SUPPLEMENTARY INFORMATION:

Background

Currently, the System for Award Management (SAM.gov) utilizes the Dun & Bradstreet (D&B) Data Universal Numbering System (DUNS)® nine-digit number as the unique identifier for entities throughout the federal awarding lifecycle, in SAM.gov, in other Integrated Award Environment (IAE) systems, on required forms, and in downstream government systems.

In 2016, the government revised both the Federal Acquisition Regulation (FAR) and Title 2 of the Code of Federal Regulations (2CFR) to remove any proprietary references to D&B and the DUNS® number as the unique entity identifier. This allowed the government to decouple the required unique identifier from the supporting entity validation services.

As such, the U.S. government is moving to a new unique entity identifier for federal awards management, including, but not limited to, contracts, grants, and cooperative agreements, which will ultimately become the primary key to identify entities throughout the federal awarding lifecycle, in SAM.gov, other IAE systems, on required forms, and in downstream government systems.
