mammals and the subsistence hunters; and (2) That cannot be sufficiently mitigated by other measures to increase the availability of marine mammals to allow subsistence needs to be met.

Harbor seals are the marine mammal species most regularly harvested for subsistence by households in Ketchikan and Saxman (A community a few miles south of Ketchikan, on the Tongass Narrows). Eighty harbor seals were harvested by Ketchikan residents in 2007, which ranked fourth among all communities in Alaska that year for harvest of harbor seals. Thirteen harbor seals were harvested by Saxman residents in 2007. In 2008, two Steller sea lions were harvested by Ketchikanbased subsistence hunters, but this is the only record of sea lion harvest by residents of either Ketchikan or Saxman. In 2012, the community of Ketchikan had an estimated subsistence take of 22 harbor seals and 0 Steller sea lion (Wolf et al., 2013). This is the most recent data available. Hunting usually occurs in October and November (ADF&G 2009), but there are also records of relatively high harvest in May (Wolfe et al., 2013). The ADF&G has not recorded harvest of cetaceans from either community (ADF&G 2018). All project activities will take place within the industrial area of Tongass Narrows immediately adjacent to Ketchikan where subsistence activities do not generally occur. The project will not have an adverse impact on the availability of marine mammals for subsistence use at locations farther away, where these construction activities are expected to take place. Some minor, short-term harassment of the harbor seals could occur, but this is not likely to have any measureable effect on subsistence harvest activities in the region.

Phase 1—Based on the description and location of the specified activity, and the proposed mitigation and monitoring measures, NMFS has preliminarily determined that there will not be an unmitigable adverse impact on subsistence uses from Phase 1 of ADOT&PF's proposed activities.

Phase 2—Based on the description and location of the specified activity, and the proposed mitigation and monitoring measures, NMFS has preliminarily determined that there will not be an unmitigable adverse impact on subsistence uses from Phase 2 of ADOT&PF's proposed activities.

### Endangered Species Act (ESA)

Section 7(a)(2) of the Endangered Species Act of 1973 (ESA: 16 U.S.C. 1531 *et seq.*) requires that each Federal agency insure that any action it authorizes, funds, or carries out is not likely to jeopardize the continued existence of any endangered or threatened species or result in the destruction or adverse modification of designated critical habitat. To ensure ESA compliance for the issuance of IHAs, NMFS Office of Protected Resources consults internally, in this case with NMFS Alaska Regional Office, whenever we propose to authorize take for endangered or threatened species.

NMFS is proposing to authorize take of the Central North Pacific stock of humpback whales, of which a portion belong to the Mexico DPS humpback whales, which are listed under the ESA. During the USACE permitting process for the Tongass Narrows Project, the effects of this proposed Federal action were analyzed in NMFS' 2019 Endangered Species Act (ESA) Section 7(a)(2) Biological Opinion for Construction of the Tongass Narrows Project (Gravina Access), however, this biological opinion did not analyze the issuance of IHAs. Therefore, the NMFS Permit and Conservation Division has requested initiation of Section 7 consultation with the NMFS Alaska Regional Office for the issuance of these IHAs. NMFS will conclude the ESA consultation prior to reaching a determination regarding the proposed issuance of the authorizations.

### **Proposed Authorizations**

As a result of these preliminary determinations, NMFS proposes to issue two distinct and consecutive IHAs to ADOT&PF for conducting ferry berth improvements and construction in Tongass Narrows, Alaska in 2020 through 2021 (Phase 1) and 2021 through 2022 (Phase 2), provided the previously mentioned mitigation, monitoring, and reporting requirements are incorporated. Drafts of the proposed IHAs can be found at <a href="https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-undermarine-mammal-protection-act">https://www.fisheries.noaa.gov/permit/incidental-take-authorizations-undermarine-mammal-protection-act</a>.

### **Request for Public Comments**

We request comment on our analyses, the proposed authorization, and any other aspect of this Notice of Proposed IHA for the proposed in-water construction project. We also request at this time comment on the potential renewal of this proposed IHA as described in the paragraph below. Please include with your comments any supporting data or literature citations to help inform decisions on the request for this IHA or a subsequent Renewal.

On a case-by-case basis, NMFS may issue a one-year IHA renewal with an additional 15 days for public comments when (1) another year of identical or

nearly identical activities as described in the Specified Activities section of this notice is planned or (2) the activities as described in the Specified Activities section of this notice would not be completed by the time the IHA expires and a second IHA would allow for completion of the activities beyond that described in the Dates and Duration section of this notice, provided all of the following conditions are met:

- A request for renewal is received no later than 60 days prior to expiration of the current IHA.
- The request for renewal must include the following:
- (1) An explanation that the activities to be conducted under the requested Renewal are identical to the activities analyzed under the initial IHA, are a subset of the activities, or include changes so minor (e.g., reduction in pile size) that the changes do not affect the previous analyses, mitigation and monitoring requirements, or take estimates (with the exception of reducing the type or amount of take because only a subset of the initially analyzed activities remain to be completed under the Renewal).
- (2) A preliminary monitoring report showing the results of the required monitoring to date and an explanation showing that the monitoring results do not indicate impacts of a scale or nature not previously analyzed or authorized.
- Upon review of the request for renewal, the status of the affected species or stocks, and any other pertinent information, NMFS determines that there are no more than minor changes in the activities, the mitigation and monitoring measures will remain the same and appropriate, and the findings in the initial IHA remain valid.

Dated: July 11, 2019.

BILLING CODE 3510-22-P

### **DEPARTMENT OF COMMERCE**

# National Oceanic and Atmospheric Administration

### Submission for OMB Review; Comment Request

The Department of Commerce will submit to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Agency: National Oceanic and Atmospheric Administration (NOAA).

Title: Evaluations of Coastal Zone Management Act Programs: State Coastal Management Programs and National Estuarine Research Reserves.

*OMB Control Number:* 0648–0661. *Form Number(s):* None.

Type of Request: Regular (revision and extension of a current information collection).

 $Number\ of\ Respondents:\ 209.$ 

Average Hours per Response: Program manager information collection, 71 hours; stakeholder and partner survey, 15 minutes.

Burden Hours: 831.

Needs and Uses: The Coastal Zone Management Act of 1972, as amended (CZMA; 16 U.S.C. 1451 et seq.) requires that state coastal management programs and national estuarine research reserves developed pursuant to the CZMA and approved by the Secretary of Commerce be evaluated periodically. This request is for collection of information to accomplish those evaluations.

NOAA's Office for Coastal Management (OCM) conducts periodic evaluations of the 34 coastal management programs and 29 research reserves and produces written findings for each evaluation. OCM has access to documents submitted in cooperative agreement applications, performance reports, and certain documentation required by the CZMA and implementing regulations. However, additional information from each coastal management program and research reserve, as well as information from the program and reserve partners and stakeholders with whom each works, is necessary to evaluate against statutory and regulatory requirements. Different information collection subsets are necessary for (1) coastal management programs (2) their partners and stakeholders, (3) research reserves, and (4) their partners and stakeholders.

Affected Public: Business or other forprofit organizations; not-for-profit institutions; state, local, or tribal government; federal government.

Frequency: Every 5 or 6 years.
Respondent's Obligation: Program
managers, Required to obtain or retain
benefits; Program partners and
stakeholders, Voluntary.

This information collection request may be viewed at *reginfo.gov*. Follow the instructions to view Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to OIRA\_Submission@ omb.eop.gov or fax to (202) 395–5806.

### Sheleen Dumas,

Departmental Lead PRA Officer, Office of the Chief Information Officer, Commerce Department.

### DEPARTMENT OF COMMERCE

## National Oceanic and Atmospheric Administration

## Proposed Information Collection; Comment Request; Southeast Region Logbook Family of Forms

**AGENCY:** National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice.

**SUMMARY:** The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995.

**DATES:** Written comments must be submitted on or before September 16, 2019

ADDRESSES: Direct all written comments to Adrienne Thomas, Government Information Specialist, NOAA, 151 Patton Avenue, Room 159, Asheville, NC 28801 (or via the internet at *PRAcomments@doc.gov*). All comments received are part of the public record. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information.

## FOR FURTHER INFORMATION CONTACT:

Requests for additional information or copies of the information collection instrument and instructions should be directed to Dr. David Gloeckner, (305) 361–4257 or david.gloeckner@noaa.gov.

## SUPPLEMENTARY INFORMATION:

### I. Abstract

This request is for extension of a current information collection.

Participants in most federallymanaged fisheries in the NMFS Southeast Region are currently required to keep and submit catch and effort logbooks from their fishing trips. A subset of these vessels also provides information on the species and quantities of fish, shellfish, marine turtles, and marine mammals that are caught and discarded or have interacted with the vessel's fishing gear. A subset of these vessels also provides information about dockside prices, trip operating costs, and annual fixed costs.

The data are used for scientific analyses that support critical conservation and management decisions made by national and international fishery management organizations. Interaction reports are needed for fishery management planning and to help protect endangered species and marine mammals. Price and cost data will be used in analyses of the economic effects of proposed regulations.

### II. Method of Collection

The information is submitted on paper forms and electronic transmissions. Logbooks are completed daily and submitted on either a by-trip, weekly, or monthly basis, depending on the fishery. Fixed costs are submitted on an annual basis. Other information is submitted on a trip basis.

### III. Data

OMB Control Number: 0648–0016. Form Number(s): None.

Type of Review: Regular submission (extension of a current information collection).

Affected Public: Business or other forprofit organizations; individuals or households.

Estimated Number of Respondents: 5,603.

Estimated Time per Response: Annual fixed-cost reports, 45 minutes; Colombian fishery logbooks, 18 minutes; discard logbooks, 15 minutes; headboat, charter vessels, golden crab, reef fish-mackerel, economic cost per trip, wreckfish, and shrimp logbooks, 10 minutes; no-fishing responses for golden crab, reef fish-mackerel, charter vessels, wreckfish and Colombian fisheries, 2 minutes.

Estimated Total Annual Burden Hours: 42,264.

Estimated Total Annual Cost to Public: \$0.

### IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the
