**SUPPLEMENTARY INFORMATION:**

**I. Background**

The Institute of Museum and Library Services is the primary source of federal support for the nation's libraries and museums. We advance, support, and empower America's museums, libraries, and related organizations through grant making, research, and policy development. Our vision is a nation where museums and libraries work together to transform the lives of individuals and communities. To learn more, visit [www.imls.gov](http://www.imls.gov).

**II. Current Actions**

The *Museums for Digital Learning* (MDL) is a project funded by IMLS that seeks to identify and test new ways that digitized museum collections can be made available in the form of engaging digital educational resources via a pilot digital platform to educators around the country seeking to engage their students with all subjects. This two-year project is being led by the Indianapolis Museum of Art at Newfields in collaboration with two museum content partners—The Field Museum and History Colorado and a team of K–12 educators. Once the pilot suite of online products has been created by the project team, they will be tested in the classrooms of the ten educational partners. Testing and validation of the content contribution approach and standard templates to the pilot platform will be conducted with a cohort of up

to ten additional museums of various sizes and disciplines.

This project aligns with IMLS's strategic goal and priorities of building the digital capacity of the sector. MDL will catalyze and empower museums to come together and create a national model with a shared vision to thoughtfully assess some of the critical gaps in the current platforms and digital access/use models, and then leverage the power of a shared digital platform to provide easy-to-access, interdisciplinary, and dynamic content from museums in digital format for educators and students.

The project will benefit the national education sector by providing a model for museums to collaborate as a sector with educators and engaging them not just as users of museum content and services, but as co-creators and co-facilitators of student learning; a suite of curriculum enhancing and student-centric digital collections-based educational resources; and an opportunity to pilot-test and improve the resources from the formative evaluation to better meet the needs of the nation's learners.

A product and process evaluation of the MDL project will be completed by a third party evaluator with experience in evaluating digital education platforms produced by the cultural heritage community. The process evaluation aspect will assess the overall planning and implementation of the collaborative model of MDL between the partner museums and the educators, as well as the effectiveness of the training and ease of content contribution of the ten additional museums. Much of the front-end and user experience design of the MDL platform will be formed through the collaboration and co-creation process between the cooperator, lead museum content partners, and the team of educators. The product evaluation will assess the ease of access and educational value of the collections-based digital education products for educators and students.

This action is to create the overall evaluation plan, survey and data collection instruments and instructions for the various evaluation techniques to be used at different points in the development and implementation of the MDL pilot initiative for the next two years.
