## II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, “Nuclear Material Events Database (NMED) for the Collection of Event Report, Response, Analyses, and Follow-Up Data on Events Involving the Use of Atomic Energy Act (AEA) Radioactive Byproduct Material.”

The NRC hereby informs potential respondents that an agency may not

conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on September 10, 2018 (83 FR 45695).

1. *The title of the information collection*: “Nuclear Material Events Database (NMED) for the Collection of Event Report, Response, Analyses, and Follow-up Data on Events Involving the Use of Atomic Energy Act (AEA) Radioactive Byproduct Material.”

2. *OMB approval number*: 3150–0178.

3. *Type of submission*: Extension.

4. *The form number if applicable*: NA.

5. *How often the collection is required or requested*: Agreement States are requested to provide copies of licensee nuclear material event reports electronically or by hard copy to the NRC within 30 days of receipt from their licensee. In addition, Agreement States are requested to report events that may pose a significant health and safety hazard to the NRC Headquarters Operations Officer within 24 hours of notification by an Agreement State licensee.

6. *Who will be required or asked to respond*: Current Agreement States and any State receiving Agreement State status in the future.

7. *The estimated number of annual responses*: 450.

8. *The estimated number of annual respondents*: 39.

9. *An estimate of the total number of hours needed annually to comply with the information collection requirement or request*: 720 hours.

10. *Abstract*: NRC regulations require NRC licensees to report incidents and overexposures, leaking or contaminated sealed source(s), release of excessive contamination of radioactive material, lost or stolen radioactive material, equipment failures, abandoned well logging sources and medical events. Agreement State licenses are also required to report these events to their individual Agreement State regulatory authorities under compatible Agreement State regulations. The NRC is requesting that the Agreement States provide information to NRC on the initial notification, response actions, and follow-up investigations on events involving the use (including suspected theft or terrorist activities) of nuclear materials regulated pursuant to the Atomic Energy Act. The event information should be provided in a uniform electronic format, for assessment and identification of any facilities/site specific or generic safety concerns that could have the potential

to impact public health and safety. The identification and review of safety concerns may result in lessons learned, and may also identify generic issues for further study which could result in proposals for changes or revisions to technical or regulatory designs, processes, standards, guidance or requirements.

Dated at Rockville, Maryland, on March 11, 2019.

For the Nuclear Regulatory Commission.
