SUPPLEMENTARY INFORMATION:**Authority for This Rulemaking**

The FAA's authority to issue rules regarding aviation safety is found in Title 49 of the United States Code. Subtitle I, Section 106 describes the authority of the FAA Administrator. Subtitle VII, Aviation Programs, describes in more detail the scope of the agency's authority. This rulemaking is promulgated under the authority described in Subtitle VII, Part A, Subpart I, Section 40103. Under that section, the FAA is charged with prescribing regulations to assign the use of the airspace necessary to ensure the safety of aircraft and the efficient use of airspace. This regulation is within the scope of that authority as it would modify the VOR Federal airway route structure in the northeastern United States to maintain the efficient flow of air traffic.

Availability and Summary of Documents for Incorporation by Reference

This document proposes to amend FAA Order 7400.11C, Airspace Designations and Reporting Points,

dated August 13, 2018, and effective September 15, 2018. FAA Order 7400.11C is publicly available as listed in the ADDRESSES section of this proposed rule. FAA Order 7400.11C lists Class A, B, C, D, and E airspace areas, air traffic service routes, and reporting points.

The Proposal

The FAA is proposing an amendment to Title 14 Code of Federal Regulations (14 CFR) part 71 to remove VOR Federal airway V-104, and amend VOR Federal airway V-322 due to the planned decommissioning of the Berlin, NH, VOR/DME. The proposed changes are described below.

V-104: V-104 currently extends between the Burlington, VT, VOR/DME, and the Bangor, ME, VORTAC. The FAA proposes to remove V-104 in its entirety. An alternative route between Burlington and Bangor would be available from Burlington via V-141 to Concord, NH; then V-39 to Augusta, ME; then V-3 to Bangor.

V-322: V-322 currently extends between the Concord, NH, VOR/DME, and the Sherbrooke, PQ, Canada, VOR/DME. The FAA proposes to remove the segments of V-322 between the intersection of the Concord, NH, VOR/DME 022°(T)/037°(M) and the Augusta, ME, 265°(T)/283°(M) radials (i.e., the charted WYLIE Fix); and the Sherbrooke VOR/DME. As amended, V-322 would extend between the Concord, NH, VOR/DME, and the intersection of the Concord, NH, VOR/DME 022°(T)/037°(M) and the Augusta, ME, 265°(T)/283°(M) radials (i.e., the charted WYLIE Fix).

Alternative routing between Concord, NH and Sherbrooke, Canada would be available from Concord via V-141 to Lebanon, NH; V-151 to Montpelier, VT; then V-447 to Sherbrooke.

Domestic VOR Federal airways are published in paragraph 6010(a) of FAA Order 7400.11C, dated August 13, 2018, and effective September 15, 2018, which is incorporated by reference in 14 CFR 71.1. The VOR Federal airways listed in this document would be subsequently published in the Order.

Regulatory Notices and Analyses

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore: (1) Is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under Department of Transportation (DOT) Regulatory

Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this proposed rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Environmental Review

This proposal will be subject to an environmental analysis in accordance with FAA Order 1050.1F, “Environmental Impacts: Policies and Procedures” prior to any FAA final regulatory action.
