities, and anyone who submits comments on the project. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that Commission notices related to this environmental review are sent to all individuals, organizations, and government entities interested in and/or potentially affected by the proposed project.

If the Commission issues the EA for an allotted public comment period, a *Notice of Availability* of the EA will be sent to the environmental mailing list and will provide instructions to access the electronic document on the FERC's website (www.ferc.gov). If you need to make changes to your name/address, or if you would like to remove your name from the mailing list, please return the attached Mailing List Update Form (appendix 2).

⁴ The Advisory Council on Historic Preservation's regulations are at Title 36, Code of Federal Regulations, Part 800. Those regulations define historic properties as any prehistoric or historic district, site, building, structure, or object included in or eligible for inclusion in the National Register of Historic Places.

Additional Information

Additional information about the project is available from the Commission's Office of External Affairs, at (866) 208-FERC, or on the FERC website at www.ferc.gov using the eLibrary link. Click on the eLibrary link, click on General Search and enter the docket number in the Docket Number field, excluding the last three digits (*i.e.*, CP19-51). Be sure you have selected an appropriate date range. For assistance, please contact FERC Online Support at FercOnlineSupport@ferc.gov or (866) 208-3676, or for TTY, contact (202) 502-8659. The eLibrary link also provides access to the texts of all formal documents issued by the Commission, such as orders, notices, and rulemakings.

Public sessions or site visits will be posted on the Commission's calendar located at www.ferc.gov/EventCalendar/EventsList.aspx along with other related information.

Dated: February 28, 2019.

[Project No. 2413-125]

Georgia Power Company; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission (Commission) regulations, 18 CFR part 380 (Order No. 486, 52 FR 47897), the Office of Energy Projects has reviewed an application submitted by Georgia Power Company (licensee) to allow Greenbriar Sand Company, in Greene County, Georgia, the use of Wallace Dam Hydroelectric (FERC No. 2413) project lands and waters to conduct hydraulic sand mining. The project is located at about river mile 173 on the Oconee River in the Altamaha River Basin in Putnam, Morgan, Oconee, Oglethorpe, Greene and Hancock counties, Georgia. The proposed sand mine would be operated by Greenbriar Sand Company and sited in Greene County. The project occupies federal land administered by the U.S. Forest Service, but the proposed sand mine will not operate on Forest Service land.

An Environmental Assessment (EA) has been prepared as part of

Commission staff's review of the proposal. In the application, Greenbriar Sand anticipates removing 1,336 acre feet of sand by dredging at an average depth of four feet within 334 acres of the project reservoir, over the life of the operation. The dredge would pump sand to a 14 acre processing area outside of the project area. This EA contains Commission staff's analysis of the probable environmental impacts of the proposed action and concludes that approval of the proposal would not constitute a major federal action significantly affecting the quality of the human environment.

The EA is available for electronic review and reproduction at the Commission's Public Reference Room, located at 888 First Street NE, Room 2A, Washington, DC 20426. The EA may also be viewed on the Commission's website at <http://www.ferc.gov> using the eLibrary link. Enter the docket number (P-2413) in the docket number field to access the document. For assistance, contact FERC Online Support at FERCOnlineSupport@ferc.gov or toll-free at (866) 208-3372 or for TTY, (202) 502-8659.

For further information, contact Michael Calloway at (202) 502-8041 or by email at michael.calloway@ferc.gov.

[Docket Nos. CP17-494-000, CP17-495-000]

Pacific Connector Gas Pipeline LP; Jordan Cove Energy Project L.P.; Notice of Revised Schedule for the Environmental Review and the Final Order for the Jordan Cove Energy Project

This notice identifies the Federal Energy Regulatory Commission (Commission) staff's revised schedule for the completion of the environmental impact statement (EIS) for the Jordan Cove Energy Project. The first notice of schedule, issued on August 31, 2018, identified August 30, 2019 as the final EIS issuance date. The previous notice states, however, that the forecasted schedule assumes that the cooperating agencies will provide input on their areas of responsibility on a timely basis. Due to the funding lapse at certain
