

equipment, pipes, and tanks, and the posting of an exterior sign at their place of business. The IRC at 26 U.S.C. 5206 also requires DSP proprietors to mark containers of distilled spirits, subject to regulations prescribed by the Secretary. The TTB regulations concerning the identification of DSP plants, equipment, structures, and bulk containers are contained in 27 CFR part 19. Those regulations describe the exterior identification sign required at DSPs and the identification signs or marks on DSP structures, cookers, fermenters, stills, tanks, and other major equipment. The regulations also require tank cars and tank trucks used by DSPs as bulk conveyances for distilled spirits to be permanently and legibly marked with identifying information and capacity. The information set forth under this information collection is necessary to protect the revenue and facilitate inspections, as TTB uses the required signs and marks to identify the location, use, and capacity of a DSP's structures, equipment, and conveyances.

Current Actions: TTB is submitting this information collection for extension purposes only, and there are no changes to the collection. However, due to continued growth in the number of distilled spirits plants, TTB is increasing the number of reported respondents to this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 3,160.
- *Average Responses per Respondent:* 1 per year.

- *Number of Responses:* 3,160.
- *Average Per-response and Total Burden:* None. (The placing of the signs and marks identifying DSP premises, structures, equipment, and bulk conveyances is a usual and customary business practice undertaken by DSP proprietors, regardless of any regulatory requirement to do so. Therefore, per the OMB regulations at 5 CFR 1320.3(b)(2), there is no burden associated with the collection of such usual of customary business information.)

OMB Control No. 1513-0084

Title: Labeling of Sulfites in Alcohol Beverages.

Abstract: The U.S. Food and Drug Administration (FDA) has determined that sulfating agents are human allergens that can have serious health implications for persons who are allergic to sulfites, particularly asthmatics, and, as a result, FDA

regulations require food labels to declare the presence of sulfites if there are 10 parts per million (ppm) or more of a sulfating agent in a finished food product. Under the FAA Act at 27 U.S.C. 205(e), the Secretary is authorized to issue regulations requiring alcohol beverage labels to provide "adequate information" to consumers regarding the identity and quality of such products. Under that authority and consistent with FDA's food labeling requirements, the TTB alcohol beverage labeling regulations in 27 CFR part 4 (wine), part 5 (distilled spirits), and part 7 (beer) require a declaration of sulfites on the labels of alcohol beverages released from domestic bottling premises or customs custody when sulfites are present in such products at levels of 10 or more ppm. This label disclosure is necessary to protect sulfite-sensitive consumers from products that could be potentially harmful to them.

Current Actions: There are no changes to this information collection, and TTB is submitting it for extension purposes only. However, TTB is increasing the number of reported respondents, responses, and burden hours associated with this information collection due to continued growth in the number of alcohol beverage producers and importers, as well as continued growth in the number of alcohol products subject to this information collection.

Type of Review: Extension of a currently approved collection.

Affected Public: Businesses and other for-profits.

Estimated Annual Burden

- *Number of Respondents:* 24,700.
- *Average Responses per Respondent:* 1 (on occasion).
- *Number of Responses:* 24,700.
- *Average Per-response Burden:* 40 minutes.
- *Total Burden:* 16,467 hours.

Dated: May 15, 2019.
