

data in the desired format. ED is soliciting comments on the proposed information collection request (ICR) that is described below. The Department of Education is especially interested in public comment addressing the following issues: (1) Is this collection necessary to the proper functions of the Department; (2) will this information be processed and used in a timely manner; (3) is the estimate of burden accurate; (4) how might the Department enhance the quality, utility, and clarity of the information to be collected; and (5) how might the Department minimize the burden of this collection on the respondents, including through the use of information technology. Please note that written comments received in response to this notice will be considered public records.

Title of Collection: Supporting Excellence in Adult Education.

OMB Control Number: 1830-NEW.

Type of Review: A new information collection.

Respondents/Affected Public: State, Local, and Tribal Governments.

Total Estimated Number of Annual Responses: 18.

Total Estimated Number of Annual Burden Hours: 110.

Abstract: The purpose of this information collection request is to identify and document innovative practices in adult education and literacy that are associated with positive outcomes for adult learners so that they may be disseminated to adult education programs. The U.S. Department of Education will analyze the information that is collected about adult education programs and the outcomes they achieve to identify innovative practices that merit dissemination to the field.

Dated: March 6, 2019.

DEPARTMENT OF ENERGY

Energy Information Administration

Proposed Agency Information Collection

AGENCY: U.S. Energy Information Administration (EIA), Department of Energy.

ACTION: Notice.

SUMMARY: EIA submitted an information collection request for extending, with changes, the Oil and Gas Reserves Survey Program pursuant to the Paperwork Reduction Act of 1995. The information collection requests a three-year extension of Form EIA-64A, *Annual Report of the Origin of Natural Gas Liquids Production*; Form EIA-23L, *Annual Report of Domestic Oil and Gas Reserves*; and Form EIA-23S, *Annual Survey of Domestic Oil and Gas Reserves, Summary Level Report*. The information collected is used to develop accurate national and regional estimates of proved reserves of domestic crude oil and natural gas.

DATES: Comments regarding this collection must be received on or before April 11, 2019. If you anticipate any difficulties in submitting your comments by the deadline, contact the DOE Desk Officer at (202) 395-0710.

ADDRESSES: Written comments should be sent to the DOE Desk Officer: Brandon DeBruhl, Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Room 10102, 735 17th Street NW, Washington, DC, 20503. Brandon_F_DeBruhl@omb.eop.gov; And to Steven G. Grape, U.S. Energy Information Administration, Mail Stop EI-24, Forrestal Building 1000 Independence Avenue SW, Washington, DC 20585, Steven.Grape@eia.gov.

FOR FURTHER INFORMATION CONTACT: Steven G. Grape, (202) 586-1868, email at Steven.Grape@eia.gov.

SUPPLEMENTARY INFORMATION: This information collection request contains:

(1) *OMB No. 1905-0057*;

(2) *Information Collection Request Title: Oil and Gas Reserves System*;

(3) *Type of Request:* Three-year extension with changes.

(4) *Purpose:* Forms EIA-23L and EIA-23S provide accurate national and regional data on the proved reserves of crude oil, natural gas, and natural gas liquids (NGL). Form EIA-64A provides data that are used to estimate natural gas plant liquids production and reserves by state and federal offshore regions.

(4a) *Changes to Information Collection:*

Changes to Form EIA-23L:

- Coalbed methane is deleted as a response category choice for *Type Code* reported in section 2. Fields previously classified as coalbed methane will be merged into the conventional gas category.

Changes to Form EIA-64A:

- Collect the total outlet volume of residue natural gas and the volume of residue natural gas sent to a pipeline.
- Collect the amount of electricity consumed annually at the natural gas plant (a growing percentage of natural gas processing plants are 100% electrically-powered rather than consuming any of the natural gas received for processing as fuel, because of air quality restrictions imposed on sources of combustion emissions).

- Collect an annual total of natural gas liquids by components or products produced at the natural gas processing plant in Section 3 of Form EIA-64A, rather than requesting only total plant NGL volume reported in Line 4.8.

- Delete Item 5.0 Gas Shrinkage Resulting from Natural Gas

Liquids Extracted. Operators no longer need to calculate their own estimate of the volumes of gas shrinkage in millions of cubic feet (MMCF) resulting from the removal of natural gas liquids from the natural gas received at the plant. The shrinkage volumes will now be calculated automatically by EIA using the component data from Section 3.

(5) *Annual Estimated Number of Respondents:* 1,600 total respondents: Form EIA-23L consist of 500 respondents.

Form EIA-23S consist of 500 respondents.

Form EIA-64A consist of 600 respondents.

(6) *Annual Estimated Number of Responses:* 1,600 total responses.

(7) *Annual Estimated Number of Burden Hours:* 28,800 hours.

(8) *Annual Estimated Reporting and Recordkeeping Cost Burden:* The cost of burden hours to the respondents is estimated to be \$ 2,131,776 (28,800 burden hours times \$74.02 per hour).

EIA estimates that there are no additional costs to respondents

associated with the surveys other than the cost associated with the burden hours.

Statutory Authority: 15 U.S.C. 772(b).

Signed in Washington, DC, on March 5, 2019.

Nanda Srinivasan,

Director, Office of Survey Development and Statistical Integration, U.S. Energy Information Administration.
