SUPPLEMENTARY INFORMATION: The MSIX system of records helps meet the needs of migratory children by improving the timeliness of the availability of current educational and health information on migratory children to school and program staff where migratory children enroll after moving. MSIX uses the Minimum Data Elements (MDEs) to provide a standard format for information that States must collect and maintain. MSIX allows State educational agencies (SEAs) to upload the required MDEs from their own existing State student record systems into a single national data repository where information on each migratory child is maintained, organized, and compiled. As a web-based platform, MSIX allows authorized users to access a migratory child's MSIX record via a web browser. Section 1308(b)(2) of the Elementary and Secondary Education Act of 1965, as amended (ESEA) (20 U.S.C. 6398(b)(2)) requires the Secretary of Education to ensure the linkage of migratory student record systems for the purpose of electronically exchanging, among the States, health and educational information regarding all migratory students.

As described more fully below, this notice will update the following sections: Security Classification; System Location; Authority for Maintenance of the System; Purpose(s) of the System; Categories of Records in the System; Record Source Categories; Policies and Practices for Storage of Records; Policies and Practices for Retrieval of Records; Policies and Practices for Retention and Disposal of Records; Administrative, Technical, and Physical Safeguards; Record Access Procedures; and Notification Procedures. This modified system of records notice will update routine uses (1), (2), (3), and (6), and, pursuant to the requirements in Office of Management and Budget (OMB) Memorandum 17–12, it will also update routine use (5) and add new routine use (8). Pursuant to the requirements of OMB Circular No. A–108, a new section entitled “History” also has been added to the notice.

Introduction: The Department previously published the MSIX system of records notice in the **Federal Register** on December 5, 2007 (72 FR 68572–76). This notice will update the following sections: Security Classification; System Location; Authority for Maintenance of the System; Purpose(s) of the System; Categories of Records in the System; Record Source Categories; Routine Uses of Records Maintained in the System, Including Categories of Users and Purposes of Such Uses; Policies and Practices for Storage of Records; Policies and Practices for Retrieval of Records; Policies and Practices for Retention and Disposal of Records; Administrative, Technical, and Physical Safeguards; Record Access Procedures; and Notification Procedures.

Pursuant to OMB Circular No. A–108, the section entitled “SECURITY CLASSIFICATION” is updated from “none” to “unclassified.”

The Department is updating the section entitled “SYSTEM LOCATION” to list the names and addresses of the current Department contractor and subcontractor that maintain MSIX records.

The Department is updating the section entitled “AUTHORITY FOR MAINTENANCE OF THE SYSTEM” to update the reference to the current legal authority.

The Department is updating the section entitled “PURPOSE(S) OF THE SYSTEM” to reflect the current, rather than anticipated, use and benefits of the system. While the purpose of reducing unnecessary immunizations is still a goal of the Migrant Education Program (MEP), MSIX does not track or record incidences of unnecessary immunizations.

The Department is updating the section entitled “CATEGORIES OF RECORDS IN THE SYSTEM” to update the reference to the Paperwork Reduction Act (PRA) clearance request in the **Federal Register** which lists the minimum data elements included in MSIX.

The Department is updating the section entitled “RECORD SOURCE CATEGORIES” to add Migrant Education Program (MEP) local operating agencies (LOAs), in addition to local educational agencies (LEAs). LOAs were added to the record source categories to be inclusive of service delivery organizations that are operating in the MEP participating States. SEAs submit data to MSIX using data sourced from LEAs and/or LOAs, depending on the service delivery model used by the SEA. The Department also is adding parents, guardians, and migratory children to the section of the notice on record source categories to more closely adhere to OMB guidance on the Privacy Act and to reflect that LEAs, LOAs, and SEAs obtain some records directly from parents and migratory children.

This modified system of records notice will also update routine uses (1), (2), (3), (5), and (6) and add new routine use (8).

The Department is modifying routine use (1), which was formerly entitled “MEP Services, School Enrollment, Grade or Course Placement, Accrual of High School Credits, Student Record Match Resolution,” to include “data correction by parents, guardians, and migratory children” as a reason for disclosure to authorized representatives of SEAs, LEAs, or other MEP LOAs.

The Department is modifying routine use (2) entitled “Contract Disclosure” and routine use (3) entitled “Research Disclosure” to remove language that respectively referenced safeguard requirements under subsection (m) of the Privacy Act and Privacy Act safeguards. The Department revised the language in routine use (2) to permit the Department to disclose records from this system of records to employees of Department contractors, whether or not the contractors are covered by subsection (m) of the Privacy Act, so long as the contractors are performing a Departmental function that requires disclosing records to them and they agree to establish and maintain safeguards that will protect the security and confidentiality of the disclosed records. The Department also revised the language in routine uses (2) and (3) because the prior language referring to required safeguards under the Privacy Act and Privacy Act safeguards was unclear about what safeguards were

required and therefore to clarify that contractors and researchers to whom disclosures are made under these routine uses will be required to agree to establish and maintain safeguards to protect the security and confidentiality of the disclosed records. The Department also revised routine use (2) to remove language that had referred to requiring these safeguards to be maintained before the contract was entered into and instead to indicate that the agreement on such safeguards will be reached as part of any such contract.

Pursuant to the requirements in OMB M-17-12, the Department is modifying routine use (5) entitled "Disclosure in the Course of Responding to a Breach of Data" and adding routine use (8) entitled "Disclosure in Assisting another Agency in Responding to a Breach of Data" in order to comply with the requirements in OMB M-17-12. Pursuant to this new routine use, the Department may disclose records from this system to another Federal agency or Federal entity, when the Department determines that information from this system of records is reasonably necessary to assist the recipient agency or entity in (a) responding to a suspected or confirmed breach or (b) preventing, minimizing, or remedying the risk of harm to individuals, the recipient agency or entity (including its information systems, programs, and operations), the Federal Government, or national security, resulting from a suspected or confirmed breach.

The Department is modifying routine use (6) entitled "Litigation or Alternative Dispute Resolution (ADR) Disclosure" to replace the word "individual," which is a defined word under the Privacy Act, with the word "person" to avoid public confusion.

The Department is updating the section entitled "POLICIES AND PRACTICES FOR STORAGE OF RECORDS" to remove references to hardware stored in locked file cabinets and describe electronic records storage.

The Department is also updating the section entitled "POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS" to explain that MSIX users retrieve records by an individual's name, in addition to the unique identifier assigned to each individual.

The Department is updating the section entitled "POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS" to reflect the most recent Department records schedule, and applicable disposition instruction, which governed the retention and disposition of the records; and, to explain that said records schedule disposition instruction is

being superseded, pending approval by the National Archives and Records Administration (NARA), by a new records schedule submitted by the Department to NARA.

The Department is updating the section entitled "ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS" to reflect changes in technical and physical safeguards offered by the cloud service provider.

The Department is also updating the sections entitled "RECORD ACCESS PROCEDURES" and "NOTIFICATION PROCEDURES" to specify the necessary particulars that the system manager must be provided in connection with a records access or notification request in order to distinguish between the records of individuals with the same names.

Pursuant to the requirements of OMB Circular No. A-108, the Department is also adding a new section to the notice that is entitled "HISTORY."

POLICIES AND PRACTICES FOR STORAGE OF RECORDS:

The cloud service provider, Amazon Web Services (AWS), through a subcontract with the Department, stores computerized student records, including backups, on virtual servers. Physical security of electronic data is maintained in compliance with the Federal Information Security Modernization Act of 2014 (FISMA) and National Institute of Standards and Technology (NIST) standards.

POLICIES AND PRACTICES FOR RETRIEVAL OF RECORDS:

Records in this system are retrieved by name and by the unique identifier assigned to each individual.

POLICIES AND PRACTICES FOR RETENTION AND DISPOSAL OF RECORDS:

All records were previously retained and disposed of in accordance with Department Records Schedule 066: Program Management Files (N1-441-10-1) (ED 066), Item (a)(3). ED 066, Item (a)(3), is being superseded, pending approval by the National Archives and Records Administration (NARA), by a new records schedule submitted by the Department to NARA entitled, "Migrant Student Information Exchange (MSIX) Electronic Information System Records." The Department will not destroy the aforementioned records until such time as said new, NARA-approved schedule is in effect, as applicable.

ADMINISTRATIVE, TECHNICAL, AND PHYSICAL SAFEGUARDS:

(1) *Introduction.* Security personnel control and monitor all physical access to the site of the Department's subcontractor, where this system of records is maintained. The computer system employed by the Department offers a high degree of resistance to tampering and circumvention. This computer system limits data access to Department and contract staff on a "need to know" basis, and controls individual users' ability to access and alter records within the system by granting user names and passwords, and assigning user roles.

(2) *Physical Security of Electronic Data.* The MSIX infrastructure is housed in a cloud service provider with provisional authorization from the Federal Risk and Authorization Management Program (FedRAMP) Joint Authorization Board (JAB) under the Moderate control baseline. All controls managed by the cloud service provider, including physical security of electronic data, are reviewed by a third party assessment organization (3PAO) in accordance with FedRAMP guidance.

(3) *User Access to Electronic Data.* MSIX leverages role-based accounts and security controls to limit access to the application, its servers, and its infrastructure to authorized users in accordance with the Federal Information Security Modernization Act (FISMA) of 2014 and the Department Office of Chief Information Officer (OCIO) directives, policies, standards and procedures. All MSIX users must follow a registration process that involves identity validation and verification prior to gaining access to MSIX. MSIX utilizes unique user identifiers (user IDs) and authenticators (strong passwords). Directory information for all authorized users is stored in the system. Directory information maintained in MSIX includes username, full name, work contact information, and login credentials needed to maintain user accounts. The MSIX application is only available to authorized users via a Uniform Resource Locator (URL) that runs under the Hypertext Transfer Protocol over Secure Socket Layer (HTTPS).

(4) *Additional Security Measures.* The MSIX infrastructure also leverages firewalls and intrusion detection systems to limit internal access and identify unauthorized access to the system. MSIX logs, monitors, and controls network communications and systems actions. System components are logically separated from internal organizational networks and connect to external networks through managed interfaces. Further, the MSIX operations include conducting vulnerability scans, monitoring the U.S. Computer Emergency Response Team (CERT) bulletins, and applying routine operating system and vendor patches as appropriate.
