SUPPLEMENTARY INFORMATION: CPSC seeks to renew the following currently approved collection of information:

Title: Safety Standard for Walk-Behind Power Lawn Mowers.

OMB Number: 3041-0091.

Type of Review: Renewal of collection.

Frequency of Response: On occasion.

Affected Public: Manufacturers and importers of walk-behind power lawn mowers.

Estimated Number of Respondents: Approximately 25 manufacturers and importers of walk-behind power lawn mowers.

Estimated Time per Response: Walk-behind power lawn mowers are manufactured seasonally to meet demand. They are manufactured during an estimated 130 days out of the year. When they are manufactured, firms are required to test and maintain records of those tests. Staff estimates three hours daily for testing and recordkeeping per firm totaling 390 hours per firm (3 hours × 130 days). In addition, to produce labels and apply labels on the newly manufactured lawn mowers, staff estimates one hour daily for each firm during the production cycle for a total of 130 hours per firm (1 hour × 130 days).

Total Estimated Annual Burden: 9,750 hours on testing and recordkeeping (25 firms × 390 hours) and 3,250 hours for labeling (25 firms × 130 hours). Aggregate annual burden hours related to testing, recordkeeping, and labeling are estimated to be 520 hours per firm and 13,000 hours for the industry.

General Description of Collection: In 1979, the Commission issued the Safety Standard for Walk-Behind Power Lawn Mowers (16 CFR part 1205) to address

blade contact injuries. Subpart B of the standard sets forth regulations prescribing requirements for a reasonable testing program to support certificates of compliance with the standard for walk-behind power lawn mowers. 16 CFR part 1205, subpart B.

In addition, section 14(a) of the CPSA (15 U.S.C. 2063(a)) requires manufacturers, importers, and private labelers of a consumer product subject to a consumer product safety standard to issue a certificate stating that the product complies with all applicable consumer product safety standards. Section 14(a) of the CPSA also requires that the certificate of compliance must be based on a test of each product or upon a reasonable testing program. The information collection is necessary because these regulations require manufacturers and importers to establish and maintain records to demonstrate compliance with the requirements for testing and labeling to support the certification of compliance.
