A fuller description of the ICR is given below, including its estimated burden and cost to the public. An agency may neither conduct nor sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

DATES: Additional comments may be submitted on or before April 17, 2019.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Polyvinyl Chloride and Copolymers Production (40 CFR part 63, subpart HHHHHHH) apply to both existing and new PVC production facilities. Area source PVC facilities are subject to 40 CFR part 63, subpart DDDDDDD and not covered in this ICR. New facilities include those that commenced construction or reconstruction after the date of proposal. In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP. This information is being collected to assure compliance with 40 CFR part 63, subpart HHHHHHH.

Form Numbers: None.

Respondents/affected entities: Polyvinyl chloride and copolymer production facilities that are major sources of HAP.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart HHHHHHH).

Estimated number of respondents: 15 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 338,000 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$45,500,000 (per year), which includes \$7,060,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is a decrease in the burden hours in this

ICR, compared to the previous ICR, due to a decrease in the number of respondents. In addition, there is an increase in operation and maintenance costs due to updated cost estimates for process vent testing, which were provided by the Vinyl Institute.

Courtney Kerwin,

Director, Regulatory Support Division.

Issuance of a NPDES General Permit for Offshore Seafood Processors in Federal Waters Off the Coast of Washington and Oregon; Permit Number WAG520000

AGENCY: Environmental Protection Agency.

ACTION: Final NPDES General Permit.

SUMMARY: The Environmental Protection Agency (EPA) Region 10 is issuing a National Pollutant Discharge Elimination System (NPDES) General Permit to seafood processing vessels that discharge in Federal Waters off the coast of Washington and Oregon. The General Permit will authorize discharges of seafood processing waste from the vessels. This is the first issuance of this General Permit, and the first time this sector has received NPDES permit coverage off the coast of Oregon and Washington.

DATES: The issuance date of the General Permit is March 18, 2019, the date of publication of this notice. The General Permit will become effective on May 1, 2019.

ADDRESSES: Copies of the General Permit and Response to Comments are available upon request at the following address: USEPA Region 10, 1200 Sixth Avenue, Suite 155, OWW-191, Seattle, WA 98101. Electronic requests may be mailed to: Washington.audrey@epa.gov.

FOR FURTHER INFORMATION CONTACT: Technical Information: Joseph Ziobro at (206) 553-2723 ziobro.joseph@epa.gov. The General Permit, Response to Comments, and supporting documents may be found on the Region 10 website at: <https://www.epa.gov/npdes-permits/proposed-mpdes-general-permit-offshore-seafood-processors-federal-waters-coast>.

SUPPLEMENTARY INFORMATION:

General Information

The NPDES General Permit authorizes discharges of seafood processing waste

from seafood processing vessels that discharge in Federal Waters off the coast of Washington and Oregon. Federal Waters are defined as waters that are located between 3 and 200 miles from the land or baseline. The General Permit does not authorize discharges within the State of Washington or State of Oregon waters, this includes water within three miles of the land (*i.e.*, the State's territorial waters). The State of Washington and the State of Oregon are the permitting authorities for these state waters.

The EPA completed two public comment periods for the draft General Permit. The first comment period was from August 24, 2015 to October 8, 2015 (80 FR 51253, August 24, 2015). Based on the comments received during the public comment period, the EPA revised the draft General Permit. The EPA took comment on those revisions during a second comment period from June 6, 2017 to August 3, 2017 (82 FR 27817, June 6, 2017).

This will be the first issuance of this General Permit. The offshore seafood processing operators requested NPDES permit coverage for operations discharging off the coast of Washington and Oregon, since these vessels are currently discharging without a permit in this area. The vessels that will be covered under this Permit are catcher-processors and motherships. These vessels fish and process the fish caught concurrently.

Regulatory Action

This action is not significant and was therefore not submitted to the Office of Management and Budget (OMB) for review under Executive Orders 12866, Regulatory Planning and Review, and 13563, Improving Regulation and Regulatory Review.

Coastal Zone Management Act—Federal Consistency Determination

Beginning in 2016, the EPA began engaging with the Washington Department of Ecology (Washington) and the Oregon Department of Land Conservation and Development (Oregon) in Coastal Zone Management Act (CZMA) consistency review pursuant to Section 307 of the CZMA and its implementing regulations at 15 CFR part 930, subpart C. In June 2017, the EPA provided the Washington Department of Ecology and Oregon Department of Land Conservation and Development with a Federal Consistency Determination for the permit action. The EPA determined that the General Permit is fully consistent
