

years for manufacturers of child seats and tires) the underlying records related to early warning reporting (EWR) information submitted under 49 CFR part 579. The information collected supports NHTSA's goal of improving highway safety.

The total burden hours for this estimate consist of:

(1) Approximately 1,000 manufacturers of vehicles and equipment (including tires, child restraint systems and trailers) are required to maintain records.

(2) We estimate their burden at 40 hours each for a subtotal of 40,000 hours (1,000 respondents × 40 hours).

(3) In addition, we estimate that an additional 20 equipment manufacturers have record retention requirements imposed by Part 576, limited to the submission of death reports. Based on recent year's counts of death reports received by NHTSA, we estimate that it will take one hour each to maintain the necessary records for a subtotal burden of 20 hours (20 respondents × one hour).

Accordingly, the estimate of total annual burden hours is 40,020 hours (1,000 respondents × 40 hours + 20 respondents × 1 hour).

NHTSA estimates that the hourly cost associated with the burden hours of 40,020 is approximately \$20 per hour, consisting of both computer time and clerical time. Accordingly, the agency estimates that the total annual costs associated with the burden hours is \$800,400 (40,020 annual burden hours × \$20 per hour).
