SUPPLEMENTARY INFORMATION:

General Background

The Mid-Atlantic Fishery Management Council (Council) and the Atlantic States Marine Fisheries Commission (Commission)

cooperatively manage the summer flounder, scup, black sea bass, and bluefish fisheries. The Summer Flounder, Scup, and Black Sea Bass Fishery Management Plan (FMP) and Atlantic Bluefish FMP outline the Council's process for establishing specifications. The FMPs require the specification of the acceptable biological catch (ABC), annual catch limit (ACL), annual catch targets (ACT), commercial quotas, recreational harvest limit, and other management measures, for up to three years at a time. This action proposes summer flounder specifications for the 2020-2021 fishing years and also proposes interim scup, black sea bass, and bluefish 2020 specifications that will be replaced in early 2020 following the results of an operational assessment for all three species. These specifications are consistent with the recommendations made by the Commission and Council at the March 2019 joint meeting.

Proposed Interim 2020 Scup, Black Sea Bass, and Bluefish Specifications

There is no regulatory mechanism to roll over catch and landings limits from one year to the next in these FMPs, so this action is required to set these limits for the start of 2020. This action proposes maintaining the same 2019 specifications for the start of the 2020 fishing year (Table 1), consistent with the Council's Scientific and Statistical Committee (SSC) recommendations and the recommendations of the Council and Boards. These catch limits are expected to be in place for the first few months of 2020 and will be revised as soon as possible following the results of the forthcoming operation assessment for all three species. The results of the assessment will be available in September 2019. The Council and Boards plan on recommending revised 2020 and considering 2021 specifications for all three species at a joint October 2019 meeting.

Prior to the start of the 2020 fishing year, we will announce if any adjustments need to be made to account for any previous overages or, in the case of bluefish, any commercial/recreational sector transfers. The initial commercial scup quota allocations for 2020 by quota period are outlined in Table 2.
