

The NASA-administered areas of SSFL contain cultural resources associated with rocket engine development, along with several significant archeological sites. NASA has conducted several surveys to locate archeological and architectural resources within its administered portion of SSFL. NASA has identified the Burro Flats Site, which is listed on the National Register of Historic Places (NRHP), as well as various archeological sites, buildings, and structures that are either individually eligible for listing on the NRHP or are elements of NRHP-eligible historic districts containing multiple architectural resources. In 2014, NASA entered into a Programmatic Agreement with the California State Historic Preservation Officer, the Advisory Council for Historic Preservation, and the Santa Ynez Band of Chumash Indians. The Programmatic Agreement stipulates the cultural resource management measures that must be implemented before, during, and after all cleanup activities. Previous environmental sampling on the NASA-administered property indicates that contaminants are present in the soil and groundwater at the site.

Environmental Commitments and Associated Environmental Review: Rocket engine testing has been discontinued at these sites and the property has been excessed to the General Services Administration (GSA). GSA has conditionally accepted the Report of Excess pending certain environmental cleanup requirements are met.

In 2007, a Consent Order among NASA, Boeing, the U.S. Department of Energy, and DTSC was signed addressing demolition of certain infrastructure and environmental cleanup of SSFL. NASA entered into an Administrative Order on Consent (AOC) for Remedial Action with DTSC on December 6, 2010, "to further define and make more specific NASA's obligations with respect to the cleanup of soils at the Site." Based on the 2010 Order, NASA is required to complete a federal environmental review pursuant to NEPA and NASA Procedural Requirement (NPR) 8580.1.

NASA published an FEIS for demolition of site infrastructure, soil cleanup pursuant to the AOC, and groundwater remediation within Area II and a portion of Area I (former LOX Plant) of SSFL on March 14, 2014 (79 FR 14545). NASA subsequently issued a Record of Decision (ROD) for building demolition on April 23, 2014. A ROD for groundwater cleanup was published in the **Federal Register** on October 19, 2018. A SEIS is being prepared by

NASA for soil cleanup within Area II and a portion of Area I (former LOX Plant) of SSFL.

NASA anticipates that the potential environmental impacts of the soil cleanup of most interest to the public are likely public health; soil removal/erosion; soil transportation and disposal; threatened, endangered, and sensitive species; habitat and wetlands; cultural and historic resources; air quality and greenhouse gas emissions; and groundwater, surface water, or geologic structures.

During the SEIS process, the public will be provided an opportunity for involvement at the publication of the Draft SEIS. The Notice of Availability for the Draft SEIS, Final SEIS, and ROD will be published in the **Federal Register** and through local news media to ensure that all members of the public have the ability to actively participate in the NEPA process.

Cheryl E. Parker,
Federal Register Liaison Officer.
