

would consist of a smaller facility footprint on the same location.

San Luis II LPOE, AZ

The proposed truck inspection facility would be located on the northern edge of the LPOE property line. A portion of the site work would be constructed on newly acquired Federal land that will allow access from the site after hours. Site work would require the clearing of the existing site, extension of existing utilities for electrical, sanitary sewer and water, paving of the truck path, and relocating the existing CBP impound lot. Facility construction would include an inspection canopy with pits and a "Medium 1" FMCSA administration building. The other build alternative would consist of a smaller facility footprint on the same location.

Nogales Mariposa LPOE, AZ

The proposed truck inspection facility would be located on privately owned land, north of the existing LPOE. Site work would require the clearing of the existing site, extension of existing utilities for electrical, sanitary sewer and water, paving of the truck path. Facility construction would include an inspection canopy with pits and a FMCSA administration building. The other build alternative would consist of a smaller facility footprint on the same location.

The "no action" alternative assumes that no new facility would be constructed at any of the sites and the LPOEs and FMCSA operations would continue to operate under current conditions.
