

malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP. This information is being collected to assure compliance with 40 CFR part 63, subpart NNNN.

Form Numbers: None.

Respondents/affected entities:

Facilities that perform surface coating of large household and commercial appliances and related parts.

Respondent's obligation to respond:

Mandatory (40 CFR part 63, subpart NNNN).

Estimated number of respondents: 10 (total).

Frequency of response: Initially, occasionally, and semiannually.

Total estimated burden: 3,870 hours (per year). Burden is defined as 5 CFR 1320.3(b).

Total estimated cost: \$429,000 (per year), which includes \$5,400 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is an adjustment decrease in the total estimated burden as currently identified in the OMB Inventory of Approved Burdens. This increase is not due to any program changes. The change in the burden and cost estimates occurred due to a decrease in the total number of facilities subject to the NESHAP. The estimate is based on EPA's recent reevaluation of the source category inventory associated with the recently-proposed amendments to 40 CFR part 63, subpart NNNN (83 FR 46262, September 12, 2018). Per EPA's reevaluation, the number of respondents in the source category has decreased from the estimates in the 2002 final rule because the final rule included assumptions regarding several facilities that were not major sources of HAP.

Additionally, there have been changes within the large appliance surface coating industry that result in fewer facilities being subject to the NESHAP. For example, many facilities that used liquid coatings have switched to powder coatings, or have switched to plastic parts and stainless steel instead of painted steel parts, or are using precoated metal coils instead of coating finished parts. As a result, there is a much smaller number of major sources. In addition to the burden decrease from the decreased number of respondents, there is also a burden decrease in the operating and maintenance costs due to the determination that only one affected source uses an emission control device to comply with the NESHAP. These

changes result in an overall decrease in the labor hours O&M costs, and number of responses.

Courtney Kerwin,

Director, Regulatory Support Division.

Meetings of the Local Government Advisory Committee and the Small Communities Advisory Subcommittee

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Local Government Advisory Committee (LGAC) will meet in Washington, DC, on Thursday, May 2, 2019, 9:30 a.m.–5:35 p.m. (EDT), and Friday, May 3, 2019, 10:00 a.m.–12:30 p.m. (EDT). The focus of the Committee meeting will be on issues pertaining to water and water infrastructure issues; Waters of the U.S., emerging contaminants; superfund and brownfields; risk communication and other issues in EPA's Strategic Plan. The Small Communities Advisory Subcommittee (SCAS) will meet in Washington, DC, on Friday, May 3, 2019, 8:00 a.m.–9:00 a.m. (EDT). The Subcommittee will discuss water infrastructure, community revitalization, agricultural issues, and other issues and recommendations to the Administrator regarding environmental issues affecting small communities.

These are open meetings, and all interested persons are invited to participate. The SCAS will hear comments from the public between 8:40 a.m. and 8:45 a.m. on Friday, May 3, 2019. The LGAC will hear comments from the public between 10:20 a.m. and 10:30 a.m. on Friday, May 3, 2019. Individuals or organizations wishing to address the Subcommittee or the

Committee will be allowed a maximum of five minutes to present their point of view. Also, written comments should be submitted electronically to eargle.frances@epa.gov for the LGAC and to mercurio.cristina@epa.gov for the SCAS. Please contact the Designated Federal Officers (DFO) at the numbers listed below to schedule a time on the agenda. Time will be allotted on a first-come first-serve basis, and the total period for comments may be extended if the number of requests for appearances requires it.

ADDRESSES: The Local Government Advisory Committee meetings will be held at the U.S. Environmental Protection Agency, Conference Room 1153, William Jefferson Clinton EPA East Building, 1201 Constitution Avenue NW, Washington, DC 20460. The Small Communities Advisory Subcommittee meetings will be held at the U.S. Environmental Protection Agency, Conference Room 1153, William Jefferson Clinton EPA East Building, 1201 Constitution Avenue NW, Washington, DC 20460. Meeting summaries will be available after the meeting online at www.epa.gov/ocir/scas_lgac/lgac_index.htm and can be obtained by written request to the DFO. In the event of cancellation for unforeseen circumstances, please contact the the designated federal officer(s) for reschedule information.

FOR FURTHER INFORMATION CONTACT: Local Government Advisory Committee (LGAC) contact Frances Eargle, Designated Federal Officer, at (202) 564-3115 or email at eargle.frances@epa.gov and Small Communities Advisory Subcommittee (SCAS), contact Cristina Mercurio, Designated Federal Officer, at (202) 564-6481 or email at mercurio.cristina@epa.gov.

Information on Services for Those With Disabilities: For information on access or services for individuals with disabilities, please contact Frances Eargle at (202) 564-3115 or email at eargle.frances@epa.gov. To request accommodation of a disability, please request it 10 days prior to the meeting, to give EPA as much time as possible to process your request.

Dated: March 11, 2019.

Jack Bowles,

Director, State and Local Relations, Office of Congressional and Intergovernmental Relations.

BILLING CODE 6560-50-P

ENVIRONMENTAL PROTECTION AGENCY

[FRL-9990-96-ORD]

Ambient Air Monitoring Reference and Equivalent Methods; Designation of One New Equivalent Method

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of the designation of a new equivalent method for monitoring ambient air quality.

SUMMARY: Notice is hereby given that the Environmental Protection Agency (EPA) has designated one new equivalent method for measuring concentrations of ozone (O₃) in ambient air.

FOR FURTHER INFORMATION CONTACT: Robert Vanderpool, Exposure Methods and Measurement Division (MD-D205-03), National Exposure Research Laboratory, U.S. EPA, Research Triangle Park, North Carolina 27711. Phone: 919-541-7877. Email: Vanderpool.Robert@epa.gov.

SUPPLEMENTARY INFORMATION: In accordance with regulations at 40 CFR part 53, the EPA evaluates various methods for monitoring the concentrations of those ambient air pollutants for which EPA has established National Ambient Air Quality Standards (NAAQS) as set forth in 40 CFR part 50. Monitoring methods that are determined to meet specific requirements for adequacy are designated by the EPA as either reference or equivalent methods (as applicable), thereby permitting their use under 40 CFR part 58 by States and other agencies for determining compliance with the NAAQS. A list of all reference or equivalent methods that have been previously designated by EPA may be found at <http://www.epa.gov/ttn/amtic/criteria.html>.

The EPA hereby announces the designation of one new equivalent method for measuring concentrations of O₃ in ambient air. This designation is made under the provisions of 40 CFR part 53, as amended on October 26, 2015 (80 FR 65291-65468).

The new equivalent method for O₃ is an automated method (analyzer) utilizing the measurement principle based on UV photometry. This newly designated equivalent method is identified as follows:

EQOA-0219-251, "KENTEK Inc. Model MEZUS 410 O₃ Analyzer," UV photometric analyzer operated in a range of 0-0.5 ppm, with 0.5 μm, 47 mm diameter Teflon® filter installed, operated at temperatures between 20 °C

and 30 °C, with temperature and pressure compensation, at a nominal sampling flow rate of 800 cc/min, using a 5 minute averaging time, with either 105VAC-125VAC or 200VAC-240VAC input power options installed, 230-watt power consumption, equipped with 7 inch LCD touch screen display, and operated according to the KENTEK Inc. Model MEZUS 410 Ozone Analyzer User's Instruction Manual.

This application for a reference method determination for this O₃ method was received by the Office of Research and Development on January 29, 2019. This analyzer is commercially available from the applicant, Kentek Inc., Hansin S-MECA 65, Techno 3-ro, Yuseong-gu, Daejeon 34016, Korea.

A representative test analyzer was tested in accordance with the applicable test procedures specified in 40 CFR part 53, as amended on October 26, 2015. After reviewing the results of those tests and other information submitted by the applicant, EPA has determined, in accordance with part 53, that this method should be designated as an equivalent method.

As a designated equivalent method, this method is acceptable for use by states and other air monitoring agencies under the requirements of 40 CFR part 58, Ambient Air Quality Surveillance. For such purposes, this method must be used in strict accordance with the operation or instruction manual associated with the method and subject to any specifications and limitations (e.g., configuration or operational settings) specified in the designated method description (see the identification of the method above).

Use of the method also should be in general accordance with the guidance and recommendations of applicable sections of the "Quality Assurance Handbook for Air Pollution Measurement Systems, Volume I," EPA/600/R-94/038a and "Quality Assurance Handbook for Air Pollution Measurement Systems, Volume II, Ambient Air Quality Monitoring Program," EPA-454/B-13-003, (both available at <http://www.epa.gov/ttn/amtic/qalist.html>). Provisions concerning modification of such methods by users are specified under Section 2.8 (Modifications of Methods by Users) of Appendix C to 40 CFR part 58.

Consistent or repeated noncompliance with any of these conditions should be reported to: Director, Exposure Methods and Measurement Division (MD-E205-01), National Exposure Research Laboratory, U.S. Environmental Protection Agency, Research Triangle Park, North Carolina 27711.
