

for this project will document findings on the impacts on historic properties and summarize the status of consultations under section 106.

Environmental Mailing List

The environmental mailing list includes federal, state, and local government representatives and agencies; elected officials; environmental and public interest groups; Native American Tribes; other interested parties; and local libraries and newspapers. This list also includes all affected landowners (as defined in the Commission's regulations) who are potential right-of-way grantors, whose property may be used temporarily for project purposes or is within certain distances of proposed aboveground facilities, and anyone who submits comments on the project. Commission staff will update the environmental mailing list as the analysis proceeds to ensure that Commission notices related to this environmental review are sent to all individuals, organizations, and government entities interested in and/or potentially affected by the project.

If the Commission issues the EA for an allotted public comment period, a *Notice of Availability* of the EA will be sent to the environmental mailing list and will provide instructions to access the electronic document on the FERC's website (www.ferc.gov). If you need to make changes to your name/address, or if you would like to remove your name from the mailing list, please return the attached "Mailing List Update Form" (appendix 2).

[Docket No. RM93-11-000]

Notice of Annual Change in the Producer Price Index for Finished Goods: Revisions to Oil Pipeline Regulations Pursuant to the Energy Policy Act of 1992

The Commission's regulations include a methodology for oil pipelines to change their rates through use of an index system that establishes ceiling levels for such rates. The Commission bases the index system, found at 18 CFR 342.3, on the annual change in the Producer Price Index for Finished Goods (PPI-FG), plus one point two three percent (PPI-FG + 1.23). The Commission determined in an *Order Establishing Index Level*,¹ issued December 17, 2015, that PPI-FG + 1.23 is the appropriate oil pricing index factor for pipelines to use for the five-year period commencing July 1, 2016.

The regulations provide that the Commission will publish annually an index figure reflecting the final change in the PPI-FG after the Bureau of Labor Statistics publishes the final PPI-FG in May of each calendar year. The annual average PPI-FG index figures were 198.0 for 2017 and 204.1 for 2018.² Thus, the percent change (expressed as a decimal) in the annual average PPI-FG from 2017 to 2018, plus 1.23 percent, is positive 0.043108.³ Oil pipelines must multiply their July 1, 2018, through June 30, 2019, index ceiling levels by positive 1.043108⁴ to compute their index ceiling levels for July 1, 2019, through June 30, 2020, in accordance

¹ 153 FERC 61,312, at P 52 (2015).

² Bureau of Labor Statistics (BLS) publishes the final figure in mid-May of each year. This figure is publicly available from the Division of Industrial Prices and Price Indexes of the BLS, at 202-691-7705, and in print in August in Table 1 of the annual data supplement to the BLS publication *Producer Price Indexes* via the internet at <http://www.bls.gov/ppi/home.htm>. To obtain the BLS data, scroll down to PPI Databases and click on Top Picks of the Commodity Data including headline FD-ID indexes (Producer Price Index—PPI). At the next screen, under the heading PPI Commodity Data, select the box, Finished goods—WPUFD49207, then scroll to the bottom of this screen and click on Retrieve data.
