SUPPLEMENTARY INFORMATION:

I. Abstract

NMFS manages non-commercial fishing activities in the Rose Atoll Marine, Marianas Trench, and Pacific Remote Islands Marine National Monuments. Regulations at 50 CFR part 665 require the owner and operator of a vessel used to non-commercially fish

for, take, retain, or possess any management unit species in these monuments to hold a valid permit issued by NMFS.

Regulations also require the owner and operator of a vessel that is chartered to fish recreationally for, take, retain, or possess, any management unit species in these monuments to hold a valid permit issued by NMFS. The fishing vessel must be registered to the permit. The charter business must be established legally in the permit area where it will operate. Charter vessel clients are not required to have a permit.

The permit application collects basic information about the permit applicant, type of operation, vessel, and permit area. NMFS uses this information to confirm the identity of the applicant and determine permit eligibility. The information is important for understanding the nature of the fishery and its participants. It also aids in the enforcement of fishing regulations within the monuments.

Regulations also require the vessel operator to report a complete record of catch, effort, and other data on a NMFS log sheet. The vessel operator must record all requested information on the log sheet within 24 hours of the completion of each fishing day. The vessel operator also must sign, date, and submit the form to NMFS within 30 days of the end of each fishing trip. NMFS uses the information provided in the log sheets to monitor fishing activities, evaluate and assess the status of fish stocks and determine whether changes in management are needed to sustain the productivity of the fishery and conserve marine resources.
