SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a guidance for industry entitled “Delayed Graft Function in Kidney Transplantation: Developing Drugs for Prevention.” The purpose of this guidance is to assist sponsors in the clinical development of drugs for the prevention of DGF in kidney transplantation. This guidance finalizes the draft guidance of the same name issued on March 23, 2017 (82 FR 14904). FDA considered the few public comments received on the draft guidance and appropriate changes were made, including a rationale for the recommended number of patients for a preapproval safety database. Other edits were made to the efficacy endpoints and accelerated approval sections for improved clarity on those topics.

This guidance is being issued consistent with FDA’s good guidance practices regulation (21 CFR 10.115). The guidance represents the current thinking of FDA on developing drugs for

prevention of delayed graft function in kidney transplantation. It does not establish any rights for any person and is not binding on FDA or the public. You can use an alternative approach if it satisfies the requirements of the applicable statutes and regulations. This guidance is not subject to Executive Order 12866.

II. The Paperwork Reduction Act of 1995

This guidance refers to previously approved collections of information that are subject to review by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520). The collections of information under 21 CFR part 312 (investigational new drug application regulations) have been approved under OMB control number 0910–0014. The collections of information in 21 CFR parts 50 and 56 (Protection of Human Subjects: Informed Consent; Institutional Review Boards) have been approved under OMB control number 0910–0755. The collection of information under 21 CFR part 314, including the submission of information under subpart H (accelerated approval), has been approved under OMB control number 0910–0001. The collection of information under the guidance for industry entitled “Expedited Programs for Serious Conditions—Drugs and Biologics” (available at <https://www.fda.gov/ucm/groups/fdagov-public/@fdagov-drugs-gen/documents/document/ucm358301.pdf>) has been approved under OMB control number 0910–0765.
