

prevention interventions, relatively little scientific or systematic work has been done to describe the nature and level of fatal violence associated with schools. Until NCIPC conducted the first nationwide investigation of violent deaths associated with schools, public health and education officials had to rely on limited local studies and estimated numbers to describe the extent of school-associated violent death.

SAVD is an ongoing surveillance system that draws cases from the entire United States in an attempt to capture all cases of school-associated violent deaths that have occurred. Investigators review public records and published press reports concerning each school-associated violent death. For each identified case, investigators also contact the corresponding law enforcement agency and speak with an official in order to confirm or reject the case as an SAVD, and to request a copy

of the official law enforcement report for confirmed SAVD cases.

In past years, investigators would interview an investigating law enforcement official (defined as a police officer, police chief, or district attorney), and a school official (defined as a school principal, school superintendent, school counselor, school teacher, or school support staff) who were knowledgeable about the case in question; however, moving forward, the interviews with these respondents will be eliminated, and instead CDC study personnel will abstract data from law enforcement reports to enter using a Data Abstraction Tool. Data to be abstracted from the law enforcement report include the following: Information on both the victim and alleged offender(s)—including demographic data, their criminal records, and their relationship to one another; the time and location of the incident precipitating the fatality; the circumstances, motive, and method of the fatal injury; and the security and

violence prevention activities in the school and community where the death occurred, before and after the fatal injury event. The revised data collection process eliminating the use of telephone interviews will reduce respondents' burden greatly.

All data are secured through the use of technical, physical, and administrative controls. Hard copies of data are kept under lock and key in secured offices, located in a secured facility that can be accessed only by presenting the appropriate credentials. Digital data are password protected and then stored (and backed up routinely) onto a secure Local Area Network that can only be accessed by individuals who have been appropriately authorized. Study data are reported in the aggregate, such that no individual case can be identified from the reports. There are no costs to the respondents other than their time. The total estimated annual burden hours are 17.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Law Enforcement Officer .....	Law Enforcement Case Confirmation Script ..	50	1	5/60
	Letter to Local Law Enforcement Officials .....	50	1	15/60

**Notice of Closed Meeting: Disease, Disability, and Injury Prevention and Control Special Emphasis Panel**

Pursuant to section 10(d) of the Federal Advisory Committee Act, as amended, notice is hereby given of the following meeting.

The meeting will be closed to the public in accordance with the provisions set forth in sections 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., as amended, and the Determination of the Chief Operating Officer, CDC, pursuant to Public Law 92-463. The grant applications and the discussions could disclose confidential trade secrets or commercial property such as

patentable material, and personal information concerning individuals associated with the grant applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

*Name of Committee:* Disease, Disability, and Injury Prevention and Control Special Emphasis Panel (SEP)—PS15-001SUPP, Positive Health Check Evaluation Trial.

*Date:* June 27, 2019.

*Time:* 10:00 a.m.–5:00 p.m., (EDT).

*Place:* Teleconference.

*Agenda:* To review and evaluate grant applications.

*For Further Information Contact:* Gregory Anderson, M.S., M.P.H., Scientific Review Officer, CDC, 1600 Clifton Road NE, Mailstop E60, Atlanta, Georgia 30329, (404) 718-8833, [gca5@cdc.gov](mailto:gca5@cdc.gov).

The Chief Operating Officer, Centers for Disease Control and Prevention, has been delegated the authority to sign **Federal Register** notices pertaining to announcements of meetings and other committee management activities, for both the Centers for Disease Control and

Prevention and the Agency for Toxic Substances and Disease Registry.
