Federal Energy Regulatory Commission

[Docket No. RD19–3–000]

Petition of North American Electric Reliability Corporation (NERC) for Approval of Proposed Reliability Standard CIP–008–6—Cyber Security—Incident Reporting and Response Planning

In Reply Refer to: North American Electric Reliability Corporation, Docket No. RD19–3–000.

North American Electric Reliability Corporation, 1325 G Street NW, Suite 600, Washington, DC 20005.
 Attention: Lauren Perotti, Marisa Hecht
 Dear Ms. Perotti and Ms. Hecht:

1. On March 7, 2019, the North American Electric Reliability Corporation (NERC) filed a petition requesting approval of proposed Reliability Standard CIP–008–6 (Cyber Security—Incident Reporting and Response Planning). NERC also requested approval of: (1) The associated implementation plan, violation risk factors and violation severity levels; (2) the inclusion of proposed revised definitions of “Cyber Security Incident” and “Reportable Cyber Security Incident” into the NERC Glossary;¹ and (3) the retirement of currently-effective Reliability Standard CIP–008–5. For the reasons discussed below, we grant the requested approvals.

2. In Order No. 848, the Commission directed NERC to enhance the mandatory reporting of Cyber Security Incidents.² The Commission explained that the currently-effective reporting threshold, which only requires reporting in cases where a Cyber Security Incident has “compromised or disrupted one or more reliability tasks,” may understate the true scope of cyber-related threats to the Bulk-Power System.³ To address this reliability gap, pursuant to section 215(d)(5) of the Federal Power Act (FPA), the Commission directed NERC to develop and submit modifications to

¹ Glossary of Terms Used in NERC Reliability Standards (NERC Glossary).

² *Cyber Security Incident Reporting Reliability Standards*, Order No. 848, 164 FERC ¶ 61,033 (2018).
