Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for Area Sources: Asphalt Processing and Asphalt Roofing Manufacturing (40 CFR part 63, subpart AAAAAAA) were proposed on July 9, 2009, promulgated on December 2, 2009, and amended on March 18, 2010. These regulations apply to existing facilities and new facilities that are Area Sources and that either process asphalt or manufacture asphalt roofing products. New facilities include those that commenced construction, modification or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 63, subpart AAAAAAA.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities:

Existing and new facilities that are area sources and that process asphalt or manufacture asphalt roofing products. New facilities include those that commenced construction, modification or reconstruction after the date of proposal.

Respondent's obligation to respond:

Mandatory (40 CFR part 63, subpart AAAAAAA).

Estimated number of respondents: 35 (total).

Frequency of response: Semiannually.

Total estimated burden: 1,410 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$161,000 (per year), which includes \$525 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is a decrease in hours in the total estimated respondent burden compared with the ICR currently approved by OMB. This is due to a decrease in EPA's estimate of the number of industry sources subject to this regulation, which is based on information collected during a recent analysis of asphalt processing and asphalt roofing major sources for a risk and technology review. The growth rate for the industry continues to be very low, negative or non-existent.

Courtney Kerwin,

Director, Regulatory Support Division.
