

**FOR FURTHER INFORMATION CONTACT:**

Miriam Liberatore, BLM project manager, telephone: (541) 618-2412; email: [mliberat@blm.gov](mailto:mliberat@blm.gov); mailing address: Bureau of Land Management, 3040 Biddle Road, Medford, OR 97524.

Persons who use telecommunication devices for the deaf may call the Federal Relay Service (FRS) at 1-800-877-8339 to contact Ms. Liberatore during normal business hours. The FRS is available 24 hours a day, 7 days a week, to leave a message or question regarding the project. You will receive a reply during normal business hours.

**SUPPLEMENTARY INFORMATION:**

United States Gypsum Company (USG), a subsidiary of USG Corporation, proposes to expand mining operations at its Plaster City Quarry, replace a waterline supplying its Plaster City Plant, and construct a new waterline and electrical supply line between the Plaster City Quarry and a well on private property. USG applied for right-of-way (ROW) grants for the waterline replacement (CACA-044014) and new waterline and electrical line (CACA-056908) from the BLM for portions of the waterlines that would be located on 18 and 7 acres of public land, respectively. USG also submitted a Mining Plan of Operations to the BLM for the proposed mine expansion, which covers approximately 682 acres of private lands and 9 acres of millsite claims on public lands.

In addition to the proposed action, the Draft Supplemental EIS considers a “no action” alternative and six action alternatives. Alternative 3, Partial Imperial Irrigation District (IID) Water Supply, would replace part of the water used in the Plant with water from the IID, reducing the amount of water supplied by USG’s wells in the community of Ocotillo. Alternative 4, Full IID Water Supply, would fully replace the water for the Plant operations with water from the IID. Alternatives 5 through 8 would modify the mining phases to reduce the impacts of the mine expansion on waters of the United States. Under the no action alternative, the BLM would deny the ROW applications and would not approve the plan of operations; mining operations would continue as currently permitted without expansion of those operations.

The BLM has identified Alternative 3, Partial IID Water Supply, as the BLM Preferred Alternative for the Draft Supplemental EIS. The United States Army Corps of Engineers (USACE) will identify a Least Environmentally Damaging Practicable Alternative as part of its permitting process under Section

404 of the Clean Water Act. The BLM is the lead agency and the USACE is a cooperating agency for this Draft Supplemental EIS; both agencies will make Federal decisions associated with the Project. The EPA has authority to review projects that require a permit under Section 404 of the Clean Water Act; therefore, EPA Region 9 is also a cooperating agency, but does not have a direct permitting role in the project. Public input on these alternatives or other issues is important and will be considered in the Final Supplemental EIS. Please note that public comments and information submitted, including names, street addresses, and email addresses of persons who submit comments will be available for public review and disclosure at the above address during regular business hours (8:00 a.m. to 4:00 p.m.), Monday through Friday, except holidays.

Before including your address, phone number, email address, or other personal identifying information in your comment, you should be aware that your entire comment—including your personal identifying information—may be made publicly available at any time. While you can ask us in your comment to withhold your personal identifying information from public review, we cannot guarantee that we will be able to do so.

**Notice of Inventory Completion: State University of New York at Oswego, Oswego, NY**

**AGENCY:** National Park Service, Interior.

**ACTION:** Notice.

**SUMMARY:** The State University of New York at Oswego has completed an inventory of human remains, in consultation with the appropriate Indian Tribes or Native Hawaiian organizations, and has determined that there is a cultural affiliation between the human remains and present-day Indian Tribes or Native Hawaiian organizations. Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not

identified in this notice that wish to request transfer of control of these human remains should submit a written request to the State University of New York at Oswego. If no additional requestors come forward, transfer of control of the human remains to the lineal descendants, Indian Tribes, or Native Hawaiian organizations stated in this notice may proceed.

**DATES:** Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains should submit a written request with information in support of the request to the State University of New York at Oswego at the address in this notice by August 19, 2019.

**ADDRESSES:** Alanna Ossa, NAGPRA Coordinator, State University of New York at Oswego, 313 Mahar Hall, Department of Anthropology, Oswego, NY 13126, telephone (315) 312-4172, email [alanna.ossa@oswego.edu](mailto:alanna.ossa@oswego.edu).

**SUPPLEMENTARY INFORMATION:** Notice is here given in accordance with the Native American Graves Protection and Repatriation Act (NAGPRA), 25 U.S.C. 3003, of the completion of an inventory of human remains under the control of the State University of New York at Oswego, Oswego, NY. The human remains were removed from sites in Oswego, Onondaga, Cayuga, Madison, Wayne, and St. Lawrence Counties, NY.

This notice is published as part of the National Park Service’s administrative responsibilities under NAGPRA, 25 U.S.C. 3003(d)(3). The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

**Consultation**

A detailed assessment of the human remains was made by the SUNY Oswego professional staff in consultation with representatives of the Oneida Indian Nation (previously listed as the Oneida Nation of New York) and the Onondaga Nation. The Cayuga Nation were also invited to consult, but did not participate.

**History and Description of the Remains**

At an unknown date, human remains consisting, at minimum, of two individuals were removed from an unknown location. These human remains were donated to Peter Pratt while he was teaching at SUNY Oswego, and he added them to the school’s

collection, and listed the donor as "Jones." Based on cranial and other bone metric traits, the human remains belong to two Native American adults (older than 45) of indeterminate sex. No known individuals were identified. No associated funerary objects are present.

Based on the history of Peter Pratt's research program and the provenience of the materials recovered from his multiple decades of excavations in central NY, these human remains were highly likely to have been donated during one of his excavations within Oneida, Onondaga, and Cayuga sites in Oswego, Onondaga, Cayuga, Madison, Wayne, and St. Lawrence Counties, NY. Such donations are commonly noted among Pratt's field school materials.

At an unknown date, human remains consisting, at minimum, of one individual were recovered from an unknown location. These human remains were transferred to SUNY Oswego as a result of one of Peter Pratt's Field School projects. The human remains consist of one adult male. No known individuals were identified. No associated funerary objects are present.

Based on the history of Peter Pratt's research program and the provenience of the materials recovered from his multiple decades of excavations in central NY, these human remains were recovered from one or several of the many field school projects undertaken by Peter Pratt within identified Oneida, Onondaga, and Cayuga sites within Oneida, Onondaga, and Cayuga sites in Oswego, Onondaga, Cayuga, Madison, Wayne, and St. Lawrence Counties, NY. Although labels were lost or misplaced over the five decades or so of excavations, these human remains were removed from Onondaga, Oneida, or Cayuga affiliated sites.

#### **Determinations Made by the State University of New York at Oswego**

Officials of the State University of New York at Oswego have determined that:

- Pursuant to 25 U.S.C. 3001(9), the human remains described in this notice represent the physical remains of three individuals of Native American ancestry.
- Pursuant to 25 U.S.C. 3001(2), there is a relationship of shared group identity that can be reasonably traced between the Native American human remains and associated funerary objects and the Cayuga Nation; Oneida Indian Nation (previously listed as the Oneida Nation of New York); and the Onondaga Nation (hereafter referred to as "The Tribes").

#### **Additional Requestors and Disposition**

Lineal descendants or representatives of any Indian Tribe or Native Hawaiian organization not identified in this notice that wish to request transfer of control of these human remains and associated funerary objects should submit a written request with information in support of the request to Alanna Ossa, NAGPRA Coordinator, State University of New York at Oswego, 313 Mahar Hall, Department of Anthropology, Oswego, NY 13126, telephone (315) 312-4172, email [alanna.ossa@oswego.edu](mailto:alanna.ossa@oswego.edu), by August 19, 2019. After that date, if no additional requestors have come forward, transfer of control of the human remains and associated funerary objects to The Tribes may proceed.

The State University of New York at Oswego is responsible for notifying The Tribes that this notice has been published.

Dated: June 25, 2019.

The determinations in this notice are the sole responsibility of the museum, institution, or Federal agency that has control of the Native American human remains and associated funerary objects. The National Park Service is not responsible for the determinations in this notice.

#### **Consultation**

A consultation request concerning the human remains and associated funerary objects was made by the SUNY Oswego professional staff with representatives of the Cayuga Nation.

#### **History and Description of the Remains**

In 1967-1968, human remains representing, at minimum, one individual were removed from the site of Colgan, located in the town of Ledyard in Cayuga County, NY. The human remains were acquired by Peter Pratt during SUNY Oswego's archeology dig at the Colgan site (also known as Myles A. Colgan farm), and were subsequently returned to the school. The human remains belong to a young adult (16-25 years) of indeterminate sex. No known individuals were identified. No associated funerary objects are present.

The Colgan site is identified as a late prehistoric village dating to approximately A.D. 1450-1550, based on the ceramic sequence and artifacts
