The FY 2020 Department of Energy Office of Environmental Management's Congressional Budget Request included \$21.035 million for the Title X Program.

DATES: The closing date for the submission of FY 2019 Title X claims is September 13, 2019. SUPPLEMENTARY INFORMATION: DOE published a final rule under 10 CFR part 765 in the **Federal Register** on May 23, 1994, (59 FR 26714) to carry out the requirements of Title X of the Energy Policy Act of 1992 (sections 1001-1004 of Pub. L. 102-486, 42 U.S.C. 2296a *et seq.*) and to establish the procedures for eligible licensees to submit claims for reimbursement. DOE amended the final rule on June 3, 2003, (68 FR 32955) to adopt several technical and administrative amendments (*e.g.*, statutory increases in the

reimbursement ceilings). Title X requires DOE to reimburse eligible uranium and thorium licensees for certain costs of decontamination, decommissioning, reclamation, and other remedial action incurred by licensees at active uranium and thorium processing sites. The eligible licensees incurred these costs to remediate byproduct material, generated as an incident of sales to the United States Government of uranium or thorium that was extracted or concentrated from ores processed primarily for their source material contents. To be reimbursable, costs of remedial action must be for work that is necessary to comply with applicable requirements of the Uranium Mill Tailings Radiation Control Act of 1978 (42 U.S.C. 7901 *et seq.*) or, where appropriate, with requirements established by a State pursuant to a discontinuance agreement under section 274 of the Atomic Energy Act of 1954 (42 U.S.C. 2021). Claims for reimbursement must be supported by reasonable documentation as determined by DOE in accordance with 10 CFR part 765. Funds for reimbursement will be provided from the Uranium Enrichment Decontamination and Decommissioning Fund established at the Department of Treasury pursuant to section 1801 of the Atomic Energy Act of 1954 (42 U.S.C. 2297g). Payment or obligation of funds shall be subject to the requirements of the Anti-Deficiency Act (31 U.S.C. 1341).

Authority: Section 1001-1004 of Public Law 102-486, 106 Stat. 2776 (42 U.S.C. 2296a *et seq.*).

Signed in Washington, DC, on June 18, 2019.

Title X Program Lead and Coordinator, Office of Waste Disposal, Office of Environmental Management.

Abstract: The National Emission Standards for Hazardous Air Pollutants (NESHAP) for the Printing and Publishing Industry were proposed on March 14, 1995, promulgated on May 30, 1998, and most-recently amended on April 21, 2011. These regulations apply to both existing and new facilities operating publication rotogravure, product and packaging rotogravure, or wide-web flexographic printing presses at major sources. These standards also apply to owners and/or operators who choose to commit to and meet the criteria of establishing the facility to be an area source of hazardous air pollutants (HAP). New facilities include those that commenced construction or reconstruction after the effective date of this subpart. This information is being collected to assure compliance with 40 CFR part 63, subpart KK.

In general, all NESHAP standards require initial notifications, performance tests, and periodic reports by the owners/operators of the affected facilities. They are also required to maintain records of the occurrence and duration of any startup, shutdown, or malfunction in the operation of an affected facility, or any period during which the monitoring system is inoperative. These notifications, reports, and records are essential in determining compliance, and are required of all affected facilities subject to NESHAP.

Form Numbers: None.

Respondents/affected entities: Printing and publishing facilities.

Respondent's obligation to respond: Mandatory (40 CFR part 63, subpart KK).

Estimated number of respondents: 352 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 59,800 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$7,220,000 (per year), which includes \$414,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the Estimates: There is no change in the labor hours in this ICR compared to the previous ICR. This is due to two considerations. First, the regulations have not changed over the past three years and are not anticipated to change over the next three years. Secondly, this ICR assumes the respondent universe subject to the

regulation has remained stable since the last ICR renewal.

Courtney Kerwin,

Director, Regulatory Support Division.
