Title: Facility Access Media (FAM) Request (changing from Identification Card Request).

OMB number: 3095-0057.

Agency form numbers: NA Form 6006.

Type of review: Regular.

Affected public: Individuals or households.

Estimated number of respondents: 1,500.

Estimated time per response: 3 minutes.

Frequency of response: On occasion.
Estimated total annual burden hours: 75.

Abstract: All people requiring recurring access to non-public areas of NARA's facilities and IT network ("applicants") use the Facility Access Media (FAM) Request, NA Form 6006, to request and obtain NARA facility access media (FAM). This includes NARA employees, contractors, volunteers, NARA-related foundation

employees and volunteers, interns, and other non-NARA Federal employees, such as Federal agency reviewers. After NARA approves the request, we provide the applicant with a FAM, and they are then able to access non-public areas of NARA facilities and IT network.

We must collect their personally identifying information to comply with Homeland Security Presidential Directive (HSPD)-12 requirements for secure and reliable forms of personal identification issued by Federal agencies to their employees, contractors, and other individuals requiring recurring access to non-public areas of Government facilities and information services. We are changing the form and the information collection (name and some of the content) from “identification card” to “facility access media” to comply with changes in Government-wide terminology so that the request refers to all types of access media, not just identification cards.

Southern Nuclear Operating Company, Inc.; Vogtle Electric Generating Plant, Units 3 and 4; Administrative Changes To Align Initial Test Program With Regulatory Guide 1.68

AGENCY: Nuclear Regulatory Commission.

ACTION: Exemption and combined license amendment; issuance.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is granting an exemption to allow a departure from the certification information of Tier 1 of the generic design control document (DCD) and is issuing License Amendment No. 154 for Unit 3 and No. 153 for Unit 4 to Combined Licenses (COLs), NPF-91 and NPF-92. The COLs were issued to Southern Nuclear Operating Company, Inc., and Georgia Power Company, Oglethorpe Power Corporation, MEAG Power SPVM, LLC, MEAG Power SPVJ, LLC, MEAG Power SPVP, LLC, and the City of Dalton, Georgia (collectively SNC); for construction and operation of the Vogtle Electric Generating Plant (VEGP) Units 3 and 4, located in Burke County, Georgia.

The granting of the exemption allows the changes to Tier 1 information asked

for in the amendment. Because the acceptability of the exemption was determined in part by the acceptability of the amendment, the exemption and amendment are being issued concurrently.

DATES: The exemption and amendment were issued on February 22, 2019.

SUPPLEMENTARY INFORMATION:

I. Introduction

The NRC is granting an exemption from paragraph B of section III, “Scope and Contents,” of appendix D, “Design Certification Rule for the AP1000,” to part 52 of title 10 of the *Code of Federal Regulations* (10 CFR), and issuing

License Amendment Nos. 154 and 153 to COLs, NPF-91 and NPF-92, to SNC. The exemption is required by paragraph A.4 of Section VIII, “Processes for Changes and Departures,” appendix D, to 10 CFR part 52 to allow SNC to depart from Tier 1 information. With the requested amendment, SNC sought proposed changes in the form of departures from the generic AP1000 DCD Tier 1 and Tier 2 information in the VEGP COL plant-specific Tier 1 plant-specific DCD (PS-DCD) and the Tier 2 Updated Final Safety Analysis Report (UFSAR) to reflect revision of the description and scope of the Initial Test Program (ITP) to remove component testing as a separately identified program or phase of the ITP. Additionally, preoperational and startup test specifications were proposed to be removed from the ITP. The amendment also proposed corresponding changes to the COL license conditions that referenced UFSAR sections impacted by the changes. The changes align plant-specific Tier 1, Section 3.4 descriptions for ITP with Regulatory Guide (RG) 1.68, “Initial Test Programs for Water-Cooled Nuclear Power Plants,” Revision 3. These changes involve a revision to Section 2.D(10) and 2.D(12) of the COL conditions for VEGP Units 3 and 4 and, UFSAR Table 13.4-201 and Section 14.2.

Part of the justification for granting the exemption was provided by the review of the amendment. Because the exemption is necessary in order to issue the requested license amendment, the NRC granted the exemption and issued the amendment concurrently, rather than in sequence. This included issuing a combined safety evaluation containing the NRC staff's review of both the exemption request and the license amendment. The exemption met all applicable regulatory criteria set forth in §§ 50.12, 52.7, and section VIII.A.4 of appendix D to 10 CFR part 52. The license amendment was found to be acceptable as well. The combined safety evaluation is available in ADAMS under Accession No. ML19035A763.

Identical exemption documents (except for referenced unit numbers and license numbers) were issued to SNC for VEGP Units 3 and 4 (COLs NPF-91 and NPF-92). The exemption documents for VEGP Units 3 and 4 can be found in ADAMS under Accession Nos. ML19035A761 and ML19035A762, respectively. The exemption is reproduced (with the exception of abbreviated titles and additional citations) in Section II of this document. The amendment documents for COLs NPF-91 and NPF-92 are available in ADAMS under Accession Nos.
