SUPPLEMENTARY INFORMATION:

Proposed Project

This request is for an update to the previously submitted and OMB-approved clearance for the data collections of the Household and Medical Provider Components of the MEPS. The previous OMB clearance request for the MEPS was approved November, 2018 with an expiration date of November 30, 2021. We propose updating the MEPS-HC by (1) adding a

section to the 2020 self-administered questionnaire (SAQ, Male/Female) that will include questions on mental health, (2) collecting a health insurance cost-sharing document and (3) implementing a pilot study to evaluate the potential effectiveness of including a sample of National Health Interview Survey (NHIS) nonrespondents in future MEPS panels as a strategy to improve the overall MEPS response rate.

MEPS Household Component and the MEPS Medical Provider Component

- *Household Component:* A sample of households participating in the NHIS in the prior calendar year are interviewed 5 times over a 2 and one half (2.5) year period. These 5 interviews yield two years of information on use of, and expenditures for, health care, sources of payment for that health care, insurance status, employment, health status and health care quality.

- *Medical Provider Component:* The MEPS-MPC collects information from medical and financial records maintained by hospitals, physicians, pharmacies and home health agencies named as sources of care by household respondents.

- *Insurance Component (MEPS-IC):* The MEPS-IC collects information on establishment characteristics, insurance offerings and premiums from employers. The MEPS-IC is conducted by the Census Bureau for AHRQ and is cleared separately.

The MEPS is a multi-purpose survey. In addition to collecting data to yield annual estimates for a variety of measures related to health care use and expenditures, MEPS also provides estimates of measures related to health status, consumer assessment of health care, health insurance coverage, demographic characteristics, employment and access to health care indicators.

Estimates can be provided for individuals, families and population subgroups of interest. Data obtained in this study are used to provide, among others, the following national estimates:

- Annual estimates of health care use and expenditures for persons and families
