

the best spot in that range to catch the entire sounder all at the same time. Shooting at one or two swine or pursuing them with dogs will cause the sounder (the entire group) to scatter, which makes trapping the sounder all at the same time more difficult.

The Mark Twain National Forest Supervisor is proposing to issue a forest order prohibiting the hunting of feral swine on the Forest. Issuance of the forest order would respond to a request from the Missouri Department of Conservation (MDC) to make policies consistent across all lands in Missouri to halt the spread and resulting environmental damage caused by feral swine. The State of Missouri feral swine eradication program bans all taking, pursuing or releasing of feral swine on lands owned, leased, or managed by the state. The proposed closure order would align the management of National Forest System lands with the eradication efforts of MDC and other federal agencies, including USDA Animal and Plant Health Inspection Service. The proposed forest order and the justification for the forest order are available on the Forest Service websites <http://www.fs.usda.gov/goto/mtnf/feralswine>.
